

Are you a clinician treating patients with advanced cancer?

Let the IMPACCT Rapid Program help you provide the best possible standard of care.

What is the IMPACCT Rapid Program?

A series of international, multi-site, consecutive cohort, quality improvement studies investigating the harms and benefits of palliative medications and interventions in adult cancer patients.

Why get involved?

- ▶ Inform **best practice** symptom control in patients with advanced cancer.
- ▶ Involvement in **series decision and data collection** timepoints.
- ▶ Be a part of a wider **high output research group**
- ▶ Develop your **research skills** and capacity.
- ▶ Involvement in the **authorship** team and **publication of original research articles**.
- ▶ Build up your **Continuing Professional Development (CPD)** points.
- ▶ Help meet your facility **accreditation standards**.
- ▶ **Collaborate** with sites and other cancer clinicians **nationally and globally**.
