

IMPACCT Trials Coordination Centre (ITCC)

About

The IMPACCT Trials Coordination Centre (ITCC) supports researchers to undertake high-quality clinical studies and/or clinical trial for drugs, non-pharmacological interventions and medical devices.

We offer expertise in moving a new drug, intervention, device or health service(s) intervention trial from concept to start up, conduct, completion, and dissemination/translation in collaboration with the research team, bringing specialist trial skills to ensure conduct of your study in compliance with Good Clinical Practice.

Services

We provide a range of trial-related services:

- new study design and development
- multi-site clinical trial coordination
- data management
- safety reporting
- site investigator manual development
- pharmacy manual development
- sourcing investigational medical product
- project management
- site research staff training
- recruitment assistance

Get in touch

If you have a trial idea, get in touch for a chat about how we can help your idea be realised.

We can help you prepare your idea for presentation at a workshop or committee for expert advice and feedback.

Trial ideas approved by the IMPACCT or Cancer Symptom Trials Group Scientific Advisory Committees will have the full support of the ITCC from idea development to clinical trial implementation.

Email us to request a meeting.
