

Improving Palliative, Aged and Chronic Care through Clinical Research and Translation (IMPACCT)

About

At IMPACCT, we focus on interdisciplinary collaborative research that optimises the health and wellbeing of people living with life-limiting illnesses, and their families.

IMPACCT is a research centre in the Faculty of Health at the University of Technology Sydney (UTS).

Our people are a group of internationally renowned clinical academics who generate outstanding research that delivers real-world impact.

Vision and purpose

Our vision is to see each and every patient receive the best palliative, aged or chronic care at all times, no matter their life circumstance, state of health or place of residence.

"Best care, any place, every time."

Our purpose is to see substantial improvements to

the quality of life, treatment and wellbeing of those with terminal, chronic, aged and complex health conditions, their caregivers, and families through:

- conducting high-quality, collaborative research
- embracing new technologies to improve care and enable patients to take control of their own care
- active engagement in policy, advocacy and development of new models of care
- involving patients and caregivers in the research process

Research at IMPACCT

As a leading international centre for collaborative research, our work is underpinned by a commitment to engaging community, improving quality and safety, and optimising dignity and function.

Our four key areas of research include:

- palliative care
- aged care
- cancer
- chronic care

Consumer engagement

We connect with the broader consumer community through our dedicated consumer representatives who volunteer their time to help ensure that our research considers consumer experiences and perspectives.
