

# UTS Disclosure Log Entry – GIPA2024/04

Provided under s.25 of the NSW Government Information (Public Access) Act 2009.

---

## Decided:

5 August 2024

## Scope of request:

Information relating to (covering the period 1 January 2023-17 June 2024 inclusive):

1. Any current existing or future potential partnerships, arrangements, or relationships between UTS and Israel and/or universities in Israel, including student exchange programs, research collaborations or funding initiatives;
2. Any current existing or future potential partnerships, arrangements, or involvements between UTS and corporate entities that develop and/or manufacture weapons, military hardware or military software, including Thales, Lockheed Martin, Boeing, and BAE Systems.

*[The above points are restricted by point 3 below:]*

3. Any internal UTS reviews or discussions of such partnerships, arrangements or relationships specified in paragraph 1 and 2 above;
4. Any legal advice, formal or otherwise, that UTS has authored or received concerning the implications for universities in Australia of the interim orders issued by the International Court of Justice on 26 January 2024 or 28 March 2024 (or any future subsequent orders thereafter) in relation to the Application of the Convention on the Prevention and Punishment of the Crime of Genocide in the Gaza Strip (South Africa v. Israel) case; and
5. Any briefings to the Vice Chancellor and UTS Council concerning the above matters.

*I respectfully acknowledge the Traditional Owners of the land on which we work and learn, and pay respect to the First Nations Peoples and their elders, past, present and future.*

## UTS Country Engagement Summary: Israel

### Purpose

To provide key points about UTS's engagement in Israel.

### Partnerships

#### UTS partners in Israel

- UTS has one (1) partner in Israel: Technion - Israel Institute of Technology.
- Sponsored by the Faculty of Science, the relationship was established in 2010 under a MoU and Student Exchange agreement.
- The current MoU is valid to 2025 and SEA lapsed in March 2020.
- See Annex A for a full list of partners and activities.

### Student mobility

#### Global Mobility Programs

- **Global Exchange Programs:**

UTS does not have any active Exchange agreements with institutions in Israel.

Our agreement with Technion, Haifa ended in 2020, there was insufficient number of students to engage in an exchange. This agreement continues as a general Memorandum of Understanding to allow for academic and other collaborations.

- **Global Short Programs:**

Eight (8) UTS students have studied in Israel since 2019 on <sup>out of scope</sup> Program in Tel Aviv. Five (5) students took the program in-person in Summer 2019 with UTS support. Two (2) students studied the program virtually in Winter 2020, and one (1) student in 2022. There is sustained interest in the Innovation and Startup culture of Israel, and we hope to work with <sup>out of scope</sup> to continue engagement with this program, a key strength area of UTS.

- **Appetite to Develop further Exchange Agreement:**

Any new Global Exchange partner must be <sup>GIPA 3.1(3)</sup> and should offer a broad range of subject options in English.

UTS Global Mobility Programs' preference would be to work with a partner in <sup>GIPA 3.1(3)</sup> area, to readily ensure student safety, enable a diversity of experience and ensure exposure to the Innovation and Startup ecosystem of the country.

## Research and Faculty Engagement with Technion

- UTS Science has strong research connection with Technion. <sup>GIPA 3.1(2)</sup>

Technion Australia; which promotes and supports the work of Technion researchers and faculty members in Australia.

### Activities to date:

- Prof <sup>GIPA 3.1(2)</sup> also leads the SPARK program activity. This year, the SPARK Global meeting will take place at UTS with a major event to be held at NSW Parliament House. We expect several Israeli visitors for that meeting.
- Prof <sup>GIPA 3.1(2)</sup> teaches annually a 5-week course at Technion entitled 'Biomedical Innovation & Entrepreneurship' as well as 2-week international course of the same name where PhD students from UTS, Technion, <sup>out of scope</sup> gather in one of those countries.
- In 2017, UTS received one (1) visiting fellow (Professor <sup>GIPA 3.1(2)</sup>). She met with Professor <sup>GIPA 3.1(2)</sup>. They discussed various areas of potential collaboration including <sup>GIPA 3.1(3)</sup>.
- Technion Society Environmental Research seed funded <sup>GIPA 3.1(2)</sup> and <sup>GIPA 3.1(2)</sup>, UTS - with - Assoc Prot <sup>GIPA 3.1(2)</sup>, Technion, Associate Prof <sup>GIPA 3.1(2)</sup>, University of Haifa-Oranim – with <sup>GIPA 3.1(2)</sup>.
- UTS welcomed the Technion President, Professor Uri Sivan, and Ori Danieli, Executive Director International, in February 2020. Discussions were broad and no significant movement in the partnership resulted.

## Other Engagement with Israel

### Endeavour Leadership Grant 2019

- UTS won Endeavour Leadership Program Short Term program grant in 2019 round to support the mobility of up to ten (10) students to Israel on a short-term entrepreneurship program through a private provider <sup>out of scope</sup>, see notes above on the participation of eight students under UTS Global Short Programs (See above).
- Target cohorts for the <sup>out of scope</sup> program were FEIT, Science and School of Transdisciplinary Innovation (TDI) students.

### UTS Centre for Compassionate Conservation (CfCC)

- UTS academics Daniel Ramp and Arian Wallach are board members of Compassionate Conservation Middle East (CCME) (a satellite body of the Centre for Compassionate Conservation (CfCC), based at Tel Aviv University. An MOU is under discussion.
- UTS CfCC sponsored research by Shanas, University of Haifa-Oranim <sup>GIPA 3.1(3)</sup>.

#### PhD Students

- UTS CfCC PhD student <sup>GIPA 3.1(2)</sup> [redacted] is currently doing his PhD at the Dead Sea and Arava Science Centre as part of the International Wolf Project (2 years of research).

#### Conferences

- In 2018, <sup>out of scope</sup> [redacted].
- In 2016, <sup>out of scope</sup> [redacted]

## International student recruitment

#### International students

- See **Annex B** for full details on international student numbers from Israel.

#### Agent network

- UTS has two recruitment agents that are permitted to operate in Israel
  - Campus Studies Ltd
  - IDP Education Limited

Professor Andrew Parfitt  
Vice-Chancellor & President  
University of Technology Sydney  
PO Box 123  
Ultimo NSW 2007

Dear Professor Parfitt,

Thank you for the warm reception and informative discussion during my visit to UTS on the 3<sup>rd</sup> of May. It was very insightful to meet with members of the leadership team. I must add that particularly enjoyed the tour of your vibrant and remarkable campus, conducted by Elvira.

I was pleased to hear that we share the same perspective on practical cooperation between institutions, and that for such initiatives to be truly meaningful, they should extend beyond mere agreements on paper.

Following my visit and our discussions, I believe there is fertile ground for collaboration between a number of Israeli institutions and UTS. This is especially true in the fields of Quantum Science, Artificial Intelligence, Space Science, and Cyber Security.

Thank you for your gift of the elegant tie designed by Marcella East. I am most intrigued by the Think Positive Design competition and its place in the academic syllabus. I would like to enquire whether it is possible to arrange a similar textile design competition, centred on the theme of 75 years of bilateral relations between Israel and Australia, in 2024? If you are positively disposed to this idea, I would be most grateful if you would nominate a point of contact with whom the Embassy could communicate in this regard.

Finally, I was happy to learn of Professor <sup>GIPA s.3.1(2)</sup> [REDACTED] forthcoming visit to UTS and, as noted, I would be glad to call on you again during his stay.

Yours sincerely,

<sup>GIPA s.3.1(2)</sup> [REDACTED]

Amir Maimon [REDACTED]

Ambassador

[image002.jpg](#)

---

Hi everyone

I've included below a current overview of the majority of our defence related industry engagements. We have MoUs with most of these organisations who might be targets of concerned students and protestors. There may be additional engagements that I'm not across but I think this is the majority of them.

- Thales – strategic partner of UTS – 20 year relationship with FEIT now whole of UTS partner – operationalisation phase looking at talent, R&D, EL and supply chain support through SME@UTS
- BAE Systems – prospect being cultivated – key contact is Chief Data & Information Officer who is a UTS alumnus (has visited Tech Lab and visiting the Vault in early May)

- out of scope 

- GIPA s.3.1 (3)  with SAAB led by GIPA 3.1(3) 
- Defence based partnership – UTS & Navantia – [Marintec](#)
- out of scope 
- [UTS Tech Lab](#) – key UTS infrastructure with defence/space focus area
- out of scope 
- UTS Vault
- Defence supply chain support:
  - In terms of supporting growth of the SMEs within defence supply chain, UTS has the NSW exclusive licence for [Futuremap](#) (business diagnostic tool created by the IMCRC– developed specifically for manufacturing SMEs to support the adoption of Industry 4.0 technologies and processes) along with our holistic SME engagement program, [SME@UTS](#).
  - SME@UTS and Thales recently hosted a futuremap workshop for their top 15 SMEs
- In terms of the UTS Defence & Space Research Engagement Group led by Murray Dickson (cresearch office), we have a range of project opportunities connected to the below organisations:
  - out of scope , SmartSat CRC and Advanced Navigation (Tech Lab co-located)

Regards

Glenn

Hi William

It's lovely to hear from you. I hope you had a fantastic start in 2024!

Thanks so much for sharing this great opportunity. I noted your Talent Acquisition Lead Emine Ildirar has posted this grad role on [UTS CareerHub](#). All our last-year students and recent grads should be able to see it now. The UTS Careers team ([industry@uts.edu.au](mailto:industry@uts.edu.au)) will promote it via their graduate channels.

I will also liaise with more faculty colleagues to distribute it to relevant students. I'm including Emine to let her know.

@Emine, feel free to contact me if there's anything I can help more.

William, thank you once again for your support of our students! I look forward to hearing more from you about the intern roles for Marintec.

Cheers

Loletta

**Subject:** [EXTERNAL] Innovation and R&D Graduate roles at Navantia Australia/Marintec

Hi Loletta,

Good afternoon.

I thought this might be of interest. We have open positions for Innovation and R&D graduate roles with a preference for UTS students at Navantia Australia/Marintec.

<https://www.seek.com.au/job/73513339?ref=search-standalone&type=standout#sol=352efe08580dab56e0bf13436857f16ac3b37a7d>

I will also let you know possibly mid-year when we may also hire interns for Marintec.

Please let me know if there are concerns.

Thanks and kind regards,  
William

[Management response to Ethical partnerships and Philanthropic Donors.docx](#)

Dear Andrew and Vicki,

I wanted to mention the SCLG meeting at ULT tomorrow and give an update if there is room on the agenda. I have now received this from Mia on behalf of UTSSA. My verbal undertaking to her last night was to feed back the students' concerns (mostly hers but supported by others) and let her know what the response was from ULT, if anything.

She has formalised pretty much what she said last night in the attached letter with a requested response date of 12 June.

FYI and to consolidate, I have attached the original paper and the management response for context. There was another broadly related paper on academic freedom and freedom of expression referred to GSU for clarification. I think the concern is what students might say in relation to this issue that might put them on the wrong side of our student misconduct rules. Happy to discuss before ULT tomorrow.

All the best

Kylie

I acknowledge the Gadigal people of the Eora nation and the Boorooberongal People of the Dharug Nation where UTS now stands. I pay my respects to the Elders past, present and emerging, acknowledging them as the traditional custodians of knowledge for this place. Always was, always will be, Aboriginal land.

**DOCUMENT X.X****UNIVERSITY OF TECHNOLOGY SYDNEY****STUDENT/COUNCIL LIAISON GROUP****AGENDA ITEM X.X****MEETING 24/2****PROF KYLIE READMAN****4 JUNE 2024****DEPUTY VICE-CHANCELLOR (EDUCATION AND STUDENTS)****MANAGEMENT RESPONSE TO ETHICAL PARTNERSHIPS AND  
PHILANTHROPIC DONORS PAPER****Purpose**

The university to respond to the paper 'Ethical Partnerships and Philanthropic Donors' tabled at Student/Council Liaison Group (SCLG) on 5 March 2024 by UTSSA President.

**Executive Summary**

In response, this paper provides a comprehensive overview of the university's approach to establishing and maintaining ethical partnerships and philanthropic donors, in alignment with its core values of excellence, integrity, respect, and diversity. It also explains how the university safeguards academic freedom and autonomy, and complies with the relevant laws and regulations, when engaging with external collaborators.

**Recommendations**

To receive and note the report as detailed in Document *X.X – Management response to Ethical Partnerships and Philanthropic Donors paper*.

**Background**

The Ethical Partnerships and Philanthropic Donors paper was submitted to the first SCLG meeting in March 2024. As a result, an action 24/1-4 has been recorded that the paper is to be referred to the Vice-President (Advancement) and Deputy Vice-Chancellor (Research) for consideration. The Deputy Vice-Chancellor (Education and Students) agreed to coordinate the management response to the paper and the matters it addresses prior to or at the second meeting of the SCLG in 2024. The second meeting has been scheduled for Tuesday, 4 June 2024.

**Partners selection at UTS**

When choosing partners, the university exercises careful judgment, taking into consideration various factors such as its core values – excellence, innovation, entrepreneurship and social justice, alongside the academic freedom of individuals

encoded in the Higher Education Standards and several other regulatory standards by which we must abide, all supported by thorough due diligence processes.

Individual academics or research groups often play a role in selecting partners or chose to participate in specific projects. Each partnership is evaluated individually, taking into account its unique circumstances and context. As outlined in the [UTS Academic Freedom and Freedom of Expression Policy](#), academic freedom means the:

- freedom of academic staff to teach, discuss, and research and to disseminate and publish the results of their research without restriction by established scholarly consensus or institutional policy, but subject to scholarly standards
- freedom of academic staff and students to engage in intellectual inquiry, to express their opinions and beliefs, and to contribute to public debate, in relation to their subjects of study and research
- freedom of academic staff and students to express their opinions in relation to the higher education provider in which they work or are enrolled free from institutional censorship or sanction
- freedom of academic staff to participate in professional or representative academic bodies
- freedom of students to participate in student societies and associations
- autonomy of the higher education provider in relation to the choice of academic courses and offerings, the ways in which they are taught and the choices of research activities and the ways in which they are conducted.

The university recognises that some partnerships may involve complex ethical, social, or political issues, and that there may be differing perspectives on the benefits and risks. Therefore, the university strives to make informed and balanced decisions, considering the potential impacts on its reputation, values, and stakeholders against the benefits to the university and its constituent groups. Once the partnership has been established, partnerships are closely monitored to ensure compliance and responsible engagement.

When dealing with defence or military applications, the university adheres to Australia's Defence Export Controls, and Foreign Interference and Foreign Arrangements legislation to protect Australian Defence expertise. Universities play a key role in most countries' national security and some of the partnerships in question reflect that commitment.

The university's due diligence and approval processes for partnerships reside in the area responsible for the type of collaboration such as the Divisions of Research or Operations or Enterprise or the portfolio of Advancement. These processes follow established policies and procedures:

### ***Research Division***

Since 1995, UTS has maintained a policy against accepting research funding from the tobacco industry due to the accepted health risks of smoking. In September 2020, however, the university decided to move away from a prescriptive approach. Instead, it developed principles and guidelines, empowering individuals and teams to make their own decisions regarding research funding. This approach aligns with UTS values,

academic freedom, and social justice. However, it does not imply unconditional support for all research; appropriate governance processes must still be followed. Compliance with all required research, security and ethics requirements is a threshold already in place.

The university provides guidelines to assist researchers in decision-making about research funding. These guidelines are not mandatory but offer essential considerations. They do not replace existing governance mechanisms outlined in the [UTS Research Policy](#). If there is any misalignment between these guidelines and formal instruments (such as policies or agreements), the latter takes precedence.

The acceptance of research funding is guided by several key principles:

1. Alignment: Funding should support research activities aligned with UTS's values and strategic objectives.
2. Transparency: Funding sources must be transparent and legally obtained.
3. Ethical Adherence: Funding arrangements should adhere to research ethics, academic freedom, and relevant internal policies and legislation.

In all research agreements, whether they are with government, communities, or industry, national or international, how information will be shared is agreed in advance. This is particularly the case for contracts that include financial support. Additionally, it is important to note that most research findings are made available within the public domain.

### ***Enterprise Division***

The Partnerships Unit within the Enterprise Division is responsible for the exploration, development, execution, and management of the university's strategic partnerships.

Strategic partnership criteria:

- align goals between partners.
- deliver shared and measurable (financial or non-financial) benefits to students/graduates, researchers, learners in the workforce and wider community.
- leverage domain expertise across the university.

Any potential strategic partnership is assessed on benefits and risks through an opportunity assessment in accordance with the Risk Management Framework, [Policy](#) and Procedure. UTS's Risk Management Framework is consistent with the International Standard ISO 3100:2018.

Partnerships that cover areas of critical technology where guidelines are provided by relevant Federal Government Departments will have more scrutiny imposed on them than other agreements, due to the higher associated risks.

A strategic partnership agreement typically sets the framework and governance model and concurrently both parties agree to a standardised research agreement. The

standardised research agreement includes standard terms around intellectual property to expedite future research collaborations.

Strategic partnership agreements are non-binding agreements that have no financial or procurement obligations. Revenue generation is an output that would be actioned under a separate contract usually through the Research Office, Enterprise Learning Unit or Property Unit for commercial leasing.

All strategic partnership agreements executed and managed by the Partnerships Unit are with Australian organisations. No international engagement is stipulated in these agreements. Any partnership agreements are reviewed by UTS Legal prior to their execution in accordance with the UTS Delegations.

### ***Advancement Portfolio***

UTS Advancement is responsible for the management and coordination of the university's fundraising and engagement activities, guided by the [UTS Philanthropic Fundraising Policy](#) and associated procedures. They are the subject matter experts on the university's fundraising and engagement relationship activities and hold UTS delegation for soliciting and accepting philanthropic donations for approved fundraising priorities.

The university engages with donors and prospective donors to support delivery of its strategic goals in key areas such as teaching, learning, research, student support and the enhancement of the campus buildings and equipment for the benefit of students and staff and ultimately society.

Opportunities for donor funded support are a result of either: Advancement solicitation; UTS staff referrals; or an approach by a donor to UTS.

UTS assesses each opportunity and accepts donations based on their alignment with the university's policies and values, and ensuring there is no potential impact on reputational risk.

An Opportunity Assessment and Due Diligence Framework and an Opportunity Assessment and Due Diligence Procedure guide staff in preparing an assessment of an opportunity.

The Opportunity Assessment and Due Diligence Procedure provides the necessary guidelines for reviewing potential gifts ensuring adequate assessment and due diligence is undertaken in deciding whether to proceed with a philanthropic gift opportunity. In determining reputational risk, other harm and/or misalignment to the university, the Opportunity Assessment and Due Diligence Procedure assesses the following:

- Proposed conditions or outcomes imposed by the prospective donor that could lead to a conflict of interest with the ethics, objectives, and principles of UTS.
- Media profile of the potential donor, and associated entities

- Potential donor actions in managing and mitigating specific risks of modern slavery, in accordance with the Modern Slavery Act 2018 (NSW)
- Court matters, judgements, tribunal decisions, where available
- Activities potentially subject to Defence Trade Controls
- Existing and/or past relationship with UTS of the donor.

Due Diligence of a prospective donor is required for opportunities with a risk rating that is classified as medium and or high/critical risk, this may be sourced externally. The Chief Advancement Officer reviews all assessments and due diligence and may escalate to university leadership for further consultation if deemed necessary.

Donors are stewarded for their donation and may require a re-assessment at any time if events or information indicates the need, or if they are intending to make another donation to the university.

### ***Operations Division***

The university's supply chain is diverse and complex, incorporating hundreds of products and services required to support the university's operations including infrastructure construction and maintenance, administration, academic programs, and research. The UTS supply chain includes procurement required to support university operations in teaching, learning, research, and professional support services, as well as downstream partners.

The university, as a member of the Australian University Procurement Network (AUPN) and the Modern Slavery Risk Review Subcommittee, actively collaborates with other universities to address modern slavery in supply chains. These collaborations provide a vital platform to converge, exchange strategies and best practices and collectively address challenges related to modern slavery.

Forced Labour Risk Determination and Mitigation (FRDM) and the Anti-Slavery Dashboards, developed in partnerships with the AUPN, are tools UTS uses to identify modern slavery risks in supply chain. The Anti-Slavery Dashboards offers insights by leveraging supplier risk modelling, drawing on data from The Global Slavery Index and the Guidance on Reasonable Steps issued by NSW Anti-Slavery Commissioner.

Across the sector over 89,600 suppliers have been evaluated on modern slavery risks, categorising them based on factors such as country, category and spend risk. UTS has profiled 100% of its total supplier database, encompassing 3890 suppliers.

The university has replaced the Code of Practice for Procurement with a new, legally binding, Supplier Code of Conduct. The Supplier Code of Conduct incorporates a dedicated section outlining expectations regarding labour and human rights, along with the implications for non-compliance. This code serves as a foundational framework to ensure ethical practices across our supply chain. UTS updated and published new Standard Terms emphasising supplier's adherence to the Supplier Code of Conduct. These revised terms have been integrated into all new contract templates, aligning with [UTS Procurement Policy](#).

Furthermore, an e-training module focused on Procurement and Purchasing has been launched across the university, primarily targeting managers and supervisors involved in tendering activities. This module underscores our social and environmental responsibilities, particularly in Modern Slavery Prevention. It provides guidance and recommendations on reducing the risks of modern slavery when procuring goods and services.

Strategic Procurement currently has a few initiatives underway focused on enhancing governance and due diligence practices such as strengthening category management to bolster the ability to provide robust support to critical categories such as IT, Property Services, and Recruitment. This aims to optimise our procurement strategies, drive greater value, mitigate risks, and ensure compliance with procurement policy, procedures, and organisational ethical and social responsibilities.

### **Implementation/Referral**

The university does not unilaterally ban or compel staff to engage in partnerships with countries, governments, or companies. Instead, each project is evaluated on its own merits, guided by the principle of academic freedom. This principle upholds the right of academic staff to research, teach and engage in projects with organisations where it is permitted by law. The university is committed to adhering to the highest standards in research, security, and ethics, contributing to national security through some of its collaborations.

While recognising that not all students or staff may agree with every partnership or its perceived benefits, the university believes it has a responsibility to thoroughly evaluate each collaboration. This evaluation considers the unique circumstances and context of each case, ensuring that decisions are balanced and well-considered.

Given the concerns raised in the original paper, this management response will be discussed at the upcoming SCLG. Following the discussion, both the original paper and this response will be circulated among the University Leadership team for review and to determine any further actions needed.

Further, the UTSSA President has requested that, given the significant student interest in UTS' response to this paper, that UTSSA receive a response from management by June 20th. The response will also be sent to the President UTSSA to enable confidential discussion among the SRC members.

## **RESPONSE TO UTS MANAGEMENT 5/6/24**

The UTSSA is extremely disappointed with the written response given by UTS Management on 28 May 2024 to the paper 'Ethical Partnerships and Philanthropic Donors', tabled at the Student/Council Liaison Group on 5 March 2024 by the UTSSA President, Mia Campbell.

The paper 'Ethical Partnerships and Philanthropic Donors' proposed that UTS:

1. Complete a full review of all listed partnerships and donors; and
2. Review the processes under the Philanthropic Fundraising Policy to determine if these are adequately capturing unethical or controversial partnerships and fundraising activities.

This paper specifically listed UTS's partnerships with Thales and Lockheed Martin and detailed how these companies are accused of engaging in numerous violations of international law in Palestine. The paper directly stated that "UTS currently partners with, and accepts donations from, various entities that have been linked to violations of fundamental human rights or international law. Many current partnerships appear to go beyond the scope of Section 3.3 of the Philanthropic Fundraising Policy, such as the university's partnerships with Thales, Lockheed Martin and Amazon."

In contrast, the response provided by UTS Management contains little to no information not already publicly accessible on UTS's website. This paper completely avoids any mention of the violations of international law in Gaza and the West Bank, or any of the partnerships and donors that the UTSSA's paper specified. As a 'response', the paper does not address the key concern detailed in the UTSSA's paper: that UTS' policies for managing partnerships ultimately do not serve as a barrier to disallow partnerships that are unquestionably unethical.

UTS Management's response includes excerpts from publicly available policies that mention terms like 'ethical adherence' and 'social justice'. However, the response fails to address the core issue: despite the existence of these policies, they are ineffective in practice if they do not prevent partnerships with entities involved in the most unethical and unjust breaches of international law. By merely summarising the existing policies without explaining how these policies have allowed such partnerships, UTS Management reinforces the UTSSA's conviction that UTS's policies enable partnerships and donors that contravene the university's stated strategies and values, the *UN Guiding Principles on Business & Human Rights*, and numerous judgments by international courts, including the International Court of Justice and the International Criminal Court.

UTS Management claims that UTS “strives to make informed and balanced decisions, considering the potential impacts on its reputation, values, and stakeholders against the benefits to the university and its constituent groups.” To this, the UTSSA asks: what possible benefit could weapons manufacturers be offering UTS that would justify the ethical compromise of partnering with companies that are actively contributing to the well-documented deaths of 35,000 people – a number that continues to rise as this paper is read?

The UTSSA submitted its paper in good faith, expecting UTS to address its concerns and proposals within a professional context, given the prominence of this issue on local, national, and international stages. We find ourselves at a pivotal moment where there is no question that unjust, immoral, and inhumane actions are occurring in Palestine. While we recognise that it is not UTS's responsibility to resolve this crisis, we believe UTS has a duty to ensure its own practices and partnerships adhere to ethical standards and contribute positively to social justice. The response from UTS Management, which despite taking nearly three months fails to address the clearly outlined concerns in the UTSSA's paper, does not reciprocate the good faith in which the UTSSA's paper was submitted. Having now unsuccessfully attempted to have this concern addressed through official chains of communication, the UTSSA will begin its public campaign for UTS to:

1. Stop accepting or seeking research funding or partnerships in any form from companies engaged in weapons manufacturing.
2. Provide complete disclosure and divestment from all relationships between UTS and Israel.
3. Publicly call for an immediate and permanent ceasefire, and condemn the Israeli government's occupation, apartheid and genocide in Palestine.

Sincerely,

**Mia Campbell**

AGENDA ITEM X.X

MEETING 24/1

MIA CAMPBELL

5 MARCH 2024

PRESIDENT OF UTS STUDENTS' ASSOCIATION

**ETHICAL PARTNERSHIPS AND PHILANTHROPIC DONORS****Purpose**

To raise issue regarding UTS' current processes for developing partnerships and accepting donations, and to inquire into the ethical considerations made throughout these processes.

**Executive Summary**

In line with the Philanthropic Fundraising Policy, UTS must conduct fundraising activities 'ethically' and 'in line with the university's strategy, values and policies'. By partnering with and accepting donors that are complicit or actively participating in violations of fundamental human rights and international law, UTS breaches this policy. These actions also fail to comply with the commitment of the 2027 Strategy to 'social justice' and ensuring a 'just and equitable society' through 'research, our graduates and our engagement in public debates.'

Further, increasing staff and student awareness of these partnerships will put UTS into a position of significant reputational risk, both from the partnerships themselves and from their lack of compliance with UTS' policies.

**Recommendations**

Student/Council Liaison Group to:

- .1 receive and note the report as detailed in Document X.X – *Ethical Partnerships and Philanthropic Donors*.
- .2 refer the report to the Deputy Vice-Chancellor for further response at SCLG 24/2 or sooner as detailed in Document X.X – *Ethical Partnerships and Philanthropic Donors*.
- .3 refer the report to the Vice-President (Advancement) for further response and advice as detailed in Document X.X – *Ethical Partnerships and Philanthropic Donors*.

## Background

Currently, UTS must conduct fundraising activities in line with the Philanthropic Fundraising Policy. Section 3.3 of the Philanthropic Fundraising Policy requires that fundraising activities be conducted ethically and in line with the university's strategy, values and policies. Section 4.5 of the Philanthropic Fundraising Policy provides that the assessment of all prospective donors must incorporate the management of reputational and modern slavery risks.

The 2027 Strategy lists as one of its strategic initiatives a commitment to 'Sustainable Partnerships', and states that by 2024, UTS will have 'put in place a new framework that supports how we manage relationships across UTS'. The 2027 Strategy further commits to 'social justice' and ensuring a 'just and equitable society' through 'research, our graduates and our engagement in public debates.'

## Current Situation

UTS currently partners with, and accepts donations from, various entities that have been linked to violations of fundamental human rights or international law. Many current partnerships appear to go beyond the scope of Section 3.3 of the Philanthropic Fundraising Policy, such as the university's partnerships with Thales, Lockheed Martin and Amazon.

Some extracts from UTS' 2027 Strategy are as follows:

- Strategic Initiative: Sustainable Partnerships
  - "At UTS, we think that good relationships make the world go round. We see firsthand the advantages of mutually beneficial partnerships, from research collaborations to employment opportunities for graduates and **global collaborations that better society.**"
- Strategic Initiative: Our Distinctive Identity
  - "By 2024, we will be recognised for our positive social and environmental impact and commitment to technology that improves society, the planet and the professions."
- Social justice and accessibility
  - "UTS is a diverse and inclusive university committed to social justice and the economic, social and cultural prosperity of our community. Through our research, our graduates and our engagement in public debates, we aim to ensure a just and equitable society."

Some extracts of UTS' 'values' are as follows:

- "Deliver on our obligations to each other, our students, our partners and communities **while maintaining high standards and ethical behaviour.**"
  - Source: <https://www.uts.edu.au/about/uts-2027-strategy>
- "Social justice is core to UTS's DNA."

- Source: <https://www.uts.edu.au/partners-and-community/initiatives/social-justice-uts/centre-social-justice-inclusion>

A few examples of UTS partnerships and donors are as follows:

- **Thales:** Thales is a continuing donor of UTS. As of August 2023, UTS and Thales Australia have signed a university-wide Memorandum of Understanding (MoU) to increase the impact of collaboration between the two organisations. Thales is one of the world's largest weapons manufacturers, and currently supplies Israel with missiles, propellants, materials for fighter jets, as well as radars and electronic warfare systems. Thales is also a partner of Elbit Systems, Israel's largest private arms company. Products designed and manufactured by Thales are currently being used in occupied Palestinian territory in what the International Court of Justice has determined to be plausibly genocidal action.
- **Lockheed Martin:** UTS researchers are currently engaged in a collaborative project with Lockheed Martin titled 'Brain and machine in Perfect Union'. Weapons systems designed and manufactured by Lockheed Martin are currently being used in occupied Palestinian territory in what the International Court of Justice has determined to be plausibly genocidal action.

- out of scope  
[Redacted]
- out of scope  
[Redacted]

These partnerships, amongst others, raise questions as to the practical application of section 3.3 of the Philanthropic Fundraising Policy. These partnerships further raise questions as to UTS' compliance with the UN [Guiding Principles on Business & Human Rights](#) in relation to responsibility of corporate entities to 'avoid causing or contributing to adverse human rights impacts through their own activities' and also to 'seek to prevent or mitigate adverse human rights impacts that are directly linked to their operations, products or services **by their business relationships**, even if they have not contributed to those impacts' (Principle 13).

Engaging in partnerships which do not align with UTS' strategies, values and policies raises significant risk for UTS. As a university known for our global impact and commitment to social justice, the public perception and reputation of UTS is likely to be damaged if its partnerships and donors are contrary to the university's beliefs and values. This risk will significantly increase if greater awareness and advocacy is realised by students, staff, alumni and our broader UTS community. By partnering and accepting donations from the organisations identified above, UTS also risks jeopardising support from other UTS donors which are firmly against their practices, such as Accounting for Good, the NSW Nurses and Midwives' Association and The Centre for Volunteering.

Specifically in relation to UTS' partnership with Thales and Lockheed Martin, a growing body of UTS academics, students and other staff have already called upon UTS in this [open letter](#) to engage in a complete review of all relationships between UTS and entities connected to Israel. In response to previous enquiries into controversial partnerships, UTS [has relied](#) on the fact that 'we are not aware of any international law violations.' The recent judgment of the International Court of Justice in *Application of the Convention on the Prevention and Punishment of the Crime of Genocide in the Gaza Strip (South Africa v. Israel) (Provisional Measures) (26 Jan 2024)* demonstrates that this can no longer be easily maintained and puts states and corporate entities on notice of plausible serious human rights violations. The continuous campaign against RMIT's partnership with Israeli's largest weapons manufacturer Elbit Systems attracted significant media attention to RMIT last year, leading to the university releasing a public statement in which it stated that its partnership with Elbit Systems had ceased. Based on the representations received from students, there is significant pressure for the university to undertake a review of this partnership and concern that a similar campaign may be instigated at UTS which the UTS Students' Association is prepared to support.

## **Proposal**

UTS should complete a full review of all listed partnerships and donors. UTS should also review the processes under the Philanthropic Fundraising Policy to determine if it is adequately capturing unethical or controversial partnerships and fundraising activities that may cause significant risk for the university.

## **Implementation / Referral**

It is proposed that this paper be summarised for the awareness of UTS Council. This paper recommends a referral to the Deputy Vice-Chancellor (Education and Students) for formal response to SCLG 24/2 or sooner to the UTS Students' Association and shared with SCLG members. This paper also recommends a referral to the Vice-President (Advancement) for a comprehensive response to the concerns detailed above.

## Highlights/summary

### Overview

Australia and Israel share a close relationship with significant people-to-people links and broad commercial engagement. Australia established diplomatic relations with Israel in 1949. Israel has a technologically advanced market economy with substantial, though diminishing, government participation. Israel's economy had been growing continuously for over 15 years until 2020, and its economy rebounded quickly in 2021.

[www.dfat.gov.au/israel/israel-country-brief](http://www.dfat.gov.au/israel/israel-country-brief).

There is significant foreign investment in Israel to take advantage of Israel's uniquely skilled, highly educated workforce, and innovative R&D capabilities. This includes the establishment of R&D centres, subsidiaries, and production lines including top international companies, (Intel, Microsoft, Motorola, Google, Applied Materials, HP, Deutsche Telekom, and Samsung, among others. Australian companies with a strong presence include Cochlear Earplants and Toll energy.

Australia's interest in Israel has influenced two-way investment and interest of the Australian Stock Exchange (ASX). Seventeen Israeli companies are listed on the ASX, as a desirable alternative to NASDAQ.

Israel is at the forefront of technological advances in agriculture, water management, R&D, despite climatical and environmental challenges. They have great links with universities, venture capital, and a thriving start up scene. It's a highly educated and entrepreneurial nation, with world class universities and a commitment to innovation and scientific discovery.

## Future Opportunities

GIPA 3.1(3)

### International student recruitment

- UTS recruited one Israeli student in 2023.
- There is one alumnus listed as living in Israel and no alumni activity.
- UTS has two student recruitment agents authorised to recruit students from Israel:
  - Campus Studies Ltd
  - IDP Education Limited

### Notable recent visits

- Prof Michael Blumenstein visited Technion in December 2022 on behalf of Universities Australia.
- Ami Amon (Israeli ambassador) visited UTS in May 2023 and discussed potential collaboration between several Israeli institutions and UTS predominantly in Quantum Science, AI, Space Science and Cyber Security.

## Partnerships - Technion - Israel Institute of Technology

UTS has one (1) partner in Israel: Technion - Israel Institute of Technology

- Sponsored by the Faculty of Science, the relationship was established in 2010 with a MoU and Student Exchange Agreement (SEA).
- The SEA expired in 2020 and was not renewed.
- The MOU is due for renewal in 2025.

## Student mobility

### Global Exchange

#### Student Mobility program with Technion

This student exchange agreement has expired in 2020 and was not renewed.

GIPA 3.1(3)

## Scholarships

- Israeli students are eligible for 10 scholarship categories in 2024, including:
  - Alumni Advantage Program
  - Enrolled Nurse International Scholarship
  - International Baccalaureate (IB) Scholarship
  - Postgraduate Academic Excellence International Scholarship
  - Postgraduate Business Scholarship
  - Undergraduate Academic Excellence International Scholarship
  - UTS College to UTS Pathways Scholarship
  - UTS Foundation Studies Scholarship
  - Vice-Chancellor's International Postgraduate Coursework Scholarship
  - Vice-Chancellor's International Undergraduate Scholarship
- All are merit scholarships (based on academic merit) except the Alumni Advantage Program.
- UTS had two Israeli scholarship recipients in the past. out of scope

- See **Annex B** for further details

## Other

- **Endeavour Leadership Grant 2019**
  - UTS won Endeavour Leadership Program Short Term program grant in 2019 supporting ten (10) students participation in a short-term Entrepreneurship program through a private provider <sup>out of scope</sup>.
- **UTS Centre for Compassionate Conservation (CfCC)**
  - UTS academic <sup>GIPA 3.1(2)</sup> regularly collaborates with the Compassionate Conservation Middle East (CCME). CCME arose as a satellite body of the Centre for Compassionate Conservation (CfCC) and is based at Tel Aviv University.
  - UTS CfCC has sponsored research by Prof. <sup>GIPA 3.1(2)</sup>, University of Haifa-Oranim <sup>GIPA 3.1(3)</sup>.
- **PhD Student**
  - UTS CfCC PhD student <sup>GIPA 3.1(2)</sup> completed his PhD in 2016 at the Dead Sea and Arava Science Centre as part of the International Wolf Project (2 years of research).
  - UTS CfCC is collaborating with CCME on research on the use of guardian dogs to protect livestock in the Golan Heights.
  - Dr <sup>GIPA 3.1(2)</sup> is an advisor to a CCME student conducting research on jackals and wolves in the West Bank.
  - Prof <sup>GIPA 3.1(2)</sup> (The Technion, Haifa) was a Visiting Fellow with the CfCC 2017/2018.
  - Dr <sup>GIPA 3.1(2)</sup> has been a grant reviewer for the Israel Science Foundation.
- **Conferences**
  - In 2018, <sup>out of scope</sup>
  - In 2016, <sup>out of scope</sup>

Hi Loletta and Sofie,

Apologies for my late reply, I have been in back to back interviews all day.

Thank you for reaching out to me with all of the details.

I have popped our graduate role on your career hub site.

Please let me know if it worked all ok?

Kind regards,

---

**Subject:** CAUTION: External email - RE: Babcock Early Careers Programme

Hi Loletta, thanks for the connection.

Hi Babcock Team, if you are able to get it up on CareerHub today I can include it on our socials for this coming Friday and also add it to our CareerHub microsite.

If you have any questions please let me know. I can see that you have an account on CareerHub already so you will be able to post the job without having to create an account. My colleague Susie will then be able to review and approve the job.

Thanks,  
Sofie

Hi Talent Engagement Team

Thanks so much for your email.

Please help to register and advertise the Babcock Early Careers Programme on [UTS CareerHub](#). All employers' resources are on the [UTS Recruitment Portal](#). This way, all our students will be able to see it. If you let me know, I will help to promote it to our students.

I am copying my colleague Sofie Talevski who would be happy to help if you encounter any issues

regarding login or advertising. They will also help to promote via their student channels.

Thank you. We are excited to hear from you again soon.

Warm regards  
Loletta

**Subject:** [EXTERNAL] Babcock Early Careers Programme

Hi there,

It was our pleasure to present our Babcock Early Careers Programme at the Women in STEM events last week.

We are delighted to advise that our Graduate and Internship applications are now **OPEN**.

Please visit our careers page at [www.babcock.com.au/careers](http://www.babcock.com.au/careers) where you can learn more about opportunities with Babcock Australasia and how your careers is **#EngineeredToGrow**. Click on the 'Early Careers' button to learn more about the programmes available and apply directly.

Please note, applications for our next intake close on the 23<sup>rd</sup> of April 2023.

We look forward to receiving your application.

Kind regards,

The Babcock Talent Engagement Team

**Subject:** BAE Systems

Hi Glenn

As you know through my 1:1 updates, we've started to engage BAE Systems through Michael Salas (Chief Information & Digital Officer – UTS alumnus).

Most recently, Roger Kermod provided a tour of Tech Lab with further follow up conversations to come in March. Michael has said their greatest opportunities exist outside of Adelaide, with NSW and VIC where they are looking to expand/grow.

Andrew mentioned today in the external engagement review meeting he'd previously engaged with BAE Systems in Adelaide through his time at UniSA.

If it's ok with you, could I reach out via Sam for us to better understand his relationship with them to see if this is something we can leverage.

Many thanks

John

Hi Michael,

There is nothing unusual in this NDA. If we are sharing information, please note Clause 5 which sets out that written information should be clearly identified as confidential and if we are sharing any oral information then you need to follow up that disclosure in writing by confirming that the information shared was confidential.

Hope the discussions go well.

Regards,

Sandra

Hello, Dr. Bremner,

My name is Conner Dersch, I am a Procurement Agent at The Boeing Company. <sup>GIPA s.3.1 (3)</sup> recently contacted me regarding <sup>GIPA 3.1(3)</sup> and wanting to engage in discussions with the University of Technology Sydney. To allow each party to freely discuss this topic, we would like to put a Proprietary Information Agreement (PIA) in place between our two companies. Attached here is PIA 2024-2360 for UTS's review and signature. If all looks acceptable, can you please sign and return at your earliest convenience? I will then countersign and provide a fully executed copy.

If UTS would like to propose revisions to the PIA document, I have attached a Word copy here. Please make any changes to the document as redlines with the "track changes" option turned on, as well as a comment as to UTS's reasoning for the proposed change. This will aid Boeing Legal in their review of the document.

Thank you and we look forward to hearing from you,  
Conner

Hi Sandra,

Thank you for the below. No major issues identified, though it was noted that the non-Australian Universities listed (University of Ottawa, Newcastle University and Durham University) have active ongoing Pro-Palestinian protest encampments that are calling for the reduction/severing of institutional ties with Israel. While current news sources do not indicate that the relevant institutions will do this it is worth noting as one of the partners (Agriculture Research Organization - Volcani Institute (ARO)) is an Israeli state owned research institution.

If you need anything further please let us know.

Kind regards,

**Subject:** [EXTERNAL] JPI AMR: consortium agreement

Dear All,

Please find attached the first draft of the **JPIAMR – "TEXAS" project Consortium Agreement (CA)** for your review and comments. Please note:

1. The CA itself is in pdf format, we ask that you write any comments that you may have in the "modifications" document attached here.
2. Please make sure the name+address of your organization (as it appears in the first page of the CA) is correct, if not please write down your correct details in the modifications document.
3. Regarding the "Attachments to the CA" file (attached herein in WORD format), please take the following actions:
  - a. Attachment 1 – Background info - please fill in relevant details and choose between option 1 or 2, as explained in the attachment
  - b. Attachment 3 – "Identified entities under the same control" – if relevant, please complete (if no one does, we will delete the appropriate references in the CA).

**Please send us your comments by May 13th.**

After we receive everyone's comments we will send a chart complete with all the partner's comments so as to afford everyone the chance to review and raise any objection. Once that is settled, will amend the CA accordingly. Hopefully one round of comments will be enough here.

May thanks,

Sefi

**Subject:** Potential Boeing partnership discussion

Hi Sandra,

My team and I have been working with researchers at Boeing through a GIPA 3.1(3) project over the last couple of years. We've been talking with them about the possibility of continuing that collaboration via other potential Australian or US government funding programs. They've suggested that it might be a good idea to put in place a master agreement between Boeing and UTS, that would enable us to respond to some of these calls faster. It's often the case that there is a very short turnaround time on these calls and it may be convenient to have a ready-to-go agreement in these circumstances.

Would you be the right person to talk to? Boeing is interested in having their contracts people reach out to discuss what it might look like and what might potentially work and if it actually would help.

Cheers, Michael

---

Hi Tania

Me again. Please sign the attached NDA from SAAB to facilitate deeper discussions with them on

GIPA s.3.1 (3) / (4)

. SAAB is one of the top Defence Primes globally, as I am sure you are aware. I met them at Indo Pac and again at Land Forces and have finally hit the right product research team there. These bid Defence events are invaluable/priceless for BD, it's just things move very slowly in this industry.

Not urgent, but if possible to have by Friday would be *nice*.

Cheers - Murray

**UNIVERSITY OF TECHNOLOGY SYDNEY**  
**PROTOCOL FOR THE EXECUTION OF DOCUMENTS**

***You must complete this Protocol & the Document Process Checklist and attach it to any recommendation to a delegate to sign a document under the Standing (or other) Delegations. You need to complete these for all contracts, agreements, deeds, letters or any other documents creating legally binding relationships where the value exceeds your delegated authority.***

*Pages 1 - 3 relate to the key features of the transaction in the document to be signed and will help you complete the checklist on page 4. Page 4 (the Document Process Checklist) provides a pre-completion checklist, which must be completed before a delegate can sign a document on behalf of UTS.*

***Please read the footnotes pointing you to further helpful websites and/or the UTS Legal Services website.***

<p>1. Briefly summarise the transaction being recommended for execution</p>	<p>RES23/128</p> <p>Type of Agreement: NDA</p> <p>Project: <small>GIPA s.3.1 (3) / (4)</small></p> <p>CI/Faculty: <small>GIPA 3.1(3) / (4)</small></p>
<p>2. List the documents to be executed, including the parties and the method of execution <sup>1</sup></p>	<p>NDA for discussions with Saab about <small>GIPA 3.1(3) / (4)</small></p>
<p>3. Outline the risks and benefits for the University of entering into the transaction including relative to other options considered</p>	<p>Low Risk/Standard Research</p> <p>Benefits: TBD</p>
<p>4. Indicate the University's commitment in dollar value, in-kind, and contingent liability and whether these amounts are within budget <sup>2</sup></p>	<p>Cash: Faculty:\$ 0</p> <p>CRB\$ 0</p> <p>InKind:\$ 0</p>
<p>5. Does the contract have a total or cumulative value equal to or greater than \$150k? <sup>3</sup></p> <p><u><i>If yes, you must answer question 6. If no, go straight to question 8</i></u></p>	<p>No</p>
<p>6. Does the transaction involve a contract between UTS and a private sector entity to provide services to the public?</p> <p>6A. <b>GIPA</b> : Is the contract with a government institution or body outside NSW and with a contract value of over \$150k (where the value is the cash plus the in-kind contributions of all parties, not just how much is coming to UTS).</p>	<p>No</p> <p>No</p>
<p>7. If the transaction involves a contract between UTS and a private sector entity under which the contractor is required to provide services to the public on behalf of UTS for \$150k or more cumulatively, you must enter onto the UTS Register of contracts <sup>4</sup></p> <p>a) Please provide details of the services under the contract</p> <p>b) Are there grounds to black out parts of the contract before it is placed on the UTS Register of contracts? <sup>5</sup></p>	<p>No</p>

<sup>1</sup> For example, does the document need to be witnessed or is it under seal?

<sup>2</sup> Where there are resource implications for faculties or divisions other than the faculty/division recommending the execution of the document provide evidence of sign-off by those faculties/divisions.

<sup>3</sup> If cumulative contract value is \$150k or more you must complete the form for FSU referred to in the link below for inclusion in the Register of contracts which is publicly available as required by the Government Information (Public Access) Act NSW 2009 (GIPA).

<sup>4</sup> Contact UTS Legal Services if you need more information regarding whether services are "to the public".

<sup>5</sup> The form at <https://staff.uts.edu.au/search/pages/Results.aspx?k=gipa%20and%20register%20of%20contracts> referred to in 7(a) will help you to determine whether there are any grounds for not making public some of the information in the Register of contracts, particularly where there is any overriding public interest against disclosure of that matter.

<b>c) Refer to the clause number in the contract which gives UTS an immediate right of access to certain information held by the contractor.</b> <sup>6</sup>	
---	--

---

<sup>6</sup> Where there a private sector entity provides UTS with services to the public of \$150k or more, UTS is required to include a clause providing a process for accessing information held by the contractor.

<p><b>8. <u>Compliance</u></b></p> <p>a) Are there any issues of compliance with legislation, UTS policies and/or guidelines?</p> <p>b) How will compliance be assured?</p>	None other than usual
<p><b>9. <u>Personal Properties Securities Register</u></b></p> <p>Have you:</p> <p>a) Searched the Personal Property Securities Register?</p> <p>b) Recorded UTS's interest on that Register? <sup>7</sup></p>	No – not relevant
<p><b>10. <u>Autonomous Sanctions</u></b></p> <p>Are the non-UTS parties to the transaction:</p> <p>a) Australian entities; or</p> <p>b) Australian citizens/permanent residents?</p> <p><u>If not:</u></p> <p>c) Have all relevant parties been searched against DFAT's Consolidated List <sup>8</sup>; and</p> <p>d) Are you satisfied that such parties are not <i>Designated Persons or Entities</i>?</p>	10a) Yes
<p><b>11. <u>UN Sanctions</u></b></p> <p>Does the transaction involve:</p> <p>a) A party based in a country that is currently subject to UN or Autonomous Sanctions, and/or</p> <p>b) Any sanctioned activities involving a country that is subject to UN or Autonomous Sanctions? <sup>9</sup></p> <p><u>If yes,</u></p> <p>c) Does the transaction comply with sanctions laws?</p>	11a) No 11b) No
<p><b>12. <u>Export control</u></b></p> <p>a) Does the transaction involve the export of defence or dual use items controlled under the Defence and Strategic Goods List (DSGL)?<sup>10</sup> or</p> <p>b) Could any exported goods, services or technology be used for military, chemical or nuclear weapons purposes?<sup>11</sup></p> <p><u>If yes,</u></p> <p>c) Have you obtained a permit or other authorisation?</p>	12a) No 12b) No
<p><b>13. <u>Legal review:</u></b></p> <p>a) Have you used a template contract approved by UTS Legal Services which is unchanged except for the Schedule to the contract you have completed? <sup>12</sup></p> <p>b) Has documentation been prepared or reviewed by UTS Legal Services?</p> <p>c) If UTS Legal Services has raised concerns, how have those concerns been addressed?</p>	13a) No 13b) the document is in line with UTS standard templates
	14a) N/A

<sup>7</sup> You can register UTS's interest at <https://www.afsa.gov.au/about-us/ppsr/personal-property-securities-register-ppsr>

<sup>8</sup> Download Consolidated List in Excel from <http://www.dfat.gov.au/sanctions/consolidated-list.html>. Go to Column 3 to select sort for Entity or Individual. Go to Column 2 to select sort for Names A-Z. Scroll down and search for any name matches against names of relevant parties. If there is a match, the person or entity

<p><b>14. <u>Due Diligence and Risk Assessment:</u></b></p> <p>a) Have you completed the relevant risk assessment and due diligence?</p> <p>b) Has relevant specialist advice such as tax, intellectual property, insurance and stamp duty advice been obtained?<sup>13</sup></p>	<p>14b) it is not necessary to obtain any specialist advice in this matter</p>
<p><b>15. <u>Consultation</u></b></p> <p>Please give details of your consultation process within UTS</p>	<p>Consultation has been as per usual course through Faculty/CI and RO</p>
<p><b>16. <u>Delegated Authority</u></b></p> <p>Who has delegated authority for the execution of the documents?<sup>14</sup></p>	<p>Director, RO per clause of the Delegations</p>
<p><b>17. Briefly outline the issues concerning implementation, monitoring or review?</b></p>	<p>None other than usual</p>
<p><b><u>Foreign Currency</u></b></p> <p>If the contract is for more than the equivalent AUD\$5,000,000 you must provide FSU with a copy of the contract for them to hedge the funds.</p>	<p>Applies –No</p> <p>Send a copy of the contract with instructions to hedge to Sharon.allen@uts.edu.au</p>
<p><b>18. To the best of my knowledge after making reasonable enquiries, I declare that neither I nor any of my Associates<sup>15</sup> have any private interests, including the following, which may conflict with my recommendation to you to sign the attached documentation:</b></p> <p>a) income or other financial benefit from any source e.g. other employment or consultancy</p> <p>b) appointments or offices whether paid or unpaid e.g. directorships</p> <p>c) interests in any trusts, shareholdings, unlisted companies, partnerships, investments or other financial or business interests</p> <p>d) obligations, expectations of reward or other interests arising from a contract, agreement or understanding</p> <p>e) any other potential, real or perceived conflict of interest (as set out in Clause 4.4. of the UTS Code of Conduct) relating to this document or the transaction more generally.</p> <p><b>I have made reasonable enquiries and I am not aware of any other person acting on behalf of UTS and involved with this transaction having a potential, real or perceived conflict of interest (as set out in Clause 4.4. of the UTS Code of Conduct) relating to this document or the transaction more generally.</b></p>	

is 'Designated' and UTS is prohibited from entering into an agreement with them. If there is a partial match, check against the other information fields provided by DFAT in the Consolidated List. For further information, refer to UTS Legal Services webpage at <http://www.legal.uts.edu.au/>

<sup>9</sup> For current UN and Autonomous Sanctions lists of sanctioned countries and details of sanctioned activities that apply to each country, refer to:

<http://www.dfat.gov.au/sanctions/sanctions-regimes/> and <http://www.dfat.gov.au/sanctions/osas.html> For further information, refer to UTS Legal Services webpage.

<sup>10</sup> Currently, under the *Customs Act 1901* and *Defence Trade Controls Act 2012* (and their respective Regulations) penalties only apply to exports of tangible or physical items controlled by the DSGL. For more information and/or link to DSGL refer to: [www.defence.gov.au/deco](http://www.defence.gov.au/deco) and <http://www.comlaw.gov.au/Details/F2013C00051>

<sup>11</sup> For further information, refer to UTS Legal Services webpage at <http://www.legal.uts.edu.au/>.

<sup>12</sup> Relevant advice should be attached.

<sup>13</sup> Please refer to the Risk assessment policy at <http://www.gsu.uts.edu.au/policies/risk-management-guidelines.html> In relation to insurance requirements please contact UTS Manager, Tax & Insurance.

When contracting with another entity you need to check that the entity actually exists, for example, for corporate entities, by checking the ABN Lookup on the ASIC website at <http://www.abr.business.gov.au/Search.aspx?SearchText=> UTS cannot transact with a business name. If the other party is a trust, please contact UTS Legal Services. Due diligence is NOT REQUIRED when purchasing products which UTS doesn't pay for until they are delivered and checked, unless the dollar value of the contract is large.

For other transactions and more detailed information about due diligence please check the UTS Legal Services website at <http://www.legal.uts.edu.au/>

<sup>14</sup> Cite relevant delegation or Council resolution

<sup>15</sup> 'Associate' means any of the following:

- your spouse, partner, parent, child, sibling, business partner or friend;
- the spouse, partner, parent, child, sibling, business partner or friend of a person referred to in a) above if that relationship is known to you;
- any other person who is known to you for reasons other than that person's connection with UTS or that person's public reputation.

<b>Signature of officer making recommendation</b>	GIPA 3.1(2) 
<b>Name of officer making recommendation &amp; Date</b>	<b>Murray Dickson 1 Feb 2023</b>

Following execution, the COMPLETION PROCESS and POST-COMPLETION PROCESS sections should be completed. The completed checklist and other relevant documents must be placed on an official file. The original document must be lodged with University Records as a vital record [<http://www.records.uts.edu.au/procedures/vital>].

Hi Andrew

FYI ... it doesn't look like Thales are going to be interested in relocating from Garden Island to Tech Lab at this stage.

Regards  
Glenn

Good morning Mr Wightwick

Apologies for the delayed response.

I've finally had the opportunity to review with GIPA 3.1(2) who confirmed that we've had some problems with the break costs/ contracts of our existing leases so won't be able to progress this as GIPA 3.1(2) had thought when he met you. GIPA 3.1(2) said he will explain in more detail when he next meets you.

Hoping this information assists.

Kind regards

GIPA 3.1(2)

Hi GIPA 3.1(2)

Thanks again for your support in making today's meeting possible between GIPA 3.1(2) and Andrew.

GIPA 3.1(2) mentioned to Andrew and Glenn he was keen to explore some opportunities connected to Garden Island.

Could you please help connect Glenn with <sup>GIPA 3.1(2)</sup> on this and will likely involve <sup>GIPA 3.1(2)</sup>.

Many thanks

John

Hi Michael

Ben Halkon from MME is applying for the application on the Defence Innovation Network's (DIN) Strategic Investment Initiative (SII) scheme. He has been discussing with multiple industry partners regarding the proposal. The contract team has reviewed and approved this non-UTS standard NDA.

Could you please sign attached document if you approve it?

Cheers

Peter

**Enter Outcome****Enter Outcome****Project Title** (maximum 200 characters)

Navantia Gamification Project Proposal

Was the proposal successful in being funded?

 Yes

The organisation unit code for this project request should be the organisation unit code of the Primary contact / 0.First named UTS chief investigator, if it is different, please assign the correct AOU.

FEIT.Engineering and IT Solutions - Rapido

Congratulations on receiving funding for your proposal! This form allows you to record changes to the project structure based on the amount of funding received. You will need to answer a few questions relating to ethics, health and safety and the type of research being undertaken.

**Review Previously Entered Info****Proposal Details****Have any of the following changed?** None of the above**Update this My Proposal record and ensure that the info in Costing & Pricing tool/spreadsheet is still appropriate.****Project Title** (maximum 200 characters)

Navantia Gamification Project Proposal

Project description (maximum 2000 characters)

To produce a Game Design Specification with an R&amp;D proposal for Gamified Training for remote multi-players using thin clients.

Success factors include:

1. GIPA s.3.1 (4)
2. GIPA s.3.1 (4)

The proposed gamification of training is to be based on engagement with Navantia staff who have a deep understanding of the context training in the navy, to inform:

1. The selection of the training story and naval procedures
2. Game mechanics that are congruent with naval culture and procedures
3. High impact visual and auditory characteristics of the 3D environment and game play.

Does any portion of this project utilise UTS Tech Lab?

 No**Select research type** Externally funded (grants, tender, contract research, scholarships)**Project type** do **NOT** leave it as "application", choose the relevant project type.

P: Contract Research

**Is UTS the administering organisation?**

If you have entered a fund scheme and you want to change this, you will need to remove the fund scheme first.

 Yes**External Application ID** (if applicable, e.g ARC, NHMRC, RMS No., etc)

Not Answered

**Estimated start date**

28/12/2022

**Estimated end date**

28/04/2023

**Any Comments**

Not Answered

This project is confidential and I do not wish to display it on UTS web pages. (If the confidentiality status changes (e.g. the project is made public by the funder) you can notify the Research Office so that can be published on relevant UTS web pages including your profile page.)

 Yes

**Export Controls – Please visit the [DTC Staff Connect page](#) if you are unsure how to answer the below question/s**

Does the transaction involve the export of defence or dual use items controlled under the Defence and Strategic Goods list (DSGL)?

 No
**Research Team**

**Include all the research team that is involved in the project**

Include all members of the project team If there is a student involved in this project and UTS is assigning the project intellectual property to the funder, you will need the student to sign a Student IP assignment agreement prior to their involvement in the project; you can request the agreement in ResearchMaster

How do I request it?

1. Click on My Agreement/IPs->My Agreement/IP requests
2. Click on Create new
3. Select 'Student IP Assignment' Template
4. Complete the form

If you have any questions regarding the student IP assignment agreement, please email [contractadvice@uts.edu.au](mailto:contractadvice@uts.edu.au)

## Engagement and Impact

### Engagement and Impact

UTS has committed through its [2027 Strategy](#) to deliver excellent research with impact and your proposal is your contribution to that commitment.

In this context impact is defined as 'the contribution that research makes to the economy, society, environment or culture, beyond the contribution to academic research'. It is often most efficiently achieved when researchers plan how they will engage with the external audiences who will use their research.

Which of the following summarises the degree of thinking about impact in your proposal?

- Planning for impact is built into my proposal

What is the intended impact for this project? Briefly summarise the impact if this research were to be adopted.

Improve GIPA s.3.1 (4) through immersive and gamified 3D environment leveraging advanced technology (Digital Twin, AI, Cloud Infrastructure).

What is the pathway to impact for this project? Briefly summarise your thinking on how adoption of this research will be achieved (you may be forecasting events well beyond the end date of this project).

Our Industry partner is responsible for the sustainment of Australian Navy ships which includes provision of suitable training. The result of our project will be delivered to our partner for continuing with subsequent phases of development towards deployment.

Do you want to track your research engagement activities for this project?

If yes is selected, a collaborative [Record of Impact in Symplectic](#) will be created for you and your team.

- Yes

To learn more about using [Record of Impact in Symplectic](#), and about Engagement and Impact generally enrol in the [RESHub Research Impact online module](#).

## Risk management and ethics approval

### Ethics, Data, Health and Safety

The UTS Guidelines for the Management of Research Data articulates how data should be managed. Research data management planning should be undertaken in the beginning stages of your research project, using Stash

**Data:** -- Will you be storing data for this project?

For assistance, the [Research Management Policy](#) and [Guidelines for Research data management](#) advise how data should be managed. If you have any questions please contact the eResearch team - [eResearch-it@uts.edu.au](mailto:eResearch-it@uts.edu.au)

- yes

Please complete your data management plan in the [eResearch stash tool](#).

For assistance with your data management plan, please contact eResearch at [eResearch-it@uts.edu.au](mailto:eResearch-it@uts.edu.au)

**Human ethics:**-- research involving human participants and/or use of their data (this may include questionnaires, interviews, information regarding organisations or that is considered commercial-in-confidence).

- Not applicable

**Clinical trial:** -- research that prospectively assigns human participants or groups of humans to one or more health-related interventions to evaluate the effects on health outcomes.

- Not applicable

**Animal ethics** -- research involving the care and use of animals.

Not applicable

**Biosafety:** -- research involving biological hazards such as genetically modified organisms (GMOs), pathogens, ionising radiation, cytotoxic substances and imported biological materials

Not applicable

**Health and Safety:** -- research involving health and safety risk, such as: hazardous chemicals, genetically modified organisms (GMOs), pathogenic microorganisms, radiation apparatus/sources, laboratory/workshop equipment, animals, fieldwork, work in healthcare setting or hazardous work environment.

no

## Classifications

### Research codes (FOR, SEO and TOA)

Research Classifications are important as they frame your research for a variety of audiences

Below are 3 frequently used classifications at UTS and in the Australian research sector. to find more information click [here](#).

- [Field of Research \(FOR\) codes](#) classify the disciplines in your research. They are an important part of the Excellence in Research in Australia (ERA) survey.
- [Socio-Economic Objective \(SEO\) codes](#) explain which part of the economy or part of society will benefit from the research. They are usually used when reflecting on the likely impact of research.
- [Types of Research and Development Activity \(TOA\) classification](#) breaks the research into four categories: Pure Basic, Strategic Basic, Applied, and Experimental. The allocated percentages must total 100%. The government uses this information to look at changes in the pattern of research that is occurring in different disciplines and regions.

#### Field of research (FOR)

1	<b>Classification Type</b>	Field Of Research Codes
	<b>FOR Code</b>	39
	<b>Percentage</b>	100
	<b>Primary FOR?</b>	Yes
		Not Answered

#### Socio economic objective code (SEO)

1	<b>SEO Type</b>	Socio-Economic Objective Codes
	<b>SEO Code</b>	14
	<b>Percentage</b>	100
	<b>Primary SEO?</b>	Yes
		Not Answered

**Type of activity (TOA)**, click on the "save" icon at the top right corner to show the total

Strategic Basic 0.00; Pure Basic 0.00; Experiment Dev 0.00; Applied 100.00; Total % 100.00

## Confirmation

### Confirmation by first named UTS chief investigator

The UTS Library of Successful Grants is intended to assist the UTS research community in the development of strong grant applications and is only accessible to UTS staff. Applications can be stored in full or in part in the UTS Library of Successful Grants and can be removed at your discretion – see policy. If 'Yes' is selected, the Research Office will contact the project leader to identify whether information needs to be removed from the application before it is included in the library. If your proposal is successful, do you consent for the Research Office to add a secure PDF of your successful application to the UTS Library of Successful Grants?

No

### As the first named UTS chief investigator, I confirm:

- data entered for this project is complete and accurate to the best of my knowledge
- I will comply with all relevant UTS policies and procedures
- all required approvals including [ethics](#), risk assessments and biosafety approvals (where required) will be obtained prior to the research commencing
- the budget complies with the [The Guidelines for research proposals and project management.](#)
- the funding section includes all requests for Faculty or Central Research Budget funding
- this project falls within the definition of "Research" in the [HERDC Specifications](#)

Conflicts of interest arise when persons are influenced, or appear to be influenced by personal interest when doing their job. Conflicts of interest of persons involved in the research project (the Project) may result in a lesser standard of independence than that required to maintain the integrity of the Project. In accordance with the [UTS Code of Conduct](#), Supervisors and Deans/Directors are responsible for taking action in relation to conflicts of interest that arise in their work areas.

#### I hereby declare the following:

- Any related interest that may create, or be perceived to create, a conflict of interest in relation to my role in the Project has been declared in accordance with the UTS Code of Conduct.
- I have made reasonable enquiries regarding any other person acting on behalf of UTS and involved with the Project having a potential, real or perceived conflict of interest relating to the Project, and any such conflicts of interest have been declared in accordance with the UTS Code of Conduct.

To sign off the project notification click on "I accept" in the Declaration Sign off.

Not Answered

Not Answered

**Infrastructure / indirect costs**

Infrastructure conditions: full infrastructure/indirect cost charged

Is it a multi-faculty proposal?( e.g. UTS wide tenders or large govt grants involving multiple faculties. This does not apply to business as usual proposals where the research team includes staff from another faculty)

No

Does it require additional due diligence (international proposals to countries that are less than 50 on the [Transparency Index](#))?

No

Research activity is with organisations within the fossil fuels, alcohol, gambling and animal testing industries.

No

**C&P Summary**

Total Applied Amount (price)

Awarded amount

Amount Retained by UTS

UTS cash contribution

Total Project cost (not including infrastructure, contingency and profit)

Institution Infrastructure %

Updated Infrastructure %

Is there any conflict of interest for the ADR to approve this proposal (e.g. FNCI is the ADR, ADR is on the project team)? You can use the "Other to endorse" option and select another reviewer (e.g. Dean)

No

**Confirmation**

1. Confirmed by: type name in textbox below

2. Date of faculty confirmation:

**This proposal needs to meet certain criteria in order to proceed:**

- the attached proposal is of sufficient quality in order for the Review process to occur
- the costing and pricing is appropriate for the project
- the infrastructure position is clear and acceptable to the faculty
- UTS cash and in-kind contributions are clear
- All relevant Faculty Forms have been attached.
- this project falls within the definition of "Research" in the [HERDC Specifications](#)
- Any staff or resources committed from other faculties/units (including Central Research Budget funding) have been agreed to by the appropriate delegate in those faculties/units

Have these criteria been met?

Yes

Comments

Total:  
GIPA 3.1(3)

Cost break down  
GIPA 3.1(3) % infrastructure fee)  
GIPA 3.1(3)

The total ICR included in the costing tool is GIPA 3.1(3)

Since re-submission, GIPA 3.1(2) from Rapido has left the university for this reason GIPA 3.1(2) FTE cost was moved to GIPA 3.1(2) in the research Team.

**Confirmation by ADR**

Have any of the following changed?

None of the above

**Summary**

Total Applied Amount (price)

Amount to UTS

UTS cash contribution

UTS in-kind contribution

Total Project cost (not including infrastructure, contingency and profit)

**Infrastructure / indirect costs**

Infrastructure conditions: full infrastructure/indirect costs charged to funding body

*Travel, HDR (non-profit Australian organisation) or Equipment only:* For these funding types, waivers are automatically approved and no further evidence is required.

**Infrastructure charges are:**

Normally infrastructure charged for this type of project is 25% of total budget

**Confirmation**

**4. This proposal needs to meet certain criteria in order to proceed:**

- the time allocation of named staff is reasonable in view of their workload
- the project remains feasible given the amount of funding approved
- the time allocation for equipment and facilities for this project are reasonable, bearing in mind the other uses of the equipment
- the ethics and safety implications of the project have been appropriately recorded
- this project falls within the definition of "Research" in the [HERDC Specifications](#)
- Any staff or resources committed from other faculties/units (including Central Research Budget funding) have been agreed to by the appropriate delegate in those faculties/units

Have these criteria been met?

Yes

**Protocol for the execution of Documents (PED)**

List the name of the other parties who will be signing this research agreement.

Navantia Australia

Does this contract need to be on the [GIPA register?](#)
 No
Entering into this contract does not breach any Autonomous Sanctions. **If you are unsure, check these links** [Sanctions regimes](#) and [Online Sanctions Administration System](#)

Is the agreement an approved UTS template or Standard Government Contract?

 Yes
**Export Controls**

Does the transaction involve the export of defence or dual use items controlled under the Defence and Strategic Goods list (DSGL)?

 No

Faculty comments

Research Manager Comments

Total: \$GIPA 3.1(3)  
 Cost break down GIPA 3.1(3)  
 The total ICR included in the costing tool is GIPA 3.1(3)

Since re-submission, Hollie from Rapido has left the university for this reason Hollie's FTE cost was moved to Sonya and Julie in the research Team.

Research Office-Case Manager Comments

As requested by Research Manager, it is now returned to RM to get some issues fixed.

Have you signed the agreement? Please note: you will not be able to proceed until the agreement is signed

Yes

# Research Project Request

Reference No : PRO22-16436  
Project Title : Live Mapping  
Date Received :  
Primary Contact : Dr Ravi Sanath Ranasinghe (0First Named UTS Chief Investigator)  
Other Contacts :  
GIPA 3.1(2) (2Partner Investigator)  
GIPA 3.1(2) (Faculty Development Support )  
GIPA 3.1(2) (2Partner Investigator)  
GIPA 3.1(2) (Chief Investigator)  
GIPA 3.1(2) (Research Office- Case Manager)

**Enter Outcome****Enter Outcome****Project Title** (maximum 200 characters)

Live Mapping

Was the proposal successful in being funded?

 Yes

The organisation unit code for this project request should be the organisation unit code of the Primary contact / 0.First named UTS chief investigator, if it is different, please assign the correct AOU.

FEIT.School of Mechanical and Mechatronic Engineering

Congratulations on receiving funding for your proposal! This form allows you to record changes to the project structure based on the amount of funding received. You will need to answer a few questions relating to ethics, health and safety and the type of research being undertaken.

**Review Previously Entered Info****Proposal Details****Have any of the following changed?**

- Start/End Date
- Budget

**Update this My Proposal record and ensure that the info in Costing & Pricing tool/spreadsheet is still appropriate.**

Update estimated start dated/end date

**The budget needs to be recast.****Project Title** (maximum 200 characters)

Live Mapping

Project description (maximum 2000 characters)

The objective of this research project is to develop methodologies and AI algorithms to generate a map of an outdoor environment from images acquired through a downward looking camera(s) mounted on an unmanned aerial vehicle. Part of the idea is to generate or improve the quality of the map when images are missing or aren't yet captured. The core technology is being researched, developed and designed in collaboration with Advanced Navigation. During mapping missions, multiple overlapping stereo images are collected as the UAV flies along a flight path. UAV's state information (attitude and altitude) fused with GPS information will be used to estimate UAV location. UTS will look into generating maps using incoming images faster than the existing mapping technologies by effectively utilising the available state information and advanced optimisation libraries.

Does any portion of this project utilise UTS Tech Lab?

 No**Select research type** Externally funded (grants, tender, contract research, scholarships)**Project type do NOT leave it as "application", choose the relevant project type.**

P: Contract Research

**Is UTS the administering organisation?**

If you have entered a fund scheme and you want to change this, you will need to remove the fund scheme first.

 Yes

**External Application ID** (if applicable, e.g ARC, NHMRC, RMS No., etc)

Not Answered

**Estimated start date**

01/03/2023

**Estimated end date**

01/01/2024

**Any Comments**

Not Answered

**This project is confidential and I do not wish to display it on UTS web pages. (If the confidentiality status changes (e.g. the project is made public by the funder) you can notify the Research Office so that can be published on relevant UTS web pages including your profile page.)**

 No

**Export Controls – Please visit the [DTC Staff Connect page](#) if you are unsure how to answer the below question/s**

Does the transaction involve the export of defence or dual use items controlled under the Defence and Strategic Goods list (DSGL)?

 No

## Research Team

**Include all the research team that is involved in the project**

Include all members of the project team If there is a student involved in this project and UTS is assigning the project intellectual property to the funder, you will need the student to sign a Student IP assignment agreement prior to their involvement in the project; you can request the agreement in ResearchMaster

How do I request it?

1. Click on My Agreement/IPs->My Agreement/IP requests
2. Click on Create new
3. Select 'Student IP Assignment' Template
4. Complete the form

If you have any questions regarding the student IP assignment agreement, please email [contractadvice@uts.edu.au](mailto:contractadvice@uts.edu.au)

**Internal Fund Sources**

*This question is not answered.*

**Engagement and Impact**

**Engagement and Impact**

UTS has committed through its [2027 Strategy](#) to deliver excellent research with impact and your proposal is your contribution to that commitment.

In this context impact is defined as 'the contribution that research makes to the economy, society, environment or culture, beyond the contribution to academic research'. It is often most efficiently achieved when researchers plan how they will engage with the external audiences who will use their research.

Which of the following summarises the degree of thinking about impact in your proposal?

- I want to learn more about planning impact into my proposal

What is the intended impact for this project? Briefly summarise the impact if this research were to be adopted.

This is an industry funded project. The industry partner expects to enhance services provided to its clients through the advanced mapping solutions that we are aiming to achieve in this research project.

What is the pathway to impact for this project? Briefly summarise your thinking on how adoption of this research will be achieved (you may be forecasting events well beyond the end date of this project).

The industry partner is planning to improve the mapping accuracy and the speed of generating accurate maps using the algorithms that will be developed during this project.

Do you want to track your research engagement activities for this project?

If yes is selected, a collaborative [Record of Impact in Symplectic](#) will be created for you and your team.

- Yes

To learn more about using [Record of Impact in Symplectic](#), and about Engagement and Impact generally enrol in the [RESHub Research Impact online module](#).

**Risk management and ethics approval**

## Ethics, Data, Health and Safety

The UTS Guidelines for the Management of Research Data articulates how data should be managed. Research data management planning should be undertaken in the beginning stages of your research project, using Stash

**Data:** -- Will you be storing data for this project?

For assistance, the [Research Management Policy](#) and [Guidelines for Research data management](#) advise how data should be managed. If you have any questions please contact the eResearch team - [eResearch-it@uts.edu.au](mailto:eResearch-it@uts.edu.au)

no

**Human ethics:**-- research involving human participants and/or use of their data (this may include questionnaires, interviews, information regarding organisations or that is considered commercial-in-confidence).

Not applicable

**Clinical trial:** -- research that prospectively assigns human participants or groups of humans to one or more health-related interventions to evaluate the effects on health outcomes.

Not applicable

**Animal ethics** -- research involving the care and use of animals.

Not applicable

**Biosafety:** -- research involving biological hazards such as genetically modified organisms (GMOs), pathogens, ionising radiation, cytotoxic substances and imported biological materials

Not applicable

**Health and Safety:** -- research involving health and safety risk, such as: hazardous chemicals, genetically modified organisms (GMOs), pathogenic microorganisms, radiation apparatus/sources, laboratory/workshop equipment, animals, fieldwork, work in healthcare setting or hazardous work environment.

no

## Classifications

### Research codes (FOR, SEO and TOA)

Research Classifications are import as they frame your research for a variety of audiences

Below are 3 frequently used classifications at UTS and in the Australian research sector. to find more information click [here](#).

- [Field of Research \(FOR\) codes](#) classify the disciplines in your research. They are an important part of the Excellence in Research in Australia (ERA) survey.
- [Socio-Economic Objective \(SEO\) codes](#) explain which part of the economy or part of society will benefit from the research. They are usually used when reflecting on the likely impact of research.
- [Types of Research and Development Activity \(TOA\) classification](#) breaks the research into four categories: Pure Basic, Strategic Basic, Applied, and Experimental. The allocated percentages must total 100%. The government uses this information to look at changes in the pattern of research that is occurring in different disciplines and regions.

#### Field of research (FOR)

1	<b>Classification Type</b>	Field Of Research Codes
	<b>FOR Code</b>	4007
	<b>Percentage</b>	0
	<b>Primary FOR?</b>	Yes
		Not Answered

#### Socio economic objective code (SEO)

1	<b>SEO Type</b>	Socio-Economic Objective Codes
	<b>SEO Code</b>	241202
	<b>Percentage</b>	0
	<b>Primary SEO?</b>	Yes
		Not Answered

**Type of activity (TOA)**, click on the "save" icon at the top right corner to show the total Strategic Basic 0.00; Pure Basic 0.00; Experiment Dev 0.00; Applied 0.00; Total % 0.00

### Confirmation

#### Confirmation by first named UTS chief investigator

The UTS Library of Successful Grants is intended to assist the UTS research community in the development of strong grant applications and is only accessible to UTS staff. Applications can be stored in full or in part in the UTS Library of Successful Grants and can be removed at your discretion – see policy. If 'Yes' is selected, the Research Office will contact the project leader to identify whether information needs to be removed from the application before it is included in the library. If your proposal is successful, do you consent for the Research Office to add a secure PDF of your successful application to the UTS Library of Successful Grants?

No

#### As the first named UTS chief investigator, I confirm:

- data entered for this project is complete and accurate to the best of my knowledge
- I will comply with all relevant UTS policies and procedures
- all required approvals including [ethics](#), risk assessments and biosafety approvals (where required) will be obtained prior to the research commencing
- the budget complies with the [The Guidelines for research proposals and project management.](#)
- the funding section includes all requests for Faculty or Central Research Budget funding
- this project falls within the definition of "Research" in the [HERDC Specifications](#)

Conflicts of interest arise when persons are influenced, or appear to be influenced by personal interest when doing their job. Conflicts of interest of persons involved in the research project (the Project) may result in a lesser standard of independence than that required to maintain the integrity of the Project. In accordance with the [UTS Code of Conduct](#), Supervisors and Deans/Directors are responsible for taking action in relation to conflicts of interest that arise in their work areas.

#### I hereby declare the following:

- Any related interest that may create, or be perceived to create, a conflict of interest in relation to my role in the Project has been declared in accordance with the UTS Code of Conduct.
- I have made reasonable enquiries regarding any other person acting on behalf of UTS and involved with the Project having a potential, real or perceived conflict of interest relating to the Project, and any such conflicts of interest have been declared in accordance with the UTS Code of Conduct.

To sign off the project notification click on "I accept" in the Declaration Sign off.

#### Infrastructure / indirect costs

Infrastructure conditions: full infrastructure/indirect cost charged

Is it a multi-faculty proposal? ( e.g. UTS wide tenders or large govt grants involving multiple faculties. This does not apply to business as usual proposals where the research team includes staff from another faculty)

No

Does it require additional due diligence (international proposals to countries that are less than 50 on the [Transparency Index](#))?

No

Research activity is with organisations within the fossil fuels, alcohol, gambling and animal testing industries.

No

#### C&P Summary

Is there any conflict of interest for the ADR to approve this proposal (e.g. FNCI is the ADR, ADR is on the project team)? You can use the "Other to endorse" option and select another reviewer (e.g. Dean)

No

#### Confirmation

**1. Confirmed by:** type name in textbox below

GIPA 3.1(2)

**2. Date of faculty confirmation:**

10/02/2023

**This proposal needs to meet certain criteria in order to proceed:**

- the attached proposal is of sufficient quality in order for the Review process to occur
- the costing and pricing is appropriate for the project
- the infrastructure position is clear and acceptable to the faculty
- UTS cash and in-kind contributions are clear
- All relevant Faculty Forms have been attached.
- this project falls within the definition of "Research" in the [HERDC Specifications](#)
- Any staff or resources committed from other faculties/units (including Central Research Budget funding) have been agreed to by the appropriate delegate in those faculties/units

Have these criteria been met?

 Yes

Comments

All ok - costing includes a minor amount of in-kind from a CI, which has been discussed with ADR prior to submission

# Research Project Request

Reference No : PRO22-16442  
Project Title : Indoor Positioning System for Train Stations  
Date Received :  
Primary Contact : A/Prof Teresa Alejandra Vidal Calleja (0First Named UTS Chief Investigator)  
Other Contacts : GIPA 3.1(2) (Faculty Development Support )  
GIPA 3.1(2) Shortt (Research Office- Case Manager)  
GIPA 3.1(2) (Chief Investigator)  
GIPA 3.1(2) (Chief Investigator)

**Enter Outcome****Enter Outcome****Project Title** (maximum 200 characters)

Indoor Positioning System for Train Stations

Was the proposal successful in being funded?

 Yes

The organisation unit code for this project request should be the organisation unit code of the Primary contact / 0.First named UTS chief investigator, if it is different, please assign the correct AOU.

FEIT.School of Mechanical and Mechatronic Engineering

Congratulations on receiving funding for your proposal! This form allows you to record changes to the project structure based on the amount of funding received. You will need to answer a few questions relating to ethics, health and safety and the type of research being undertaken.

**Review Previously Entered Info****Proposal Details****Have any of the following changed?** Budget**Update this My Proposal record and ensure that the info in Costing & Pricing tool/spreadsheet is still appropriate.****The budget needs to be recast.****Project Title** (maximum 200 characters)

Indoor Positioning System for Train Stations

Project description (maximum 2000 characters)

The broad objective of this project is to contribute to the on-going development of Advanced Navigation for a positioning system in train stations. Specifically, UTS will develop algorithms for optimal device placement, calibration, and evaluate and improve the performance for 2.5D localisation using UWB devices in a train station environment.

Does any portion of this project utilise UTS Tech Lab?

 No**Select research type** Externally funded (grants, tender, contract research, scholarships)**Project type** do **NOT** leave it as "application", choose the relevant project type.

P: UTS Administered Grants

**Is UTS the administering organisation?**

If you have entered a fund scheme and you want to change this, you will need to remove the fund scheme first.

 Yes**External Application ID** (if applicable, e.g ARC, NHMRC, RMS No., etc)

n/a

**Estimated start date**

01/02/2023

**Estimated end date**

01/05/2024

**Any Comments**

Not Answered

**This project is confidential and I do not wish to display it on UTS web pages. (If the confidentiality status changes (e.g. the project is made public by the funder) you can notify the Research Office so that can be published on relevant UTS web pages including your profile page.)**

 No
**Research Team**

**Include all the research team that is involved in the project**

Include all members of the project team If there is a student involved in this project and UTS is assigning the project intellectual property to the funder, you will need the student to sign a Student IP assignment agreement prior to their involvement in the project; you can request the agreement in ResearchMaster

How do I request it?

1. Click on My Agreement/IPs->My Agreement/IP requests
2. Click on Create new
3. Select 'Student IP Assignment' Template
4. Complete the form

If you have any questions regarding the student IP assignment agreement, please email [contractadvice@uts.edu.au](mailto:contractadvice@uts.edu.au)

## Engagement and Impact

### Engagement and Impact

UTS has committed through its [2027 Strategy](#) to deliver excellent research with impact and your proposal is your contribution to that commitment.

In this context impact is defined as 'the contribution that research makes to the economy, society, environment or culture, beyond the contribution to academic research'. It is often most efficiently achieved when researchers plan how they will engage with the external audiences who will use their research.

Which of the following summarises the degree of thinking about impact in your proposal?

- I will think about impact at a later stage

What is the intended impact for this project? Briefly summarise the impact if this research were to be adopted.

This research will enable passengers to navigate in train stations.

What is the pathway to impact for this project? Briefly summarise your thinking on how adoption of this research will be achieved (you may be forecasting events well beyond the end date of this project).

We are working directly with an Industry partner to enhance the developed technology.

Do you want to track your research engagement activities for this project?

If yes is selected, a collaborative [Record of Impact in Symplectic](#) will be created for you and your team.

- No

To learn more about using [Record of Impact in Symplectic](#), and about Engagement and Impact generally enrol in the [RESHub Research Impact online module](#).

## Risk management and ethics approval

### Ethics, Data, Health and Safety

The UTS Guidelines for the Management of Research Data articulates how data should be managed. Research data management planning should be undertaken in the beginning stages of your research project, using Stash

**Data:** -- Will you be storing data for this project?

For assistance, the [Research Management Policy](#) and [Guidelines for Research data management](#) advise how data should be managed. If you have any questions please contact the eResearch team - [eResearch-it@uts.edu.au](mailto:eResearch-it@uts.edu.au)

- yes

Please complete your data management plan in the [eResearch stash tool](#).

For assistance with your data management plan, please contact eResearch at [eResearch-it@uts.edu.au](mailto:eResearch-it@uts.edu.au)

**Human ethics:**-- research involving human participants and/or use of their data (this may include questionnaires, interviews, information regarding organisations or that is considered commercial-in-confidence).

Not applicable

**Clinical trial:** -- research that prospectively assigns human participants or groups of humans to one or more health-related interventions to evaluate the effects on health outcomes.

Not applicable

**Animal ethics** -- research involving the care and use of animals.

Not applicable

**Biosafety:** -- research involving biological hazards such as genetically modified organisms (GMOs), pathogens, ionising radiation, cytotoxic substances and imported biological materials

Not applicable

**Health and Safety:** -- research involving health and safety risk, such as: hazardous chemicals, genetically modified organisms (GMOs), pathogenic microorganisms, radiation apparatus/sources, laboratory/workshop equipment, animals, fieldwork, work in healthcare setting or hazardous work environment.

no

## Classifications

### Research codes (FOR, SEO and TOA)

Research Classifications are import as they frame your research for a variety of audiences

Below are 3 frequently used classifications at UTS and in the Australian research sector. to find more information click [here](#).

- [Field of Research \(FOR\) codes](#) classify the disciplines in your research. They are an important part of the Excellence in Research in Australia (ERA) survey.
- [Socio-Economic Objective \(SEO\) codes](#) explain which part of the economy or part of society will benefit from the research. They are usually used when reflecting on the likely impact of research.
- [Types of Research and Development Activity \(TOA\) classification](#) breaks the research into four categories: Pure Basic, Strategic Basic, Applied, and Experimental. The allocated percentages must total 100%. The government uses this information to look at changes in the pattern of research that is occurring in different disciplines and regions.

#### Field of research (FOR)

## Confirmation

### Confirmation by first named UTS chief investigator

The UTS Library of Successful Grants is intended to assist the UTS research community in the development of strong grant applications and is only accessible to UTS staff. Applications can be stored in full or in part in the UTS Library of Successful Grants and can be removed at your discretion – see policy. If 'Yes' is selected, the Research Office will contact the project leader to identify whether information needs to be removed from the application before it is included in the library. If your proposal is successful, do you consent for the Research Office to add a secure PDF of your successful application to the UTS Library of Successful Grants?

No

#### As the first named UTS chief investigator, I confirm:

- data entered for this project is complete and accurate to the best of my knowledge
- I will comply with all relevant UTS policies and procedures
- all required approvals including [ethics](#), risk assessments and biosafety approvals (where required) will be obtained prior to the research commencing
- the budget complies with the [The Guidelines for research proposals and project management.](#)
- the funding section includes all requests for Faculty or Central Research Budget funding
- this project falls within the definition of "Research" in the [HERDC Specifications](#)

Conflicts of interest arise when persons are influenced, or appear to be influenced by personal interest when doing their job. Conflicts of interest of persons involved in the research project (the Project) may result in a lesser standard of independence than that required to maintain the integrity of the Project. In accordance with the [UTS Code of Conduct](#), Supervisors and Deans/Directors are responsible for taking action in relation to conflicts of interest that arise in their work areas.

#### I hereby declare the following:

- Any related interest that may create, or be perceived to create, a conflict of interest in relation to my role in the Project has been declared in accordance with the UTS Code of Conduct.
- I have made reasonable enquiries regarding any other person acting on behalf of UTS and involved with the Project having a potential, real or perceived conflict of interest relating to the Project, and any such conflicts of interest have been declared in accordance with the UTS Code of Conduct.

To sign off the project notification click on "I accept" in the Declaration Sign off.

## Internal Fund Sources

For CRB stipends, you must select the "CRBHDR" as the fund source. (The UTSCRBCAS fund source is selected only for explicitly approved CRB cash contributions).

*This question is not answered.*

Not Answered

Not Answered

**Infrastructure / indirect costs**

Infrastructure conditions: full infrastructure/indirect cost charged

Does one or more of the following statements apply to this proposal?

- Funder requires central Research Office submission (E.G. ARC, NHMRC, Innovation Connections, TechVouchers, DFAT, US Govt. such as NIH or Dept. of Defense, European Commission etc.)
- Funder is not Australian
- 50% or more of the research will be conducted outside Australia
- Scheme requires UTS to limit the number of applications

No

Is it a multi-faculty proposal?( e.g. UTS wide tenders or large govt grants involving multiple faculties. This does not apply to business as usual proposals where the research team includes staff from another faculty)

No

Does it require additional due diligence (international proposals to countries that are less than 50 on the [Transparency Index](#))?

No

Research activity is with organisations within the fossil fuels, alcohol, gambling and animal testing industries.

No

Is it a Travel Only Grant?

No

Are you using a standard Australian government contract or Grant letter of award?

Yes

**C&P Summary**

Is there any conflict of interest for the ADR to approve this proposal (e.g. FNCI is the ADR, ADR is on the project team)? You can use the "Other to endorse" option and select another reviewer (e.g. Dean)

No

**Confirmation**

**1. Confirmed by:** type name in textbox below

GIPA 3.1(2)

**2. Date of faculty confirmation:**

06/02/2023

The project is under faculty/institute delegations, The ADR will review the contract.

If a new fund source is requested, it needs to be created in ResearchMaster before being submitted it to the ADR. please email [pet.admin@uts.edu.au](mailto:pet.admin@uts.edu.au) before submitting it to ADR.

Low Risk Proposal

**Protocol of Execution of Documents**

List the name of the other parties who will be signing this research agreement.

Chris Shaw, CEO Advanced Navigation

Does this contract need to be on the [GIPA register?](#)

 Yes

Entering into this contract does not breach any Autonomous Sanctions. **If you are unsure, check these links** [Sanctions regimes](#) and [Online Sanctions Administration System](#)

The Dean or ADR has delegated authority to execute this contract.

This proposal needs to meet certain criteria in order to proceed:

- the attached proposal is of sufficient quality in order for the Review process to occur
- the costing and pricing is appropriate for the project
- the infrastructure position is clear and acceptable to the faculty
- UTS cash and in-kind contributions are clear
- All relevant Faculty Forms have been attached.
- this project falls within the definition of "Research" in the [HERDC Specifications](#)
- Any staff or resources committed from other faculties/units (including Central Research Budget funding) have been agreed to by the appropriate delegate in those faculties/units

Have these criteria been met?

 Yes

Comments

All ok - Total budget remains identical to v0 (\$<sup>GIPA 3.1(3)</sup> but line items have been modified i.e., increase in FTE for Post-doc and creation of RA position, with a reduction in named CIs FTE to <sup>GIPA 3.1(3)</sup> <sup>GIPA 3.1(2)</sup>

**Confirmation by ADR**

#### Infrastructure / indirect costs

Infrastructure conditions: full infrastructure/indirect costs charged to funding body

*Travel, HDR (non-profit Australian organisation) or Equipment only:* For these funding types, waivers are automatically approved and no further evidence is required.

#### Infrastructure charges are:

Normally infrastructure charged for this type of project is 30% of total budget

#### Confirmation

#### 4. This proposal needs to meet certain criteria in order to proceed:

- the time allocation of named staff is reasonable in view of their workload
- the project remains feasible given the amount of funding approved
- the time allocation for equipment and facilities for this project are reasonable, bearing in mind the other uses of the equipment
- the ethics and safety implications of the project have been appropriately recorded
- this project falls within the definition of "Research" in the [HERDC Specifications](#)
- Any staff or resources committed from other faculties/units (including Central Research Budget funding) have been agreed to by the appropriate delegate in those faculties/units

Have these criteria been met?

Yes

Comments

Note for audit :  
this was approved in error by faculty, the Director RO will sign the agreement and there have been no changes from the applied stage which was approved by RO.  
GIPA 3.1(2) 7/2/2023

#### Check agreement-Ready to request activity code

Primary Organisation Name

FEIT.School of Mechanical and Mechatronic Engineering

Have all parties signed the agreement or accepted the conditions of award?

Yes

Is the Activity code required? (Mandatory when UTS spends money)

Yes

Details for invoicing contact at funding body

1. Fund Source Type: 10 External Research

2. Contact Name for Invoicing

# Research Project Request

Reference No : PRO23-17544  
Project Title : Digital Twin and Ship routing phase 2  
Date Received :  
Primary Contact : Mr Herve Harvard (0First Named UTS Chief Investigator)  
Other Contacts : GIPA 3.1(2) (Research Office-Case Support)  
GIPA 3.1(2) (7Project Administrator)  
GIPA 3.1(2) (Non-Academic Team Member)  
GIPA 3.1(2) (Non-Academic Team Member)  
GIPA 3.1(2) (Research Office- Case Manager)  
GIPA 3.1(2) off (Non-Academic Team Member)  
GIPA 3.1(2) (7Project Administrator)  
GIPA 3.1(2) (7Project Administrator)

**Enter Outcome****Enter Outcome****Project Title** (maximum 200 characters)

Was the proposal successful in being funded?

 Yes

The organisation unit code for this project request should be the organisation unit code of the Primary contact / 0.First named UTS chief investigator, if it is different, please assign the correct AOU.

Congratulations on receiving funding for your proposal! This form allows you to record changes to the project structure based on the amount of funding received. You will need to answer a few questions relating to ethics, health and safety and the type of research being undertaken.

**Review Previously Entered Info****Proposal Details****Have any of the following changed?**
 None of the above

**Update this My Proposal record and ensure that the info in Costing & Pricing tool/spreadsheet is still appropriate.**

**Project Title** (maximum 200 characters)

Project description (maximum 2000 characters)

Does any portion of this project utilise UTS Tech Lab?

 No
**Select research type**
 Externally funded (grants, tender, contract research, scholarships)

**Project type** do **NOT** leave it as "application", choose the relevant project type.

**Is UTS the administering organisation?**

If you have entered a fund scheme and you want to change this, you will need to remove the fund scheme first.

 Yes
**External Application ID** (if applicable, e.g ARC, NHMRC, RMS No., etc)
**Estimated start date**

**Estimated end date**

**Any Comments**

Not Answered

This project is confidential and I do not wish to display it on UTS web pages. (If the confidentiality status changes (e.g. the project is made public by the funder) you can notify the Research Office so that can be published on relevant UTS web pages including your profile page.)

Yes

**Export Controls – Please visit the [DTC Staff Connect page](#) if you are unsure how to answer the below question/s**

Does the transaction involve the export of defence or dual use items controlled under the Defence and Strategic Goods list (DSGL)?

No

**Research Team**

**Include all the research team that is involved in the project**

Include all members of the project team If there is a student involved in this project and UTS is assigning the project intellectual property to the funder, you will need the student to sign a Student IP assignment agreement prior to their involvement in the project; you can request the agreement in ResearchMaster

How do I request it?

1. Click on My Agreement/IPs->My Agreement/IP requests
2. Click on Create new
3. Select 'Student IP Assignment' Template
4. Complete the form

If you have any questions regarding the student IP assignment agreement, please email [contractadvice@uts.edu.au](mailto:contractadvice@uts.edu.au)

**Internal Fund Sources**

*This question is not answered.*

**Engagement and Impact**

**Engagement and Impact**

UTS has committed through its [2027 Strategy](#) to deliver excellent research with impact and your proposal is your contribution to that commitment.

In this context impact is defined as 'the contribution that research makes to the economy, society, environment or culture, beyond the contribution to academic research'. It is often most efficiently achieved when researchers plan how they will engage with the external audiences who will use their research.

Which of the following summarises the degree of thinking about impact in your proposal?

- I will think about impact at a later stage

What is the intended impact for this project? Briefly summarise the impact if this research were to be adopted.

The impact of this project is development of advanced technologies and algorithms related to digital twin of the ship which in turn will benefit the operations of the Australian Navy as well as other navies.

What is the pathway to impact for this project? Briefly summarise your thinking on how adoption of this research will be achieved (you may be forecasting events well beyond the end date of this project).

This project will develop core technologies for finding optimal routes for ships. This will be incorporated into a solution (e.g. a service deployed on cloud platform) to be developed by Navantia for the Australian Navy.

Do you want to track your research engagement activities for this project?

If yes is selected, a collaborative [Record of Impact in Symplectic](#) will be created for you and your team.

No

To learn more about using [Record of Impact in Symplectic](#), and about Engagement and Impact generally enrol in the [RESHub Research Impact online module](#).

## Risk management and ethics approval

### Ethics, Data, Health and Safety

The UTS Guidelines for the Management of Research Data articulates how data should be managed. Research data management planning should be undertaken in the beginning stages of your research project, using Stash

**Data:** -- Will you be storing data for this project?

For assistance, the [Research Management Policy](#) and [Guidelines for Research data management](#) advise how data should be managed. If you have any questions please contact the eResearch team - [eResearch-it@uts.edu.au](mailto:eResearch-it@uts.edu.au)

no

**Human ethics:**-- research involving human participants and/or use of their data (this may include questionnaires, interviews, information regarding organisations or that is considered commercial-in-confidence).

Not applicable

**Clinical trial:** -- research that prospectively assigns human participants or groups of humans to one or more health-related interventions to evaluate the effects on health outcomes.

Not applicable

**Animal ethics** -- research involving the care and use of animals.

Not applicable

**Biosafety:** -- research involving biological hazards such as genetically modified organisms (GMOs), pathogens, ionising radiation, cytotoxic substances and imported biological materials

Not applicable

**Health and Safety:** -- research involving health and safety risk, such as: hazardous chemicals, genetically modified organisms (GMOs), pathogenic microorganisms, radiation apparatus/sources, laboratory/workshop equipment, animals, fieldwork, work in healthcare setting or hazardous work environment.

no

## Classifications

### Research codes (FOR, SEO and TOA)

Research Classifications are import as they frame your research for a variety of audiences

Below are 3 frequently used classifications at UTS and in the Australian research sector. to find more information click [here](#).

- [Field of Research \(FOR\) codes](#) classify the disciplines in your research. They are an important part of the Excellence in Research in Australia (ERA) survey.
- [Socio-Economic Objective \(SEO\) codes](#) explain which part of the economy or part of society will benefit from the research. They are usually used when reflecting on the likely impact of research.
- [Types of Research and Development Activity \(TOA\) classification](#) breaks the research into four categories: Pure Basic, Strategic Basic, Applied, and Experimental. The allocated percentages must total 100%. The government uses this information to look at changes in the pattern of research that is occurring in different disciplines and regions.

### Field of research (FOR)

1	<b>Classification Type</b>	Field Of Research Codes
	<b>FOR Code</b>	4606

**Confirmation****Confirmation by first named UTS chief investigator**

The UTS Library of Successful Grants is intended to assist the UTS research community in the development of strong grant applications and is only accessible to UTS staff. Applications can be stored in full or in part in the UTS Library of Successful Grants and can be removed at your discretion – see policy. If 'Yes' is selected, the Research Office will contact the project leader to identify whether information needs to be removed from the application before it is included in the library. If your proposal is successful, do you consent for the Research Office to add a secure PDF of your successful application to the UTS Library of Successful Grants?

No

**As the first named UTS chief investigator, I confirm:**

- data entered for this project is complete and accurate to the best of my knowledge
- I will comply with all relevant UTS policies and procedures
- all required approvals including [ethics](#), risk assessments and biosafety approvals (where required) will be obtained prior to the research commencing
- the budget complies with the [The Guidelines for research proposals and project management.](#)
- the funding section includes all requests for Faculty or Central Research Budget funding
- this project falls within the definition of "Research" in the [HERDC Specifications](#)

Conflicts of interest arise when persons are influenced, or appear to be influenced by personal interest when doing their job. Conflicts of interest of persons involved in the research project (the Project) may result in a lesser standard of independence than that required to maintain the integrity of the Project. In accordance with the [UTS Code of Conduct](#), Supervisors and Deans/Directors are responsible for taking action in relation to conflicts of interest that arise in their work areas.

**I hereby declare the following:**

- Any related interest that may create, or be perceived to create, a conflict of interest in relation to my role in the Project has been declared in accordance with the UTS Code of Conduct.
- I have made reasonable enquiries regarding any other person acting on behalf of UTS and involved with the Project having a potential, real or perceived conflict of interest relating to the Project, and any such conflicts of interest have been declared in accordance with the UTS Code of Conduct.

To sign off the project notification click on "I accept" in the Declaration Sign off.

**Internal Fund Sources**

For CRB stipends, you must select the "CRBHDR" as the fund source. (The UTSRCBCAS fund source is selected only for explicitly approved CRB cash contributions).

*This question is not answered.*

Not Answered

Not Answered

**Infrastructure / indirect costs**

Infrastructure conditions: full infrastructure/indirect cost charged

Is it a multi-faculty proposal? ( e.g. UTS wide tenders or large govt grants involving multiple faculties. This does not apply to business as usual proposals where the research team includes staff from another faculty)

No

Does it require additional due diligence (international proposals to countries that are less than 50 on the [Transparency Index](#))?

No

Research activity is with organisations within the fossil fuels, alcohol, gambling and animal testing industries.

Yes

**C&P Summary**

Total Applied Amount (price)

Awarded amount

Amount Retained by UTS

UTS cash contribution

Total Project cost (not including infrastructure, contingency and profit)

Institution Infrastructure %

Updated Infrastructure %

Is there any conflict of interest for the ADR to approve this proposal (e.g. FNCI is the ADR, ADR is on the project team)? You can use the "Other to endorse" option and select another reviewer (e.g. Dean)

No

**Confirmation**

1. Confirmed by: type name in textbox below

GIPA 3.1(2)

2. Date of faculty confirmation:

26/07/2023

High Risk Proposal

**This proposal needs to meet certain criteria in order to proceed:**

- the attached proposal is of sufficient quality in order for the Review process to occur
- the costing and pricing is appropriate for the project
- the infrastructure position is clear and acceptable to the faculty
- UTS cash and in-kind contributions are clear
- All relevant Faculty Forms have been attached.
- this project falls within the definition of "Research" in the [HERDC Specifications](#)
- Any staff or resources committed from other faculties/units (including Central Research Budget funding) have been agreed to by the appropriate delegate in those faculties/units

Have these criteria been met?

Yes

Comments

Attached purchase order is confirmed as being the executable agreement. RO will sign as delegate.

**Confirmation by ADR**

Have any of the following changed?

None of the above

##### Infrastructure / indirect costs

Infrastructure conditions: full infrastructure/indirect costs charged to funding body

Travel, HDR (non-profit Australian organisation) or Equipment only: For these funding types, waivers are automatically approved and no further evidence is required.

**Infrastructure charges are:**

Normally infrastructure charged for this type of project is 25% of total budget

**Confirmation**

**4. This proposal needs to meet certain criteria in order to proceed:**

- the time allocation of named staff is reasonable in view of their workload
- the project remains feasible given the amount of funding approved
- the time allocation for equipment and facilities for this project are reasonable, bearing in mind the other uses of the equipment
- the ethics and safety implications of the project have been appropriately recorded
- this project falls within the definition of "Research" in the [HERDC Specifications](#)
- Any staff or resources committed from other faculties/units (including Central Research Budget funding) have been agreed to by the appropriate delegate in those faculties/units

Have these criteria been met?

Yes

**Update this My Proposal record and ensure that the info in Costing & Pricing tool/spreadsheet is still appropriate.**

**Project Title** (maximum 200 characters)

Navantia Ship Routing FUI

## Project description (maximum 2000 characters)

This project will develop a prototype UI that will be presented at the Indo Pacific exposition. It will also investigate the integration of LLM capabilities and serve as the basis for the Ship Routing UI that will be delivered as part of the Ship Routing Phase 2 project.

Does any portion of this project utilise UTS Tech Lab?

 No**Select research type** Externally funded (grants, tender, contract research, scholarships)

**Project type do NOT leave it as "application", choose the relevant project type.**

P: Contract Research

**Is UTS the administering organisation?**

If you have entered a fund scheme and you want to change this, you will need to remove the fund scheme first.

 Yes**External Application ID** (if applicable, e.g ARC, NHMRC, RMS No., etc)

Not Answered

**Estimated start date**

28/08/2023

**Estimated end date**

30/11/2023

**Any Comments**

Not Answered

This project is confidential and I do not wish to display it on UTS web pages. (If the confidentiality status changes (e.g. the project is made public by the funder) you can notify the Research Office so that can be published on relevant UTS web pages including your profile page.)

 Yes

**Export Controls** – Please visit the [DTC Staff Connect page](#) if you are unsure how to answer the below question/s

Does the transaction involve the export of defence or dual use items controlled under the Defence and Strategic Goods list (DSGL)?

 No
**Research Team**

**Include all the research team that is involved in the project**

Include all members of the project team. If there is a student involved in this project and UTS is assigning the project intellectual property to the funder, you will need the student to sign a Student IP assignment agreement prior to their involvement in the project; you can request the agreement in ResearchMaster

How do I request it?

1. Click on My Agreement/IPs->My Agreement/IP requests
2. Click on Create new
3. Select 'Student IP Assignment' Template
4. Complete the form

If you have any questions regarding the student IP assignment agreement, please email [contractadvice@uts.edu.au](mailto:contractadvice@uts.edu.au)

### Internal Fund Sources

For CRB stipends, you must select the "CRBHDR" as the fund source. (The UTSCRBCAS fund source is selected only for explicitly approved CRB cash contributions).

*This question is not answered.*

Are you the Head of School?

No

Does the project meet **ALL** the following criteria?

- Australian funder
- Work carried out in Australia
- [Background IP](#) is not currently being commercialised or developed as part of another project with a funder.
- The funder will own any source code, algorithms or methodology generated during the course of the project and therefore cannot be used by UTS for other projects..
- The funder will own the IP. UTS will have a licence of the IP for further research, teaching and academic purposes.
- UTS does not need ownership of any data created.

Yes

## Infrastructure/Costing

This project is:

non-laboratory/desk research (GIPA 3.1(3))

**Infrastructure conditions**

full infrastructure/indirect costs charged to funding body

Use the UTS Costing and Pricing tool to cost/price the project.

**Please don't forget to click complete in the costing tool before submitting this My Proposal**

Costing & Pricing Tool

**Internal Fund Sources**

*This question is not answered.*

**Does the project meet ALL the following criteria?**

- Australian funder
- Work carried out in Australia
- [Background IP](#) is not currently being commercialised or developed as part of another project with a funder.
- The funder will own any source code, algorithms or methodology generated during the course of the project and therefore cannot be used by UTS for other projects..
- The funder will own the IP. UTS will have a licence of the IP for further research, teaching and academic purposes.
- UTS does not need ownership of any data created.

Yes

## Engagement and Impact

### Engagement and Impact

UTS has committed through its [2027 Strategy](#) to deliver excellent research with impact and your proposal is your contribution to that commitment.

In this context impact is defined as 'the contribution that research makes to the economy, society, environment or culture, beyond the contribution to academic research'. It is often most efficiently achieved when researchers plan how they will engage with the external audiences who will use their research.

Which of the following summarises the degree of thinking about impact in your proposal?

- I will think about impact at a later stage

What is the intended impact for this project? Briefly summarise the impact if this research were to be adopted.

The intended impact is the ability of the Maritime industry to increase safety, reduce fuel cost reduction and reduce travel risk such as piracy and hazards at sea through visualisation of data and complex algorithms

What is the pathway to impact for this project? Briefly summarise your thinking on how adoption of this research will be achieved (you may be forecasting events well beyond the end date of this project).

Navantia Australia will obtain feedback about the the Ship Routing FUI and business decision making tool to guide the development path of the tool toward part of it's service offering.

Do you want to track your research engagement activities for this project?

If yes is selected, a collaborative [Record of Impact in Symplectic](#) will be created for you and your team.

- Yes

To learn more about using [Record of Impact in Symplectic](#), and about Engagement and Impact generally enrol in the [RESHub Research Impact online module](#).

## Risk management and ethics approval

### Ethics, Data, Health and Safety

The UTS Guidelines for the Management of Research Data articulates how data should be managed. Research data management planning should be undertaken in the beginning stages of your research project, using Stash

**Data:** -- Will you be storing data for this project?

For assistance, the [Research Management Policy](#) and [Guidelines for Research data management](#) advise how data should be managed. If you have any questions please contact the eResearch team - [eResearch-it@uts.edu.au](mailto:eResearch-it@uts.edu.au)

- no

**Human ethics:**-- research involving human participants and/or use of their data (this may include questionnaires, interviews, information regarding organisations or that is considered commercial-in-confidence).

- Not applicable

**Clinical trial:** -- research that prospectively assigns human participants or groups of humans to one or more health-related interventions to evaluate the effects on health outcomes.

- Not applicable

**Animal ethics** -- research involving the care and use of animals.

- Not applicable

**Biosafety:** -- research involving biological hazards such as genetically modified organisms (GMOs), pathogens, ionising radiation, cytotoxic substances and imported biological materials

- Not applicable

**Health and Safety:** -- research involving health and safety risk, such as: hazardous chemicals, genetically modified organisms (GMOs), pathogenic microorganisms, radiation apparatus/sources, laboratory/workshop equipment, animals, fieldwork, work in healthcare setting or hazardous work environment.

- no

## Classifications

### Research codes (FOR, SEO and TOA)

Research Classifications are important as they frame your research for a variety of audiences. Below are 3 frequently used classifications at UTS and in the Australian research sector. To find more information click [here](#).

- [Field of Research \(FOR\) codes](#) classify the disciplines in your research. They are an important part of the Excellence in Research in Australia (ERA) survey.
- [Socio-Economic Objective \(SEO\) codes](#) explain which part of the economy or part of society will benefit from the research. They are usually used when reflecting on the likely impact of research.
- [Types of Research and Development Activity \(TOA\) classification](#) breaks the research into four categories: Pure Basic, Strategic Basic, Applied, and Experimental. The allocated percentages must total 100%. The government uses this information to look at changes in the pattern of research that is occurring in different disciplines and regions.

#### Field of research (FOR)

1	<b>Classification Type</b>	Field Of Research Codes
	<b>FOR Code</b>	401599
	<b>Percentage</b>	100
	<b>Primary FOR?</b>	Yes
		Not Answered

#### Socio economic objective code (SEO)

1	<b>SEO Type</b>	Socio-Economic Objective Codes
	<b>SEO Code</b>	270410
	<b>Percentage</b>	100
	<b>Primary SEO?</b>	Yes
		Not Answered

**Type of activity (TOA)**, click on the "save" icon at the top right corner to show the total Strategic Basic 0.00; Pure Basic 0.00; Experiment Dev 0.00; Applied 100.00; Total % 100.00

## Confirmation

### Confirmation by first named UTS chief investigator

The UTS Library of Successful Grants is intended to assist the UTS research community in the development of strong grant applications and is only accessible to UTS staff. Applications can be stored in full or in part in the UTS Library of Successful Grants and can be removed at your discretion – see policy. If 'Yes' is selected, the Research Office will contact the project leader to identify whether information needs to be removed from the application before it is included in the library. If your proposal is successful, do you consent for the Research Office to add a secure PDF of your successful application to the UTS Library of Successful Grants?

No

**As the first named UTS chief investigator, I confirm:**

- data entered for this project is complete and accurate to the best of my knowledge
- I will comply with all relevant UTS policies and procedures
- all required approvals including [ethics](#), risk assessments and biosafety approvals (where required) will be obtained prior to the research commencing
- the budget complies with the [The Guidelines for research proposals and project management.](#),
- the funding section includes all requests for Faculty or Central Research Budget funding
- this project falls within the definition of "Research" in the [HERDC Specifications](#)

Conflicts of interest arise when persons are influenced, or appear to be influenced by personal interest when doing their job. Conflicts of interest of persons involved in the research project (the Project) may result in a lesser standard of independence than that required to maintain the integrity of the Project. In accordance with the [UTS Code of Conduct](#), Supervisors and Deans/Directors are responsible for taking action in relation to conflicts of interest that arise in their work areas.

**I hereby declare the following:**

- Any related interest that may create, or be perceived to create, a conflict of interest in relation to my role in the Project has been declared in accordance with the UTS Code of Conduct.
- I have made reasonable enquiries regarding any other person acting on behalf of UTS and involved with the Project having a potential, real or perceived conflict of interest relating to the Project, and any such conflicts of interest have been declared in accordance with the UTS Code of Conduct.

To sign off the project notification click on "I accept" in the Declaration Sign off.

### Internal Fund Sources

For CRB stipends, you must select the "CRBHDR" as the fund source. (The UTSCRBCAS fund source is selected only for explicitly approved CRB cash contributions).

This question is not answered.

Not Answered

Not Answered

### Infrastructure / indirect costs

Infrastructure conditions: full infrastructure/indirect cost charged

Is it a multi-faculty proposal?( e.g. UTS wide tenders or large govt grants involving multiple faculties. This does not apply to business as usual proposals where the research team includes staff from another faculty)

No

Does it require additional due diligence (international proposals to countries that are less than 50 on the [Transparency Index](#))?

No

Research activity is with organisations within the fossil fuels, alcohol, gambling and animal testing industries.

No

### Does the project meet ALL the following criteria?

- Australian funder
- Work carried out in Australia
- [Background IP](#) is not currently being commercialised or developed as part of another project with a funder.
- The funder will own any source code, algorithms or methodology generated during the course of the project and therefore cannot be used by UTS for other projects..
- The funder will own the IP. UTS will have a licence of the IP for further research, teaching and academic purposes.
- UTS does not need ownership of any data created.

Yes

Are you using any of the following contracts?

Standard UTS contract

You should check in [Staff Connect](#) if you are able to use a standard UTS contract or whether a standard Australian Government contract applies.

### C&P Summary

Total Applied Amount (price)

Awarded amount

Amount Retained by UTS

UTS cash contribution

Total Project cost (not including infrastructure, contingency and profit)

Institution Infrastructure %

Updated Infrastructure %

Is there any conflict of interest for the ADR to approve this proposal (e.g. FNCI is the ADR, ADR is on the project team)? You can use the "Other to endorse" option and select another reviewer (e.g. Dean)

No

### Confirmation

1. Confirmed by: type name in textbox below

GIPA 3.1(2)

**2. Date of faculty confirmation:**

13/12/2023

**The project is under faculty/institute delegations, The ADR will review the contract.**

**If a new fund source is requested, it needs to be created in ResearchMaster before being submitted it to the ADR. please email [pet.admin@uts.edu.au](mailto:pet.admin@uts.edu.au) before submitting it to ADR.**

Low Risk Proposal

**Protocol of Execution of Documents**

List the name of the other parties who will be signing this research agreement.

Navantia

Does this contract need to be on the [GIPA register?](#)

No

Entering into this contract does not breach any Autonomous Sanctions. **If you are unsure, check these links** [Sanctions regimes](#) and [Online Sanctions Administration System](#)

**The Dean or ADR has delegated authority to execute this contract.**

**This proposal needs to meet certain criteria in order to proceed:**

- the attached proposal is of sufficient quality in order for the Review process to occur
- the costing and pricing is appropriate for the project
- the infrastructure position is clear and acceptable to the faculty
- UTS cash and in-kind contributions are clear
- All relevant Faculty Forms have been attached.
- this project falls within the definition of "Research" in the [HERDC Specifications](#)
- Any staff or resources committed from other faculties/units (including Central Research Budget funding) have been agreed to by the appropriate delegate in those faculties/units

Have these criteria been met?

Yes

Comments

Agreement is as per template between Navantia and UTS - Joint Institute agreement, RES/623 - Schedule 4

**Confirmation by ADR**

**Have any of the following changed?**

None of the above

**Summary**

**The project is under faculty/institute delegations.**

#### Infrastructure / indirect costs

Infrastructure conditions: full infrastructure/indirect costs charged to funding body

*Travel, HDR (non-profit Australian organisation) or Equipment only:* For these funding types, waivers are automatically approved and no further evidence is required.

#### Infrastructure charges are:

Normally infrastructure charged for this type of project is 25% of total budget

#### Protocol for the Execution of Documents

**The Dean or ADR has delegated authority to execute this contract.**

List the name of the other parties who will be signing this research agreement.

Navantia

Does this contract need to be on the [GIPA register?](#)

No

Entering into this contract does not breach any Autonomous Sanctions. **If you are unsure, check these links** [Sanctions regimes](#) and [Online Sanctions Administration System](#)

#### Confirmation

#### 4. This proposal needs to meet certain criteria in order to proceed:

- the time allocation of named staff is reasonable in view of their workload
- the project remains feasible given the amount of funding approved
- the time allocation for equipment and facilities for this project are reasonable, bearing in mind the other uses of the equipment
- the ethics and safety implications of the project have been appropriately recorded
- this project falls within the definition of "Research" in the [HERDC Specifications](#)
- Any staff or resources committed from other faculties/units (including Central Research Budget funding) have been agreed to by the appropriate delegate in those faculties/units

Have these criteria been met?

Yes

Have you signed the agreement? Please note: you will not be able to proceed until the agreement is signed

Yes

Comments

See RM comments.

#### Check agreement-Ready to request activity code

Primary Organisation Name

FEIT.Engineering and IT Solutions - Rapido

Have all parties signed the agreement or accepted the conditions of award?

Yes

Is the Activity code required? (Mandatory when UTS spends money)

Yes

Details for invoicing contact at funding body

1. Fund Source Type: 10 External Research

2. Contact Name for Invoicing

GIPA 3.1(2)  
56 Pitt St, Sydney, NSW, 2000

3. Email

GI  
PA @navantia.com.au

4. Phone Number

GIPA 3.1(2) (Chief Investigator)

**Enter Outcome****Enter Outcome****Project Title** (maximum 200 characters)

Was the proposal successful in being funded?

 Yes

The organisation unit code for this project request should be the organisation unit code of the Primary contact / 0.First named UTS chief investigator, if it is different, please assign the correct AOU.

Congratulations on receiving funding for your proposal! This form allows you to record changes to the project structure based on the amount of funding received. You will need to answer a few questions relating to ethics, health and safety and the type of research being undertaken.

**Review Previously Entered Info****Proposal Details****Have any of the following changed?** None of the above

**Update this My Proposal record and ensure that the info in Costing & Pricing tool/spreadsheet is still appropriate.**

**Project Title** (maximum 200 characters)

Project description (maximum 2000 characters)

Does any portion of this project utilise UTS Tech Lab?

 No**Select research type** Externally funded (grants, tender, contract research, scholarships)

**Project type** do **NOT** leave it as "application", choose the relevant project type.

**Is UTS the administering organisation?**

If you have entered a fund scheme and you want to change this, you will need to remove the fund scheme first.

 Yes**External Application ID** (if applicable, e.g ARC, NHMRC, RMS No., etc)
**Estimated start date**

**Estimated end date**

**Any Comments**

Not Answered

This project is confidential and I do not wish to display it on UTS web pages. (If the confidentiality status changes (e.g. the project is made public by the funder) you can notify the Research Office so that can be published on relevant UTS web pages including your profile page.)

 Yes

**Export Controls** – Please visit the [DTC Staff Connect page](#) if you are unsure how to answer the below question/s

Does the transaction involve the export of defence or dual use items controlled under the Defence and Strategic Goods list (DSGL)?

 No
**Research Team**

**Include all the research team that is involved in the project**

Include all members of the project team If there is a student involved in this project and UTS is assigning the project intellectual property to the funder, you will need the student to sign a Student IP assignment agreement prior to their involvement in the project; you can request the agreement in ResearchMaster

How do I request it?

1. Click on My Agreement/IPs->My Agreement/IP requests
2. Click on Create new
3. Select 'Student IP Assignment' Template
4. Complete the form

If you have any questions regarding the student IP assignment agreement, please email [contractadvice@uts.edu.au](mailto:contractadvice@uts.edu.au)

\$GIPA 3.1(3)

**Internal Fund Sources**

For CRB stipends, you must select the "CRBHDR" as the fund source. (The UTSCRBCAS fund source is selected only for explicitly approved CRB cash contributions).

*This question is not answered.*

Are you the Head of School?

No

**Does the project meet ALL the following criteria?**

- Australian funder
- Work carried out in Australia
- [Background IP](#) is not currently being commercialised or developed as part of another project with a funder.
- The funder will own any source code, algorithms or methodology generated during the course of the project and therefore cannot be used by UTS for other projects.
- The funder will own the IP. UTS will have a licence of the IP for further research, teaching and academic purposes.
- UTS does not need ownership of any data created.

Yes

**Infrastructure/Costing**

**This project is:**

non-laboratory/desk research(25% total: 19% to faculty, 6% to UTS)

**Infrastructure conditions**

full infrastructure/indirect costs charged to funding body

Use the UTS Costing and Pricing tool to cost/price the project.

**Please don't forget to click complete in the costing tool before submitting this My Proposal**

Costing & Pricing Tool

**Costing Summary**

## Internal Fund Sources

*This question is not answered.*

### Does the project meet **ALL** the following criteria?

- Australian funder
- Work carried out in Australia
- [Background IP](#) is not currently being commercialised or developed as part of another project with a funder.
- The funder will own any source code, algorithms or methodology generated during the course of the project and therefore cannot be used by UTS for other projects..
- The funder will own the IP. UTS will have a licence of the IP for further research, teaching and academic purposes.
- UTS does not need ownership of any data created.

Yes

## Engagement and Impact

### Engagement and Impact

UTS has committed through its [2027 Strategy](#) to deliver excellent research with impact and your proposal is your contribution to that commitment.

In this context impact is defined as 'the contribution that research makes to the economy, society, environment or culture, beyond the contribution to academic research'. It is often most efficiently achieved when researchers plan how they will engage with the external audiences who will use their research.

Which of the following summarises the degree of thinking about impact in your proposal?

Planning for impact is built into my proposal

What is the intended impact for this project? Briefly summarise the impact if this research were to be adopted.

Application of state-of-the-art technologies and algorithms to solving defence related business problems

What is the pathway to impact for this project? Briefly summarise your thinking on how adoption of this research will be achieved (you may be forecasting events well beyond the end date of this project).

The pathway is further development by Navantia to provide the Australia Navy with a product ready system.

Do you want to track your research engagement activities for this project?

If yes is selected, a collaborative [Record of Impact in Symplectic](#) will be created for you and your team.

No

To learn more about using [Record of Impact in Symplectic](#), and about Engagement and Impact generally enrol in the [RESHub Research Impact online module](#).

## Risk management and ethics approval

### Ethics, Data, Health and Safety

The UTS Guidelines for the Management of Research Data articulates how data should be managed. Research data management planning should be undertaken in the beginning stages of your research project, using Stash

**Data:** -- Will you be storing data for this project?

For assistance, the [Research Management Policy](#) and [Guidelines for Research data management](#) advise how data should be managed. If you have any questions please contact the eResearch team - [eResearch-it@uts.edu.au](mailto:eResearch-it@uts.edu.au)

no

**Human ethics:**-- research involving human participants and/or use of their data (this may include questionnaires, interviews, information regarding organisations or that is considered commercial-in-confidence).

Not applicable

**Clinical trial:** -- research that prospectively assigns human participants or groups of humans to one or more health-related interventions to evaluate the effects on health outcomes.

Not applicable

**Animal ethics** -- research involving the care and use of animals.

Not applicable

**Biosafety:** -- research involving biological hazards such as genetically modified organisms (GMOs), pathogens, ionising radiation, cytotoxic substances and imported biological materials

Not applicable

**Health and Safety:** -- research involving health and safety risk, such as: hazardous chemicals, genetically modified organisms (GMOs), pathogenic microorganisms, radiation apparatus/sources, laboratory/workshop equipment, animals, fieldwork, work in healthcare setting or hazardous work environment.

no

## Classifications

### Research codes (FOR, SEO and TOA)

Research Classifications are import as they frame your research for a variety of audiences Below are 3 frequently used classifications at UTS and in the Australian research sector. to find more information click [here](#).

- [Field of Research \(FOR\) codes](#) classify the disciplines in your research. They are an important part of the Excellence in Research in Australia (ERA) survey.
- [Socio-Economic Objective \(SEO\) codes](#) explain which part of the economy or part of society will benefit from the research. They are usually used when reflecting on the likely impact of research.
- [Types of Research and Development Activity \(TOA\) classification](#) breaks the research into four categories: Pure Basic, Strategic Basic, Applied, and Experimental. The allocated percentages must total 100%. The government uses this information to look at changes in the pattern of research that is occurring in different disciplines and regions.

#### Field of research (FOR)

1	<b>Classification Type</b>	Field Of Research Codes
	<b>FOR Code</b>	460601
	<b>Percentage</b>	60

## Confirmation

### Confirmation by first named UTS chief investigator

The UTS Library of Successful Grants is intended to assist the UTS research community in the development of strong grant applications and is only accessible to UTS staff. Applications can be stored in full or in part in the UTS Library of Successful Grants and can be removed at your discretion – see policy. If 'Yes' is selected, the Research Office will contact the project leader to identify whether information needs to be removed from the application before it is included in the library. If your proposal is successful, do you consent for the Research Office to add a secure PDF of your successful application to the UTS Library of Successful Grants?

No

#### As the first named UTS chief investigator, I confirm:

- data entered for this project is complete and accurate to the best of my knowledge
- I will comply with all relevant UTS policies and procedures
- all required approvals including [ethics](#), risk assessments and biosafety approvals (where required) will be obtained prior to the research commencing
- the budget complies with the [The Guidelines for research proposals and project management.](#)
- the funding section includes all requests for Faculty or Central Research Budget funding
- this project falls within the definition of "Research" in the [HERDC Specifications](#)

Conflicts of interest arise when persons are influenced, or appear to be influenced by personal interest when doing their job. Conflicts of interest of persons involved in the research project (the Project) may result in a lesser standard of independence than that required to maintain the integrity of the Project. In accordance with the [UTS Code of Conduct](#), Supervisors and Deans/Directors are responsible for taking action in relation to conflicts of interest that arise in their work areas.

#### I hereby declare the following:

- Any related interest that may create, or be perceived to create, a conflict of interest in relation to my role in the Project has been declared in accordance with the UTS Code of Conduct.
- I have made reasonable enquiries regarding any other person acting on behalf of UTS and involved with the Project having a potential, real or perceived conflict of interest relating to the Project, and any such conflicts of interest have been declared in accordance with the UTS Code of Conduct.

To sign off the project notification click on "I accept" in the Declaration Sign off.

#### Internal Fund Sources

For CRB stipends, you must select the "CRBHDR" as the fund source. (The UTSRCBCAS fund source is selected only for explicitly approved CRB cash contributions).

*This question is not answered.*

Not Answered

Not Answered

#### Infrastructure / indirect costs

Infrastructure conditions: full infrastructure/indirect cost charged

Is it a multi-faculty proposal?( e.g. UTS wide tenders or large govt grants involving multiple faculties. This does not apply to business as usual proposals where the research team includes staff from another faculty)

No

Does it require additional due diligence (international proposals to countries that are less than 50 on the [Transparency Index](#))?

No

Research activity is with organisations within the fossil fuels, alcohol, gambling and animal testing industries.

Yes

**Does the project meet ALL the following criteria?**

- Australian funder
- Work carried out in Australia
- [Background IP](#) is not currently being commercialised or developed as part of another project with a funder.
- The funder will own any source code, algorithms or methodology generated during the course of the project and therefore cannot be used by UTS for other projects..
- The funder will own the IP. UTS will have a licence of the IP for further research, teaching and academic purposes.
- UTS does not need ownership of any data created.

Yes

Are you using any of the following contracts?

None of the above

**C&P Summary**

Total Applied Amount (price)

Awarded amount

Amount Retained by UTS

UTS cash contribution

Total Project cost (not including infrastructure, contingency and profit)

Institution Infrastructure %

Updated Infrastructure %

Is there any conflict of interest for the ADR to approve this proposal (e.g. FNCI is the ADR, ADR is on the project team)? You can use the "Other to endorse" option and select another reviewer (e.g. Dean)

No

**Confirmation**

**1. Confirmed by:** type name in textbox below

**2. Date of faculty confirmation:**

**This proposal needs to meet certain criteria in order to proceed:**

- the attached proposal is of sufficient quality in order for the Review process to occur
- the costing and pricing is appropriate for the project
- the infrastructure position is clear and acceptable to the faculty
- UTS cash and in-kind contributions are clear
- All relevant Faculty Forms have been attached.
- this project falls within the definition of "Research" in the [HERDC Specifications](#)
- Any staff or resources committed from other faculties/units (including Central Research Budget funding) have been agreed to by the appropriate delegate in those faculties/units

Have these criteria been met?

Yes

Comments

**Confirmation by ADR**

Have any of the following changed?

None of the above

### Summary

Total Applied Amount (price)

Amount to UTS

UTS cash contribution

UTS in-kind contribution

Total Project cost (not including infrastructure, contingency and profit)

## Infrastructure / indirect costs

Infrastructure conditions: full infrastructure/indirect costs charged to funding body

*Travel, HDR (non-profit Australian organisation) or Equipment only:* For these funding types, waivers are automatically approved and no further evidence is required.

## Infrastructure charges are:

Normally infrastructure charged for this type of project is 25% of total budget

## Confirmation

## 4. This proposal needs to meet certain criteria in order to proceed:

- the time allocation of named staff is reasonable in view of their workload
- the project remains feasible given the amount of funding approved
- the time allocation for equipment and facilities for this project are reasonable, bearing in mind the other uses of the equipment
- the ethics and safety implications of the project have been appropriately recorded
- this project falls within the definition of "Research" in the [HERDC Specifications](#)
- Any staff or resources committed from other faculties/units (including Central Research Budget funding) have been agreed to by the appropriate delegate in those faculties/units

Have these criteria been met?

Yes

Comments

Project Title : Power-Efficient Electronically Beam Scanning Antenna Array for Aquatic Drones Communications with LEO Satellites.  
Date Received :  
Primary Contact : A/Prof Peiyuan Qin (0First Named UTS Chief Investigator)  
Other Contacts : GIPA 3.1(2) (Faculty Development Support )  
GIPA 3.1(2) (Chief Investigator)  
GIPA 3.1(2) (Chief Investigator)  
GIPA 3.1(2) (Research Office- Case Manager)  
GIPA 3.1(2) (Chief Investigator)

**Enter Outcome****Enter Outcome****Project Title** (maximum 200 characters)

Power-Efficient Electronically Beam Scanning Antenna Array for Aquatic Drones Communications with LEO Satellites.

Was the proposal successful in being funded?

Yes

The organisation unit code for this project request should be the organisation unit code of the Primary contact / 0.First named UTS chief investigator, if it is different, please assign the correct AOU.

FEIT.School of Electrical and Data Engineering

Congratulations on receiving funding for your proposal! This form allows you to record changes to the project structure based on the amount of funding received. You will need to answer a few questions relating to ethics, health and safety and the type of research being undertaken.

**Review Previously Entered Info****Proposal Details****Have any of the following changed?**

- Start/End Date
- Research team

**Update this My Proposal record and ensure that the info in Costing & Pricing tool/spreadsheet is still appropriate.**

Update estimated start dated/end date

Update Research Team

**Project Title** (maximum 200 characters)

Power-Efficient Electronically Beam Scanning Antenna Array for Aquatic Drones Communications with LEO Satellites.

## Project description (maximum 2000 characters)

Not Answered

Does any portion of this project utilise UTS Tech Lab?

No

**Select research type**

- Externally funded (grants, tender, contract research, scholarships)

**Project type** do **NOT** leave it as "application", choose the relevant project type.

P: CRC project

**Is UTS the administering organisation?**

If you have entered a fund scheme and you want to change this, you will need to remove the fund scheme first.

Yes

**External Application ID** (if applicable, e.g ARC, NHMRC, RMS No., etc)

Not Answered

**Estimated start date**

01/07/2024

**Estimated end date**

01/07/2025

**Any Comments**

Not Answered

**This project is confidential and I do not wish to display it on UTS web pages. (If the confidentiality status changes (e.g. the project is made public by the funder) you can notify the Research Office so that can be published on relevant UTS web pages including your profile page.)**

 Yes
**Research Team**

**Include all the research team that is involved in the project**

Include all members of the project team If there is a student involved in this project and UTS is assigning the project intellectual property to the funder, you will need the student to sign a Student IP assignment agreement prior to their involvement in the project; you can request the agreement in ResearchMaster

How do I request it?

1. Click on My Agreement/IPs->My Agreement/IP requests
2. Click on Create new
3. Select 'Student IP Assignment' Template
4. Complete the form

If you have any questions regarding the student IP assignment agreement, please email [contractadvice@uts.edu.au](mailto:contractadvice@uts.edu.au)

**Engagement and Impact**

**Engagement and Impact**

UTS has committed through its [2027 Strategy](#) to deliver excellent research with impact and your proposal is your contribution to that commitment.

In this context impact is defined as 'the contribution that research makes to the economy, society, environment or culture, beyond the contribution to academic research'. It is often most efficiently achieved when researchers plan how they will engage with the external audiences who will use their research.

Which of the following summarises the degree of thinking about impact in your proposal?

- Planning for impact is built into my proposal

What is the intended impact for this project? Briefly summarise the impact if this research were to be adopted.

The project significantly contributes to the SmartSat CRC's impacts by advancing satellite and communication technologies. GIPA s.3.1 (3) / (4)

What is the pathway to impact for this project? Briefly summarise your thinking on how adoption of this research will be achieved (you may be forecasting events well beyond the end date of this project).

1. Prototype fabrication and measurement
2. Journal paper publishment
3. Conference paper publishemnt
4. Organising workshops.

Do you want to track your research engagement activities for this project?

If yes is selected, a collaborative [Record of Impact in Symplectic](#) will be created for you and your team.

- No

To learn more about using [Record of Impact in Symplectic](#), and about Engagement and Impact generally enrol in the [RESHub Research Impact online module](#).

## Risk management and ethics approval

### Ethics, Data, Health and Safety

The UTS Guidelines for the Management of Research Data articulates how data should be managed. Research data management planning should be undertaken in the beginning stages of your research project, using Stash

**Data:** -- Will you be storing data for this project?

For assistance, the [Research Management Policy](#) and [Guidelines for Research data management](#) advise how data should be managed. If you have any questions please contact the eResearch team - [eResearch-it@uts.edu.au](mailto:eResearch-it@uts.edu.au)

yes

Please complete your data management plan in the [eResearch stash tool](#).

For assistance with your data management plan, please contact eResearch at [eResearch-it@uts.edu.au](mailto:eResearch-it@uts.edu.au)

**Human ethics:**-- research involving human participants and/or use of their data (this may include questionnaires, interviews, information regarding organisations or that is considered commercial-in-confidence).

Not applicable

**Clinical trial:** -- research that prospectively assigns human participants or groups of humans to one or more health-related interventions to evaluate the effects on health outcomes.

Not applicable

**Animal ethics** -- research involving the care and use of animals.

Not applicable

**Biosafety:** -- research involving biological hazards such as genetically modified organisms (GMOs), pathogens, ionising radiation, cytotoxic substances and imported biological materials

Not applicable

**Health and Safety:** -- research involving health and safety risk, such as: hazardous chemicals, genetically modified organisms (GMOs), pathogenic microorganisms, radiation apparatus/sources, laboratory/workshop equipment, animals, fieldwork, work in healthcare setting or hazardous work environment.

no

## Classifications

### Research codes (FOR, SEO and TOA)

Research Classifications are import as they frame your research for a variety of audiences

Below are 3 frequently used classifications at UTS and in the Australian research sector. to find more information click [here](#).

- [Field of Research \(FOR\) codes](#) classify the disciplines in your research. They are an important part of the Excellence in Research in Australia (ERA) survey.
- [Socio-Economic Objective \(SEO\) codes](#) explain which part of the economy or part of society will benefit from the research. They are usually used when reflecting on the likely impact of research.
- [Types of Research and Development Activity \(TOA\) classification](#) breaks the research into four categories: Pure Basic, Strategic Basic, Applied, and Experimental. The allocated percentages must total 100%. The government uses this information to look at changes in the pattern of research that is occurring in different disciplines and regions.

### Field of research (FOR)

1	<b>Classification Type</b>	Field Of Research Codes
	<b>FOR Code</b>	400601
	<b>Percentage</b>	100
	<b>Primary FOR?</b>	Yes
		Not Answered

### Socio economic objective code (SEO)

1	<b>SEO Type</b>	Socio-Economic Objective Codes
	<b>SEO Code</b>	220106
	<b>Percentage</b>	100
	<b>Primary SEO?</b>	Yes
		Not Answered

**Type of activity (TOA)**, click on the "save" icon at the top right corner to show the total  
Strategic Basic 0.00; Pure Basic 0.00; Experiment Dev 0.00; Applied 0.00; Total % 0.00

## Confirmation

### Confirmation by first named UTS chief investigator

The UTS Library of Successful Grants is intended to assist the UTS research community in the development of strong grant applications and is only accessible to UTS staff. Applications can be stored in full or in part in the UTS Library of Successful Grants and can be removed at your discretion – see policy. If 'Yes' is selected, the Research Office will contact the project leader to identify whether information needs to be removed from the application before it is included in the library. If your proposal is successful, do you consent for the Research Office to add a secure PDF of your successful application to the UTS Library of Successful Grants?

No

**As the first named UTS chief investigator, I confirm:**

- data entered for this project is complete and accurate to the best of my knowledge
- I will comply with all relevant UTS policies and procedures
- all required approvals including [ethics](#), risk assessments and biosafety approvals (where required) will be obtained prior to the research commencing
- the budget complies with the [The Guidelines for research proposals and project management.](#),
- the funding section includes all requests for Faculty or Central Research Budget funding
- this project falls within the definition of "Research" in the [HERDC Specifications](#)

Conflicts of interest arise when persons are influenced, or appear to be influenced by personal interest when doing their job. Conflicts of interest of persons involved in the research project (the Project) may result in a lesser standard of independence than that required to maintain the integrity of the Project. In accordance with the [UTS Code of Conduct](#), Supervisors and Deans/Directors are responsible for taking action in relation to conflicts of interest that arise in their work areas.

**I hereby declare the following:**

- Any related interest that may create, or be perceived to create, a conflict of interest in relation to my role in the Project has been declared in accordance with the UTS Code of Conduct.
- I have made reasonable enquiries regarding any other person acting on behalf of UTS and involved with the Project having a potential, real or perceived conflict of interest relating to the Project, and any such conflicts of interest have been declared in accordance with the UTS Code of Conduct.

To sign off the project notification click on "I accept" in the Declaration Sign off.

**Infrastructure / indirect costs**

Infrastructure conditions: fund sources excludes full/partial infrastructure costs(requires infrastructure waiver)

**Research funding for:**

None of the above

**Infrastructure charges are:**

Normally infrastructure charged for this type of project is 25% of total budget

**Reason for waiver (i.e., Funding Rules excludes Infrastructure/indirect costs, overheads or administrative costs).**

CRC Project

Is it a multi-faculty proposal?( e.g. UTS wide tenders or large govt grants involving multiple faculties. This does not apply to business as usual proposals where the research team includes staff from another faculty)

No

Does it require additional due diligence (international proposals to countries that are less than 50 on the [Transparency Index](#))?

No

Research activity is with organisations within the fossil fuels, alcohol, gambling and animal testing industries.

No

UTS cash contribution

Total Project cost (not including infrastructure, contingency and profit)

Institution Infrastructure %

Updated Infrastructure %

Is there any conflict of interest for the ADR to approve this proposal (e.g. FNCI is the ADR, ADR is on the project team)? You can use the "Other to endorse" option and select another reviewer (e.g. Dean)

No

### Confirmation

**1. Confirmed by:** type name in textbox below

GIPA 3.1(2)

**2. Date of faculty confirmation:**

12/06/2024

**This proposal needs to meet certain criteria in order to proceed:**

- the attached proposal is of sufficient quality in order for the Review process to occur
- the costing and pricing is appropriate for the project
- the infrastructure position is clear and acceptable to the faculty
- UTS cash and in-kind contributions are clear
- All relevant Faculty Forms have been attached.
- this project falls within the definition of "Research" in the [HERDC Specifications](#)
- Any staff or resources committed from other faculties/units (including Central Research Budget funding) have been agreed to by the appropriate delegate in those faculties/units

Have these criteria been met?

Yes

Comments

the agreement is ready to be signed

Research manager comments/justifications for infrastructure/indirect cost waiver/reduction.

CRC projects, overheads is not allowed

**Infrastructure / indirect costs**

Infrastructure conditions: fund sources excludes full/partial infrastructure costs

**Research funding for:**

None of the above

**Infrastructure charges are:**

Normally infrastructure charged for this type of project is 25% of total budget

**Reason for waiver (i.e., Funding Rules excludes Infrastructure/indirect costs, overheads or administrative costs).**

CRC Project

Research manager comments/justifications for infrastructure/indirect cost waiver/reduction.

CRC projects, overheads is not allowed

#### Confirmation

#### 4. This proposal needs to meet certain criteria in order to proceed:

- the time allocation of named staff is reasonable in view of their workload
- the project remains feasible given the amount of funding approved
- the time allocation for equipment and facilities for this project are reasonable, bearing in mind the other uses of the equipment
- the ethics and safety implications of the project have been appropriately recorded
- this project falls within the definition of "Research" in the [HERDC Specifications](#)
- Any staff or resources committed from other faculties/units (including Central Research Budget funding) have been agreed to by the appropriate delegate in those faculties/units

Have these criteria been met?

Yes

policy

For more information, refer to the [UTS Research Policy](#).

## Indirect Cost

### Indirect Costs

It is important for UTS to capture and fully understand the true cost of undertaking research. This includes all direct and indirect costs.

Indirect costs are those related to activities, tasks or resources that are necessary to support the research but are not directly attributable to the project. These are the costs of central and distributed services shared by other activities that are not project specific. They are a real cost borne by the university and therefore need to be recovered. Examples include infrastructure, the use of common library and other physical facilities by researchers (which do not incur per use charges), support and administration costs, etc.

faq

For more information, refer to [Research Finance Procedures](#).

Is this project primarily Laboratory/Field based or Non-Laboratory/Desk based?

Non-Laboratory/Desk based

### Indirect Cost Conditions

- Full indirect costs charged to funding body

### New Equipment and Digital Tools

UTS has access to some world class facilities and equipment - for the moment these are captured as indirect costs to your project. In future releases we will introduce ways to show these as direct costs to help sustain this critical infrastructure and to enable better usage scheduling.

Currently, this page helps you communicate to Laboratory Managers and eResearch staff that new equipment, significant storage or software is required. Identifying the facility, equipment and digital tool requirements for research undertaken at UTS helps to avoid unnecessary cost and effort to procure items that are already available at UTS, and determine the costs for resources that are not currently provided. These new resources should be included on the **Non-Salary and Other Items** page.

### eResearch

eResearch refers to the application of Information Technology to research. Please indicate if any of the following eResearch resources will be used in this project;

eResearch Storage

No special storage

High-Performance Computing (HPC)

No HPC needed

### Significant UTS Infrastructure

Will any of the following pieces of UTS infrastructure be used in this project?

None

### New Equipment and Software

#### Are you introducing new equipment to UTS as part of this project?

If Yes, add the name and description of what is required and contact the Faculty Research Office for assistance on steps to either locate or procure the facility or equipment required.

No

**Additional software required for this research project**

UTS already offers a range of tools and software available at no additional cost for research projects, including survey tools (Qualtrics, REDCap) and statistics software. For more information on existing tools and software available, refer to [RES Hub](#), [eResearch](#), and [ServiceConnect](#) (knowledge base).

Does this project require any new software not already available at UTS

No

**Non-salary and Other Items**

Enter the estimated amounts for the non-salary items required for the project.

Select each non-salary item required for the project and enter the total amount for each line.

<p><b>Other costs</b></p> <p>Miscellaneous \$ <input type="text" value="GIPA 3.1(3)"/></p>
--

[policy](#)

**Costing and Pricing Summary**

Use the Costing and Pricing Tool to complete the project costs and total price.

Click below

[Costing and Pricing Tool](#)

[faq](#)

For instructions on how to use this tool, refer to the [Costing and Pricing training module](#).

**Costing Status**

The status will change to "Valid" once the Costing and Pricing Tool has been completed.

**Total Cost**

**Total Price**

**Total Project Amount: Cash (excl. GST) and In-kind**

**Amount retained at UTS**

**UTS Cash Contribution**

**UTS In-kind Contribution**

**Total Contribution by UTS**

[policy](#)

For more information, refer to the [UTS Research Policy](#).

## Engagement & Impact

UTS has committed through its [2027 Strategy](#) to deliver excellent research with impact and your proposal is your contribution to that commitment.

In this context impact is defined as 'the contribution that research makes to the economy, society, environment or culture, beyond the contribution to academic research'. It is often most efficiently achieved when researchers plan how they will engage with the external audiences who will use their research.

Which of the following summarises the degree of thinking about impact in your proposal?

- I will think about impact at a later stage

What is the intended impact for this project? Briefly summarise the impact if this research were to be adopted.

The project will enable a scalable deployment of gamification infrastructure for Navantia.

What is the pathway to impact for this project? Briefly summarise your thinking on how adoption of this research will be achieved (you may be forecasting events well beyond the end date of this project).

Navantia will implement the gamification architecture and commercialize it.

Do you want to track your research engagement activities for this project?

If yes is selected, a collaborative [Record of Impact in Symplectic](#) will be created for you and your team.

- No

[faq](#)

To learn more about using [Record of Impact in Symplectic](#), and about Engagement and Impact generally enrol in the [RESHub Research Impact online module](#).

## Proposal Documents

Attach all documents relevant to this proposal.

Document Naming Convention

Files should be uploaded with an appropriate naming convention that aligns with the UTS record management software – Content Manager. For example:

1. Proposal\_Draft DDMMYYYY
2. Proposal\_Final DDMMYYYY
3. Agreement\_Final DDMMYYYY
4. FundingGuidelines\_IndirectCostExemption DDMMYYYY
5. InternalCashCommitments DDMMYYYY

## Research Project Compliance

### Ethics, Data, Health and Safety

The UTS Guidelines for the Management of Research Data articulates how data should be managed. Research data management planning should be undertaken in the beginning stages of your research project, using Stash

## Data

**Data:** -- Will you be storing data for this project?

For assistance, the [Research Management Policy](#) and [Guidelines for Research data management](#) advise how data should be managed. If you have any questions please contact the eResearch team - [eResearch-it@uts.edu.au](mailto:eResearch-it@uts.edu.au)

no

## Ethics

**Human ethics:**-- research involving human participants and/or use of their data (this may include questionnaires, interviews, information regarding organisations or that is considered commercial-in-confidence).

Not applicable

**Clinical trial:** -- research that prospectively assigns human participants or groups of humans to one or more health-related interventions to evaluate the effects on health outcomes.

Not applicable

**Animal ethics** -- research involving the care and use of animals.

Not applicable

**Biosafety:** -- research involving biological hazards such as genetically modified organisms (GMOs), pathogens, ionising radiation, cytotoxic substances and imported biological materials

Not applicable

## Health and Safety

**This project involves health and safety risks**, including fieldwork, biosafety dealings, hazardous chemicals, laboratory/workshop related equipment, diving, plug-in electrical equipment, environmental, or other hazardous activities

no

## Compliance and Risk

Some projects may require

- certain approvals (e.g. ethics or biosafety approvals to be in place prior to commencing the work).
- a risk assessment by the UTS Research Risk Manager to identify any with potential high-risks (e.g. where the research activity is with certain organisations, or involves dual use items).

## Ethics

Ethics approval is required for:

- Research with or about [people](#), or their data/information or tissue
- Research or teaching involving [animals](#) (including observational studies)
- Research or teaching involving [GMOs, PC2 pathogens or ionising radiation](#)

## Risk

These questions are used to identify potentially high-risk projects that require a risk assessment by the UTS Research Risk Manager.

Does the project involve work with organisations from countries with a score of less than 50 on the [Transparency Index](#)?

No

Does the research activity involve organisations:

- within the defence industry (excluding Australian defence/government organisations)
- within the fossil fuel industry
- within the alcohol or gambling industry
- within the aerospace industry (excluding Australian government organisations)
- developing or applying surveillance technology (including facial, body and voice recognition)
- conducting animal testing

Yes

Does the research activity involve the export of defence or dual use items controlled under the Defence and Strategic Goods List ([DSGL](#))?

No

### External Parties Identifications

Name and address of the external parties involved in this proposal.

Navantia Australia Pty Ltd.  
56 Pitt St, Sydney NSW 2000

What do the external parties do?

Ship building

Industry sectors that the external parties operate in

Defence/Navy

### External Parties Activities

Brief description of the research activities.

Investigate technologies for implementing gamified training.

What is, or will be the purpose of the activities?

To develop a cloud platform to develop gamified training modules and deploy them.

How will the proposed activities benefit UTS?

Collaboration with defence sector and gaining expertise in defence related technologies.

### Relationships and Research Activities with External Parties

How long have we known the proposed external parties?

3 years

### Financial Contribution

Estimate the financial contribution of each country listed above.

\$ GIPA 3.1(3)

### Relationships with External Parties

Has UTS had any previous or current relationships with any proposed external party?

Yes

Give details including how long UTS has been in a relationship with each known external party

UTS has been doing projects with Navantia Australia for the last 3 years.

Is one or more of the external parties new to UTS?

No

Are there any personal relationships or other interests between any of the UTS staff involved in the project and the external parties or its directors?

No

### Intellectual Property (IP)

Is IP expected to be created by this research project?

Yes

What is the nature of the IP created from the project?

Gamified training architecture and reference implementation.

Who will own the IP that is generated from the research activity?

Navantia Australia Pty Ltd.

Does the combination of the nature of IP and ownership represent any concerns?

No

### Influence

Are there any proposed conditions or outcomes being imposed by the external parties which:

- limit uts's freedom of enquiry or encroach on academic freedom
- lead to a conflict of interest with the ethics, objectives and principles of the university

No

### Health & Safety

Will the opportunity involve UTS having any staff or students overseas (outside of Australia)?

If yes, please ensure you contact UTS Insurance at [insurance@uts.edu.au](mailto:insurance@uts.edu.au)

No

policy

For more information, refer to the [UTS Risk Management Policy](#).

### Research Codes

Research Codes are important as they categorise your research in various ways. They allow your work to be represented in reports on research discipline and application area and a key enabler of capability reporting when assessing new funding opportunities.

Below are 4 frequently used classifications at UTS and in the Australian research sector. To find more information click [here](#).

- [Field of Research \(FOR\)](#) codes classify the disciplines in your research. They are an important part of the Excellence in Research in Australia (ERA) survey.
- [Socio-Economic Objective \(SEO\)](#) codes explain which part of the economy or part of society will benefit from the research. They are usually used when reflecting on the likely impact of research.
- [Sustainable Development Goals \(SDG\)](#) The 2030 Agenda for Sustainable Development, adopted by all United Nations Member States in 2015, provides a shared blueprint for peace and prosperity for people and the planet, now and into the future. At its heart are the 17 Sustainable Development Goals (SDGs), which are an urgent call for action by all countries.
- [Types of Research and Development Activity \(TOA\)](#) classification breaks the research into four categories: Pure Basic, Strategic Basic, Applied, and Experimental. The allocated percentages must total 100%. The government uses this information to look at changes in the pattern of research that is occurring in different disciplines and regions.

### Field of Research (FOR)

1	<b>Classification Type</b>	Field Of Research Codes
	<b>FOR Code</b>	4606
	<b>Percentage</b>	100
	<b>Primary FOR?</b>	Yes
		Not Answered

Socio Economic Objective code (SEO)

1	<b>SEO Type</b>	Socio-Economic Objective Codes
	<b>SEO Code</b>	140199
	<b>Percentage</b>	100
	<b>Primary SEO?</b>	Yes
		Not Answered

**Type of Activity (TOA)**, click on the "Save" icon at the top right corner to show the total.  
Strategic Basic 0.00; Pure Basic 0.00; Experiment Dev 100.00; Applied 0.00; Total % 100.00

Sustainable Development Goals (SDG)

*This question is not answered.*

## Confirmation

### Project Leader Confirmation and Submission

As the UTS Project Leader, I confirm:

- data entered for this project is complete and accurate to the best of my knowledge;
- I will comply with all relevant UTS policies and procedures;
- all required approvals including ethics, risk assessments and biosafety approvals (where required) will be obtained prior to the research commencing;
- the budget complies with the UTS Research Policy and procedures;
- the Project Type and Funder/Client Details page includes all approved internal fund sources and amounts such as Central, Faculty, School, etc;
- this project falls within the definition of "Research" according to the HERDC Specifications;
- any related interest that may create, or be perceived to create, a conflict of interest in relation to my role in the Project has been declared in accordance with the UTS Code of Conduct.

To sign off the project notification **click on "I Accept" to accept the declaration.** The sign off date will then be generated.

1	Full Name	Mr Herve Harvard
	Position	0First Named UTS Chief Investigator
	Declaration Signed?	Yes
	Signoff Date	14/03/2024
		Not Answered

Click the **'Submit'** button in the Actions menu on the right to progress the review and approval process under UTS standard delegations. The Project Leader will receive a system email with useful next steps while the internal approvals are progressing and the funding outcome is decided.

### Research Risk Manager

Does this proposal require a risk assessment?

No

Do you recommend this proposal to proceed?

Yes

Recommendation

No concerns identified in proceeding with the project. UTS has an overarching agreement with Navantia and this project will fall under the overarching agreement.

policy

For more information, refer to the [UTS Risk Management Policy](#).

## Risk Delegate

### Risk Manager Recommendation

**Research Risk Manager has recommended this proposal to proceed**

Recommendation

No concerns identified in proceeding with the project. UTS has an overarching agreement with Navantia and this project will fall under the overarching agreement.

**Internal UTS fund sources**

*This question is not answered.*

Primary Fund Scheme

2182 - Navantia

**Indirect Cost Recovery**

Is this project primarily Laboratory/Field based or Non-Laboratory/Desk based?

Non-Laboratory/Desk based

**Indirect Cost Conditions**

Full indirect costs charged to funding body

**Costing and Pricing Summary**

Review the Costing and Pricing tool summary provided by the researchers for their proposal and ensure it confirms with the funding guidelines. If the "Amount to UTS" is less than the UTS cash + in kind, attach a document, e.g. email, to support the Faculty approval for this proposal to proceed to the next stage.

Costing Status

The status will change to "Valid" once the Costing and Pricing Tool has been completed.

In-Progress

Total cost

GIPA 3.1(3)

Total price to be charged to funder

GIPA 3.1(3)

Total project amount: cash (excl. GST) and in-kind

GIPA 3.1(3)

UTS cash contribution

0

UTS in-kind contribution

0

Total contribution by UTS

0

Amount retained at UTS

Override ICR percentages for cost items

 No

Refresh the Costing &amp; Pricing if any changes were made

Costing and Pricing Tool

train

For instructions on how to use this tool, refer to the [Costing and Pricing training module](#)**Review Risk Compliance**

Review the information provided by the researchers on the Compliance and Risk page. Amend appropriately if the proposal needs to be re-assessed by the UTS Research Risk Manager.

**High Risk Research Project**

This is a high-risk project and will be reviewed by the UTS Research Risk Manager.

Does the project involve work with organisations from countries with a score of less than 50 on the [Transparency Index](#)? No

Research activity is with organisations within the fossil fuels, alcohol, gambling and animal testing industries.

Please note the risk assessment will be done based on the nature of the project.

 Yes

Does the transaction involve the export of defence or dual use items controlled under the Defence and Strategic Goods list (DSGL)?

 No

Research Risk Manager has recommended this proposal to proceed

Recommendation

No concerns identified in proceeding with the project. UTS has an overarching agreement with Navantia and this project will fall under the overarching agreement.

**Delegations questions**

Is it a multi-faculty proposal?( e.g. UTS wide tenders or large govt grants involving multiple faculties. This does not apply to business as usual proposals where the research team includes staff from another faculty)

 No

High Risk Proposal

**Content Manager**

Content Manager number RESXX/XXX e.g. RES12/143

RES23/1951

**Confirmation by Research Manager**

Is there any conflict of interest for the ADR to approve this proposal (e.g. FNCI is the ADR, ADR is on the project team)? You can use the "Other to endorse" option and select another reviewer (e.g. Dean)

 No

Was the proposal submitted to funder without Delegate approval?

No

Is this project end user funded?

 Yes**Confirmed by:** type name or initial in textbox below

GIPA 3.1(2)

**Date of faculty confirmation:**

14/03/2024

This proposal needs to meet certain criteria in order to proceed:

- this project falls within the definition of "Research" in the [HERDC Specifications](#)
- the costing and pricing is appropriate for the project
- the Indirect Cost Recovery (e.g. infrastructure) position is clear and acceptable for the Faculty
- UTS cash and in-kind contributions are clear
- any relevant Faculty forms have been attached
- any staff or resources committed from other faculties/units (including Central Research Budget funding) have been agreed to by the appropriate delegates in those faculties/units

Have these criteria been met?

 Yes

Comments

Comments may include explanations regarding this proposal, e.g. any instances where full Indirect Cost Recovery is not being applied, or where the amount of funding received by UTS is less than the UTS cash + in-kind contributions)

all okay

Click on the submit to delegate button in the Actions menu, the delegate will review the proposal.

If the proposal requires clarification from the FNCI, make page comments and click on the Return to CI button in the actions menu

policy

### Indirect cost

#### Indirect Cost Conditions

- Full indirect costs charged to funding body

#### Confirmation

##### 1. This proposal needs to meet certain criteria in order to proceed:

- the time allocation of named staff is reasonable in view of their workload
- the proposal is well written i.e. submitting the proposal will not cause reputational damage to UTS
- the proposal is feasible i.e. the risks involved in performing the work have been identified and mitigated
- the time allocation for equipment and facilities for this project is reasonable, bearing in mind the other uses of the equipment
- arrangements to buy or use (elsewhere) the necessary equipment and facilities are covered in the proposal
- this project falls within the definition of "Research" in the [HERDC Specifications](#)
- Any staff or resources committed from other faculties/units (including Central Research Budget funding) have been agreed to by the appropriate delegate in those faculties/units

Have these criteria been met?

- Yes

# Research Project Request

Reference No : PRO23-18623  
Project Title : Collaboration in Heterogeneous Autonomous Surface-Aerial Vehicle Teams  
Date Received :  
Primary Contact : A/Prof Teresa Alejandra Vidal Calleja (0First Named UTS Chief Investigator)  
Other Contacts : GIPA 3.1(2) (Research Office-Case Support)  
GIPA 3.1(2) (7Project Administrator)  
GIPA 3.1(2) (7Project Administrator)  
GIPA 3.1(2) (2Partner Investigator)  
GIPA 3.1(2) (Research Office- Case Manager)  
GIPA 3.1(2) (Research Office-Case Support)

## Proposal Development

### Proposal Details

The Proposal Form is the first step to structuring and costing a research project prior to submission for funding.

### Project Details

Project ID

PRO23-18623

Project Title

Collaboration in Heterogeneous Autonomous Surface-Aerial Vehicle Teams

External Application ID (if relevant)

Not Answered

External Proposal submission deadline

01/12/2023

Project Description

The objective of this research project is to study and propose a collaboration framework for a team of heterogeneous maritime GIPA s.3.1 (3) / (4)

Proposed Start Date

01/03/2024

Proposed End Date

28/02/2025

Is this project confidential?

No

UTS Primary School and Faculty for this Research Project

FEIT.School of Mechanical and Mechatronic Engineering

Faculty

Faculty of Engineering & Information Technology

### Project Type and Funder/Client Details

Enter the Project Type and the funder or client details for this Proposal.

Project Type

P: Contract Research

The Costing and Pricing Tool applies certain funding rules that are linked to the Project Type to correctly cost and price the research. For more information on each project type, refer to [Research Costing Toolkit](#).

Select type of research funding

Externally funded (grants, tender, contract research, scholarships)

Is UTS leading the research project?

Yes

## Fund Sources and Amounts

### Enter all external funding schemes (i.e. sources) for the project.

External funding schemes may include a single source or a combination of sources. One fund source must be designated as primary.

The applied amounts are auto-populated when using the Costing and Pricing Tool however, when the Costing and Pricing Tool is not in use (e.g. scholarships, ARC/NHMRC, travel grants) the amounts must be manually entered.

### Can't find funder in the list?

1	Code	2182								
	Organisation	Navantia Australia Pty Ltd

Total										
	Comments	Not Answered								
		Not Answered								

Enter all internal cash commitments for the project.

*This question is not answered.*

Primary Fund Source Organisation

Navantia Australia Pty Ltd

policy

For more information, refer to the [UTS Research Policy](#).

## Indirect Cost

### Indirect Costs

It is important for UTS to capture and fully understand the true cost of undertaking research. This includes all direct and indirect costs.

Indirect costs are those related to activities, tasks or resources that are necessary to support the research but are not directly attributable to the project. These are the costs of central and distributed services shared by other activities that are not project specific. They are a real cost borne by the university and therefore need to be recovered. Examples include infrastructure, the use of common library and other physical facilities by researchers (which do not incur per use charges), support and administration costs, etc.

faq

For more information, refer to [Research Finance Procedures](#).

Is this project primarily Laboratory/Field based or Non-Laboratory/Desk based?

Non-Laboratory/Desk based

### Indirect Cost Conditions

- Full indirect costs charged to funding body

## Project Team

Enter details of the Project Team delivering outcomes of the project.

Project Leader (First Named Chief Investigator)

policy

For more information, refer to [Project Team Guidelines](#).

## New Equipment and Digital Tools

UTS has access to some world class facilities and equipment - for the moment these are captured as indirect costs to your project. In future releases we will introduce ways to show these as direct costs to help sustain this critical infrastructure and to enable better usage scheduling.

This page helps you communicate to Laboratory Managers and eResearch staff that new equipment, significant storage or software is required. Identifying the facility, equipment and digital tool requirements for research undertaken at UTS helps to avoid unnecessary cost and effort to procure items that are already available at UTS, and determine the costs for resources that are not currently provided. These new resources should be included on the **Non-Salary and Other Items** page.

## eResearch

eResearch refers to the application of Information Technology to research. Indicate if any of the following eResearch resources will be used in this project;

eResearch Storage

No special storage

High-Performance Computing (HPC)

No HPC needed

## Significant UTS Infrastructure

Will any of the following pieces of UTS infrastructure be used in this project?

None

## New Equipment and Software

### Are you introducing new equipment to UTS as part of this project?

If Yes, add the name and description of what is required and contact the Faculty Research Office for assistance on steps to either locate or procure the facility or equipment required.

No

### Additional software required for this research project

UTS already offers a range of tools and software available at no additional cost for research projects, including survey tools (Qualtrics, REDCap) and statistics software. For more information on existing tools and software available, refer to [RES Hub](#), [eResearch](#), and [ServiceConnect](#) (knowledge base).

Does this project require any new software not already available at UTS

No

## Non-salary and Other Items

Enter the estimated amounts for the non-salary items required for the project.

Select each non-salary item required for the project and enter the total amount for each line.

**Other costs**Scholarships and Prizes \$ **Travel and accommodation costs**Travel - Domestic For more information, refer to [Project Team Guidelines](#).**Costing and Pricing Summary**

Use the Costing and Pricing Tool to complete the project costs and total price.

Click below

For instructions on how to use this tool, refer to the [Costing and Pricing training module](#).**Costing Status**

The status will change to "Valid" once the Costing and Pricing Tool has been completed.

**Total Cost****Total Price****Total Project Amount: Cash (excl. GST) and In-kind****Amount retained at UTS****UTS Cash Contribution****UTS In-kind Contribution****Total Contribution by UTS**For instructions on how to use this tool, refer to the [Research Costing Overview](#).**Compliance and Risk**

Some projects may require

- certain approvals (e.g. ethics or biosafety approvals to be in place prior to commencing the work).
- a risk assessment by the UTS Research Risk Manager to identify any with potential high-risks (e.g. where the research activity is with certain organisations, or involves dual use items).

## Ethics and biosafety

Ethics approval is required for:

- Research with or about [people](#), or their data/information or tissue
- Research or teaching involving [animals](#) (including observational studies)
- Research or teaching involving [GMOs, PC2 pathogens or ionising radiation](#)

## Risk

These questions are used to identify potentially high-risk projects that require a risk assessment by the UTS Research Risk Manager.

Does the project involve work with organisations from countries with a score of less than 50 on the [Transparency Index](#)?

No

Does the research activity involve organisations:

- within the defence industry (excluding Australian defence/government organisations)
- within the fossil fuel industry
- within the alcohol or gambling industry
- within the aerospace industry (excluding Australian government organisations)
- developing or applying surveillance technology (including facial, body and voice recognition)
- conducting animal testing

Yes

Does the research activity involve the export of defence or dual use items controlled under the Defence and Strategic Goods List ([DSGL](#))?

No

## External Parties Identifications

6

Name and address of the external parties involved in this proposal.

1 GIPA 3.1(2) / (3)  
2 Navantia Australia <GIPA 3.1(2)@udc.es>

What do the external parties do?

1 Development of the control strategies  
2 Funding

Industry sectors that the external parties operate in

1 Education  
2 Naval industry

## External Parties Activities

Brief description of the research activities being proposed

1 Development of the control strategies

What is, or will be the purpose of the activities?

Research Collaboration in fundamental topics

How will the proposed activities benefit UTS?

Expand our collaboration with Navantia Australia

## Financial Contribution

Estimate the financial contribution summed by country of overseas external parties.

n/a

### Relationships with External Parties

Has UTS had any previous or current relationships with any proposed external party?

No

Is one or more of the external parties new to UTS?

Yes

Give details

GIPA 3.1(3)

Are there any personal relationships or other interests between any of the UTS staff involved in the project and the external parties or its directors?

No

### Intellectual Property (IP)

Is IP expected to be created by this research project?

No

### Influence

Are there any proposed conditions or outcomes being imposed by the external parties which:

- limit uts's freedom of enquiry or encroach on academic freedom
- lead to a conflict of interest with the ethics, objectives and principles of the university

No

### Health & Safety

Will the opportunity involve UTS having any staff or students overseas (outside of Australia)?

*If yes, please ensure you contact UTS Insurance at [insurance@uts.edu.au](mailto:insurance@uts.edu.au)*

Yes

Do we understand how this opportunity will be executed and whether the health & safety standards are at a standard comparable with those currently in operation in Australia?

yes

policy

For more information, refer to the [UTS Risk Management Policy](#).

### Engagement and Impact

Engagement activities are a critical component of the research lifecycle, and contribute to the overall impact of the research. This page will help identify approaches to research engagement and the consideration of whether these activities have been costed, either through resources provided by the funder or UTS in-kind activities.

Have any research engagement or research translation activities been included in the costing of this proposal (either as funder resourced or in-kind)?

No

Funders will typically fund research engagement and translation processes, as these can maximise the impact and reach of the research being performed. To understand the costs involved in research engagement, these activities should be included in the research budget on the **Non-Salary and Other Items** page. There may not have been time to consider engagement and translation opportunities at the proposal stage with tight submission deadlines. Engagement and impact can be included in the **Project Establish** form.

faq

Learn more about planning impact with the [UTS Research Engagement and Impact resources](#) or send an email to [researchimpact@uts.edu.au](mailto:researchimpact@uts.edu.au)

policy

For more information, refer to the [UTS Research Policy](#).

## Proposal Documents

Attach all documents relevant to this proposal.

### Document Naming Convention

Files should be uploaded with an appropriate naming convention that aligns with the UTS record management software – Content Manager. For example:

1. Proposal\_Draft DDMMYYYY
2. Proposal\_Final DDMMYYYY
3. Agreement\_Final DDMMYYYY
4. FundingGuidelines\_IndirectCostExemption DDMMYYYY
5. InternalCashCommitments DDMMYYYY

### Proposal Documents

	Name	Proposal Draft
	Reference (Document Title)	ASV collaboration project Navantia-UDC-UTS.pdf
	Description	Proposal

## Confirmation

### Project Leader Confirmation and Submission

As the UTS Project Leader, I confirm:

- data entered for this project is complete and accurate to the best of my knowledge;
- I will comply with all relevant UTS policies and procedures;
- all required approvals including ethics, risk assessments and biosafety approvals (where required) will be obtained prior to the research commencing;
- the budget complies with the UTS Research Policy and procedures;
- the Project Type and Funder/Client Details page includes all approved internal fund sources and amounts such as Central, Faculty, School, etc;
- this project falls within the definition of "Research" according to the HERDC Specifications;
- any related interest that may create, or be perceived to create, a conflict of interest in relation to my role in the Project has been declared in accordance with the UTS Code of Conduct.

To sign off the project notification **click on "I Accept" to accept the declaration**. The sign off date will then be generated.

1	Full Name	A/Prof Teresa Alejandra Vidal Calleja
	Position	0First Named UTS Chief Investigator
	Declaration Signed?	Yes
	Signoff Date	01/12/2023
		Not Answered

Click the '**Submit**' button in the Actions menu on the right to progress the review and approval process under UTS standard delegations. The Project Leader will receive a system email with useful next steps while the internal approvals are progressing and the funding outcome is decided.

### Research Risk Manager

Does the project require additional due diligence (international proposals to countries that are less than 50 on the [Transparency Index](#)?)

No

Is the research activity with organisations within the Defence (excluding Australian defence/government organisations), fossil fuels, alcohol, gambling, aerospace industry (excluding Australian government organisations), Surveillance technology (including facial, body and voice recognition) and animal testing industries? (Please note the risk assessment will be done based on the nature of the project).

 Yes

Does the transaction involve the export of defence or dual use items controlled under the Defence and Strategic Goods list (DSGL)?

 No

Does this proposal require a risk/benefit assessment?

 No

Do you recommend this proposal to proceed?

 Yes

Recommendation

No concerns identified. The project falls under the UTS-Navantia umbrella agreement.

[policy](#)

For more information, refer to the [UTS Risk Management Policy](#).

## Research Manager

Review the proposal form and ensure that it meets the criteria for Faculty approval.

## Summary

### Internal UTS fund sources

*This question is not answered.*

Primary Fund Scheme

2182 - Navantia

Primary Fund Source Organisation

Navantia Australia Pty Ltd

### Indirect Cost Recovery

Is this project primarily Laboratory/Field based or Non-Laboratory/Desk based?

Non-Laboratory/Desk based

### Indirect Cost Conditions

Full indirect costs charged to funding body

### Costing and Pricing Summary

Review the Costing and Pricing tool summary provided by the researchers for their proposal and ensure it confirms with the funding guidelines. If the "Amount to UTS" is less than the UTS cash + in kind, attach a document, e.g. email, to support the Faculty approval for this proposal to proceed to the next stage.

Costing Status

The status will change to "Valid" once the Costing and Pricing Tool has been completed.

In-Progress

Total cost

GIPA 3.1(3)

Total price to be charged to funder

GIPA 3.1(3)

Total project amount: cash (excl. GST) and in-kind

GIPA 3.1(3)

Costing and Pricing Tool

train

For instructions on how to use this tool, refer to the [Costing and Pricing training module](#)**Risk assessment**

Review the information provided by the researchers on the Compliance and Risk page. Amend appropriately if the proposal needs to be re-assessed by the UTS Research Risk Manager.

Does the project require additional due diligence (international proposals to countries that are less than 50 on the [Transparency Index](#))?

 No

Is the research activity with organisations within the Defence (excluding Australian defence/government organisations), fossil fuels, alcohol, gambling, aerospace industry (excluding Australian government organisations), Surveillance technology (including facial, body and voice recognition) and animal testing industries? (Please note the risk assessment will be done based on the nature of the project).

 Yes

Does the transaction involve the export of defence or dual use items controlled under the Defence and Strategic Goods list (DSGL)?

 No

**High Risk Research Project: This is a high-risk project and will be reviewed by the UTS Research Risk Manager.**

Research Risk Manager has recommended this proposal to proceed

Risk Manager Recommendation

No concerns identified. The project falls under the UTS-Navantia umbrella agreement.

**Delegations questions**

Is it a multi-faculty proposal? (e.g. UTS wide tenders or large governments grants involving multiple faculties. This does not apply to proposals where the research team can include staff from another faculty)

 No

High Risk Proposal

**Content Manager****Is there an existing record in Content Manager?**

Please note: the system automatically creates a Content Manager record if 'no' is selected. To avoid duplicates, please check if a Content Manager record has already been created before proceeding.

 Yes

Content Manager number RESXX/XXX e.g. RES12/143

RES23/2061

**Confirmation by Research Manager**

Is there any conflict of interest for the ADR to approve this proposal (e.g. FNCI is the ADR, ADR is on the project team)? You can use the "Other to endorse" option and select another reviewer (e.g. Dean)

No

Was the proposal submitted to funder without Delegate approval?

No

**Confirmed by:** type name or initial in textbox below

GIPA 3.1(2)

**Date of faculty confirmation:**

18/12/2023

This proposal needs to meet certain criteria in order to proceed:

- this project falls within the definition of "Research" in the [HERDC Specifications](#)
- the costing and pricing is appropriate for the project
- the Indirect Cost Recovery (e.g. infrastructure) position is clear and acceptable for the Faculty
- UTS cash and in-kind contributions are clear
- any relevant Faculty forms have been attached
- any staff or resources committed from other faculties/units (including Central Research Budget funding) have been agreed to by the appropriate delegates in those faculties/units

Have these criteria been met?

Yes

Comments

Comments may include explanations regarding this proposal, e.g. any instances where full Indirect Cost Recovery is not being applied, or where the amount of funding received by UTS is less than the UTS cash + in-kind contributions)

all okay

Click on the submit to delegate button in the Actions menu, the delegate will review the proposal.

If the proposal requires clarification from the FNCI, make page comments and click on the Return to CI button in the actions menu

policy

For more information, refer to the [UTS Research Policy](#).

all okay

### Indirect costs

Full indirect costs charged to funding body

### Risk assessment

Does the project require additional due diligence (international proposals to countries that are less than 50 on the [Transparency Index](#))?

No

Is the research activity with organisations within the Defence (excluding Australian defence/government organisations), fossil fuels, alcohol, gambling, aerospace industry (excluding Australian government organisations), Surveillance technology (including facial, body and voice recognition) and animal testing industries? (Please note the risk assessment will be done based on the nature of the project).

Yes

Does the transaction involve the export of defence or dual use items controlled under the Defence and Strategic Goods list (DSGL)?

No

**High Risk Research Project: This is a high-risk project and will be reviewed by the UTS Research Risk Manager.**

Research Risk Manager has recommended this proposal to proceed

Risk Manager Recommendation

No concerns identified. The project falls under the UTS-Navantia umbrella agreement.

### Review Risk Compliance

### Confirmation

**1. This proposal needs to meet certain criteria in order to proceed:**

- the time allocation of named staff is reasonable in view of their workload
- the proposal is well written i.e. submitting the proposal will not cause reputational damage to UTS
- the proposal is feasible i.e. the risks involved in performing the work have been identified and mitigated
- the time allocation for equipment and facilities for this project is reasonable, bearing in mind the other uses of the equipment
- arrangements to buy or use (elsewhere) the necessary equipment and facilities are covered in the proposal
- this project falls within the definition of "Research" in the [HERDC Specifications](#)
- Any staff or resources committed from other faculties/units (including Central Research Budget funding) have been agreed to by the appropriate delegate in those faculties/units

Have these criteria been met?

Yes

Faculty of Engineering & Information Technology

### Project Type and Funder/Client Details

Enter the Project Type and the funder or client details for this Proposal.

Project Type

P: Contract Research

The Costing and Pricing Tool applies certain funding rules that are linked to the Project Type to correctly cost and price the research. For more information on each project type, refer to [Research Costing Toolkit](#).

Select type of research funding

Externally funded (grants, tender, contract research, scholarships)

Is UTS leading the research project?

Yes

## Fund Sources and Amounts

### Enter all external funding schemes (i.e. sources) for the project.

External funding schemes may include a single source or a combination of sources. One fund source must be designated as primary.

The applied amounts are auto-populated when using the Costing and Pricing Tool however, when the Costing and Pricing Tool is not in use (e.g. scholarships, ARC/NHMRC, travel grants) the amounts must be manually entered.

### Can't find funder in the list?

Navantia Australia Pty Ltd

policy

For more information, refer to the [UTS Research Policy](#).

## Indirect Cost

### Indirect Costs

It is important for UTS to capture and fully understand the true cost of undertaking research. This includes all direct and indirect costs.

Indirect costs are those related to activities, tasks or resources that are necessary to support the research but are not directly attributable to the project. These are the costs of central and distributed services shared by other activities that are not project specific. They are a real cost borne by the university and therefore need to be recovered. Examples include infrastructure, the use of common library and other physical facilities by researchers (which do not incur per use charges), support and administration costs, etc.

faq

For more information, refer to [Research Finance Procedures](#).

Is this project primarily Laboratory/Field based or Non-Laboratory/Desk based?

Non-Laboratory/Desk based

**Indirect Cost Conditions**

- Full indirect costs charged to funding body

**New Equipment and Digital Tools**

UTS has access to some world class facilities and equipment - for the moment these are captured as indirect costs to your project. In future releases we will introduce ways to show these as direct costs to help sustain this critical infrastructure and to enable better usage scheduling.

This page helps you communicate to Laboratory Managers and eResearch staff that new equipment, significant storage or software is required. Identifying the facility, equipment and digital tool requirements for research undertaken at UTS helps to avoid unnecessary cost and effort to procure items that are already available at UTS, and determine the costs for resources that are not currently provided. These new resources should be included on the **Non-Salary and Other Items** page.

**eResearch**

eResearch refers to the application of Information Technology to research. Indicate if any of the following eResearch resources will be used in this project;

eResearch Storage

No special storage

High-Performance Computing (HPC)

No HPC needed

**Significant UTS Infrastructure**

Will any of the following pieces of UTS infrastructure be used in this project?

None

**New Equipment and Software**

**Are you introducing new equipment to UTS as part of this project?**

If Yes, add the name and description of what is required and contact the Faculty Research Office for assistance on steps to either locate or procure the facility or equipment required.

No

**Additional software required for this research project**

UTS already offers a range of tools and software available at no additional cost for research projects, including survey tools (Qualtrics, REDCap) and statistics software. For more information on existing tools and software available, refer to [RES Hub](#), [eResearch](#), and [ServiceConnect](#) (knowledge base).

Does this project require any new software not already available at UTS

No

**Non-salary and Other Items**

Enter the estimated amounts for the non-salary items required for the project.

Select each non-salary item required for the project and enter the total amount for each line.

Not Answered

policy

For more information, refer to [Project Team Guidelines](#).

**Costing and Pricing Summary**

Use the Costing and Pricing Tool to complete the project costs and total price.

## Compliance and Risk

Some projects may require

- certain approvals (e.g. ethics or biosafety approvals to be in place prior to commencing the work).
- a risk assessment by the UTS Research Risk Manager to identify any with potential high-risks (e.g. where the research activity is with certain organisations, or involves dual use items).

## Ethics and biosafety

Ethics approval is required for:

- Research with or about [people](#), or their data/information or tissue
- Research or teaching involving [animals](#) (including observational studies)
- Research or teaching involving [GMOs, PC2 pathogens or ionising radiation](#)

## Risk

These questions are used to identify potentially high-risk projects that require a risk assessment by the UTS Research Risk Manager.

Does the project involve work with organisations from countries with a score of less than 50 on the [Transparency Index](#)?

No

Does the research activity involve organisations:

- within the defence industry (excluding Australian defence/government organisations)
- within the fossil fuel industry
- within the alcohol or gambling industry
- within the aerospace industry (excluding Australian government organisations)
- developing or applying surveillance technology (including facial, body and voice recognition)
- conducting animal testing

Yes

Does the research activity involve the export of defence or dual use items controlled under the Defence and Strategic Goods List ([DSGL](#))?

No

## External Parties Identifications

Name and address of the external parties involved in this proposal.

Navantia Australia  
Royal Exchange Building, Suite 1, Level 2,  
56 Pitt Street Sydney NSW 2000

What do the external parties do?

Supply maritime vessels to the Australian Navy

Industry sectors that the external parties operate in

Maritime and Defence

## External Parties Activities

Brief description of the research activities being proposed

Investigate and develop technologies for a simulation platform GIPA s.3.1 (3) / (4)

What is, or will be the purpose of the activities?

Develop technologies which will allow Navantia to investigate different algorithms GIPA s.3.1 (3) / (4).

How will the proposed activities benefit UTS?

Increase collaboration with defence, contribute to development of sovereign capability.

How long have we known the proposed external parties?

Last 3 years

### Financial Contribution

Estimate the financial contribution summed by country of overseas external parties.

0 - all funds provided by Navantia Australia, which is an Australian entity.

### Relationships with External Parties

Has UTS had any previous or current relationships with any proposed external party?

Yes

Give details including how long UTS has been in a relationship with each known external party

UTS has been working with Navantia Australia for the past three years.

Is one or more of the external parties new to UTS?

No

Are there any personal relationships or other interests between any of the UTS staff involved in the project and the external parties or its directors?

No

### Intellectual Property (IP)

Is IP expected to be created by this research project?

Yes

What is the nature of the IP created from the project?

Software and algorithms.

Who will own the IP that is generated from the research activity?

Navantia Australia

Does the combination of the nature of IP and ownership represent any concerns?

No

### Influence

Are there any proposed conditions or outcomes being imposed by the external parties which:

- limit uts's freedom of enquiry or encroach on academic freedom
- lead to a conflict of interest with the ethics, objectives and principles of the university

No

### Health & Safety

Will the opportunity involve UTS having any staff or students overseas (outside of Australia)?

If yes, please ensure you contact UTS Insurance at [insurance@uts.edu.au](mailto:insurance@uts.edu.au)

No

policy

For more information, refer to the [UTS Risk Management Policy](#).

### Engagement and Impact

Engagement activities are a critical component of the research lifecycle, and contribute to the overall impact of the research. This page will help identify approaches to research engagement and the consideration of whether these activities have been costed, either through resources provided by the funder or UTS in-kind activities.

Have any research engagement or research translation activities been included in the costing of this proposal (either as funder resourced or in-kind)?

No

Funders will typically fund research engagement and translation processes, as these can maximise the impact and reach of the research being performed. To understand the costs involved in research engagement, these activities should be included in the research budget on the **Non-Salary and Other Items** page. There may not have been time to consider engagement and translation opportunities at the proposal stage with tight submission deadlines. Engagement and impact can be included in the **Project Establish** form.

faq

Learn more about planning impact with the [UTS Research Engagement and Impact resources](#) or send an email to [researchimpact@uts.edu.au](mailto:researchimpact@uts.edu.au)

policy

For more information, refer to the [UTS Research Policy](#).

### Proposal Documents

### Confirmation

#### Project Leader Confirmation and Submission

As the UTS Project Leader, I confirm:

- data entered for this project is complete and accurate to the best of my knowledge;
- I will comply with all relevant UTS policies and procedures;
- all required approvals including ethics, risk assessments and biosafety approvals (where required) will be obtained prior to the research commencing;
- the budget complies with the UTS Research Policy and procedures;
- the Project Type and Funder/Client Details page includes all approved internal fund sources and amounts such as Central, Faculty, School, etc;
- this project falls within the definition of "Research" according to the HERDC Specifications;
- any related interest that may create, or be perceived to create, a conflict of interest in relation to my role in the Project has been declared in accordance with the UTS Code of Conduct.

To sign off the project notification **click on "I Accept" to accept the declaration.** The sign off date will then be generated.

1	Full Name	Mr Herve Harvard
	Position	0First Named UTS Chief Investigator
	Declaration Signed?	Yes
	Signoff Date	19/01/2024
		Not Answered

Click the '**Submit**' button in the Actions menu on the right to progress the review and approval process under UTS standard delegations. The Project Leader will receive a system email with useful next steps while the internal approvals are progressing and the funding outcome is decided.

### Research Risk Manager

Does the project require additional due diligence (international proposals to countries that are less than 50 on the [Transparency Index](#)?)

No

Is the research activity with organisations within the Defence (excluding Australian defence/government organisations), fossil fuels, alcohol, gambling, aerospace industry (excluding Australian government organisations), Surveillance technology (including facial, body and voice recognition) and animal testing industries? (Please note the risk assessment will be done based on the nature of the project).

Yes

Does the transaction involve the export of defence or dual use items controlled under the Defence and Strategic Goods list (DSGL)?

No

Does this proposal require a risk/benefit assessment?

No

Do you recommend this proposal to proceed?

Yes

Recommendation

proceed - project is working with current Australian partner on defence project

policy

For more information, refer to the [UTS Risk Management Policy](#).

### Research Manager

Review the proposal form and ensure that it meets the criteria for Faculty approval.

### Summary

## Primary Fund Scheme

2182 - Navantia

## Primary Fund Source Organisation

Navantia Australia Pty Ltd

**Indirect Cost Recovery**

Is this project primarily Laboratory/Field based or Non-Laboratory/Desk based?

Non-Laboratory/Desk based

**Indirect Cost Conditions**

- Full indirect costs charged to funding body

**Costing and Pricing Summary**

Review the Costing and Pricing tool summary provided by the researchers for their proposal and ensure it confirms with the funding guidelines. If the "Amount to UTS" is less than the UTS cash + in kind, attach a document, e.g. email, to support the Faculty approval for this proposal to proceed to the next stage.

## Costing Status

The status will change to "Valid" once the Costing and Pricing Tool has been completed.

In-Progress

## Total cost

GIPA 3.1(3)

## Total price to be charged to funder

Total project amount: cash (excl. GST) and in-kind

Amount retained at UTS

UTS cash contribution

UTS in-kind contribution

Total contribution by UTS

Override ICR percentages for cost items

No

Refresh the Costing & Pricing

For instructions on how to use this tool, refer to the [Costing and Pricing training module](#)

## Risk assessment

Review the information provided by the researchers on the Compliance and Risk page. Amend appropriately if the proposal needs to be re-assessed by the UTS Research Risk Manager.

Does the project require additional due diligence (international proposals to countries that are less than 50 on the [Transparency Index](#)?)

No

Is the research activity with organisations within the Defence (excluding Australian defence/government organisations), fossil fuels, alcohol, gambling, aerospace industry (excluding Australian government organisations), Surveillance technology (including facial, body and voice recognition) and animal testing industries? (Please note the risk assessment will be done based on the nature of the project).

Yes

Does the transaction involve the export of defence or dual use items controlled under the Defence and Strategic Goods list (DSGL)?

No

**High Risk Research Project: This is a high-risk project and will be reviewed by the UTS Research Risk Manager.**

Research Risk Manager has recommended this proposal to proceed

Risk Manager Recommendation

## Delegations questions

Is it a multi-faculty proposal? (e.g. UTS wide tenders or large governments grants involving multiple faculties. This does not apply to proposals where the research team can include staff from another faculty)

No

## Content Manager

### Is there an existing record in Content Manager?

Please note: the system automatically creates a Content Manager record if 'no' is selected. To avoid duplicates, please check if a Content Manager record has already been created before proceeding.

Yes

Content Manager number RESXX/XXX e.g. RES12/143

RES24/72

## Confirmation by Research Manager

Is there any conflict of interest for the ADR to approve this proposal (e.g. FNCI is the ADR, ADR is on the project team)? You can use the "Other to endorse" option and select another reviewer (e.g. Dean)

No

Was the proposal submitted to funder without Delegate approval?

No

**Confirmed by:** type name or initial in textbox below

GIPA 3.1(2)

**Date of faculty confirmation:**

05/03/2024

This proposal needs to meet certain criteria in order to proceed:

- this project falls within the definition of "Research" in the [HERDC Specifications](#)
- the costing and pricing is appropriate for the project
- the Indirect Cost Recovery (e.g. infrastructure) position is clear and acceptable for the Faculty
- UTS cash and in-kind contributions are clear
- any relevant Faculty forms have been attached
- any staff or resources committed from other faculties/units (including Central Research Budget funding) have been agreed to by the appropriate delegates in those faculties/units

Have these criteria been met?

Yes

Comments

Comments may include explanations regarding this proposal, e.g. any instances where full Indirect Cost Recovery is not being applied, or where the amount of funding received by UTS is less than the UTS cash + in-kind contributions)

all okay

**Click on the submit to delegate button in the Actions menu, the delegate will review the proposal.**

**If the proposal requires clarification from the FNCI, make page comments and click on the Return to CI button in the actions menu**

policy

For more information, refer to the [UTS Research Policy](#).

## Researcher Comments

Not Answered

## Research Manager Comments

all okay

**Indirect costs**

Full indirect costs charged to funding body

**Risk assessment**

Does the project require additional due diligence (international proposals to countries that are less than 50 on the [Transparency Index](#)?)

No

Is the research activity with organisations within the Defence (excluding Australian defence/government organisations), fossil fuels, alcohol, gambling, aerospace industry (excluding Australian government organisations), Surveillance technology (including facial, body and voice recognition) and animal testing industries? (Please note the risk assessment will be done based on the nature of the project).

Yes

Does the transaction involve the export of defence or dual use items controlled under the Defence and Strategic Goods list (DSGL)?

No

**High Risk Research Project: This is a high-risk project and will be reviewed by the UTS Research Risk Manager.**

Research Risk Manager has recommended this proposal to proceed

Risk Manager Recommendation

proceed - project is working with current Australian partner on defence project

## Review Risk Compliance

### Confirmation

#### 1. This proposal needs to meet certain criteria in order to proceed:

- the time allocation of named staff is reasonable in view of their workload
- the proposal is well written i.e. submitting the proposal will not cause reputational damage to UTS
- the proposal is feasible i.e. the risks involved in performing the work have been identified and mitigated
- the time allocation for equipment and facilities for this project is reasonable, bearing in mind the other uses of the equipment
- arrangements to buy or use (elsewhere) the necessary equipment and facilities are covered in the proposal
- this project falls within the definition of "Research" in the [HERDC Specifications](#)
- Any staff or resources committed from other faculties/units (including Central Research Budget funding) have been agreed to by the appropriate delegate in those faculties/units

Have these criteria been met?

Yes

Comments

See RM comments.

## Research Office

### Research Project Type Verification

#### Review and confirm the project type

Do NOT leave it as "application", choose the relevant project type. Project types have a 'P' prefix. \*

P: Contract Research

Is the research project type correct?

Yes

Research project type comment

Not Answered

Does incorrect research project affect costing and pricing?

No

Completed UTS Costing & Pricing tool

yes

## Proposal Development

### Proposal Details

The Proposal Form is the first step to structuring and costing a research project prior to submission for funding.

### Project Details

Project ID

PRO24-19537

Project Title

AUKUS EW Innovation Challenge - Nova lead

External Application ID (if relevant)

Not Answered

External Proposal submission deadline

07/05/2024

Project Description

UTS will subcontract to Nova Systems with the antenna design and development solution

Proposed Start Date

05/07/2024

Proposed End Date

22/07/2024

Is this project confidential?

Yes

UTS Primary School and Faculty for this Research Project

FEIT.School of Electrical and Data Engineering

Faculty

Faculty of Engineering & Information Technology

### Project Type and Funder/Client Details

Enter the Project Type and the funder or client details for this Proposal.

Project Type

P: Research Tender

The Costing and Pricing Tool applies certain funding rules that are linked to the Project Type to correctly cost and price the research. For more information on each project type, refer to [Research Costing Toolkit](#).

Select type of research funding

Externally funded (grants, tender, contract research, scholarships)

**Is UTS leading the research project?**

No

Who is the leading organisation?

Nova Systems

## Fund Sources and Amounts

### Enter all external funding schemes (i.e. sources) for the project.

External funding schemes may include a single source or a combination of sources. One fund source must be designated as primary.

The applied amounts are auto-populated when using the Costing and Pricing Tool however, when the Costing and Pricing Tool is not in use (e.g. scholarships, ARC/NHMRC, travel grants) the amounts must be manually entered.

### Can't find funder in the list?

1	Code	3340

GIPA 3.1(3)

policy

For more information, refer to the [UTS Research Policy](#).

## Indirect Cost

### Indirect Costs

It is important for UTS to capture and fully understand the true cost of undertaking research. This includes all direct and indirect costs.

Indirect costs are those related to activities, tasks or resources that are necessary to support the research but are not directly attributable to the project. These are the costs of central and distributed services shared by other activities that are not project specific. They are a real cost borne by the university and therefore need to be recovered. Examples include infrastructure, the use of common library and other physical facilities by researchers (which do not incur per use charges), support and administration costs, etc.

faq

For more information, refer to [Research Finance Procedures](#).

Is this project primarily Laboratory/Field based or Non-Laboratory/Desk based?

Non-Laboratory/Desk based

### Indirect Cost Conditions

Fund sources excludes full/partial indirect costs

### Research funding for:

None of the above

**Reason for waiver (i.e., Funding Rules excludes Infrastructure/indirect costs, overheads or administrative costs).**

ASCA allows <input type="text"/> % on personnel cost and <input type="text"/> % on non-personnel cost
---

Make sure that you have included the full amount of indirect costs in your budget. Reductions and/or waivers of indirect costs should be based on the list of approved research activities mentioned in Appendix 4 of the Research Finance Procedures. If they have not been listed, seek an approval of indirect cost reduction via the Research Office/DVCR.

**Project Team**

Enter details of the Project Team delivering outcomes of the project.

**Project Leader (First Named Chief Investigator)**

1	Research Project Leader	Yes
	Staff ID	GIPA 3.1(2)
	ORCID	0000-0002-4504-6139

## New Equipment and Digital Tools

UTS has access to some world class facilities and equipment - for the moment these are captured as indirect costs to your project. In future releases we will introduce ways to show these as direct costs to help sustain this critical infrastructure and to enable better usage scheduling.

This page helps you communicate to Laboratory Managers and eResearch staff that new equipment, significant storage or software is required. Identifying the facility, equipment and digital tool requirements for research undertaken at UTS helps to avoid unnecessary cost and effort to procure items that are already available at UTS, and determine the costs for resources that are not currently provided. These new resources should be included on the **Non-Salary and Other Items** page.

## eResearch

eResearch refers to the application of Information Technology to research. Indicate if any of the following eResearch resources will be used in this project;

eResearch Storage

No special storage

High-Performance Computing (HPC)

iHPC (Interactive High Performance Computing)

## Significant UTS Infrastructure

Will any of the following pieces of UTS infrastructure be used in this project?

None

## New Equipment and Software

### Are you introducing new equipment to UTS as part of this project?

If Yes, add the name and description of what is required and contact the Faculty Research Office for assistance on steps to either locate or procure the facility or equipment required.

No

### Additional software required for this research project

UTS already offers a range of tools and software available at no additional cost for research projects, including survey tools (Qualtrics, REDCap) and statistics software. For more information on existing tools and software available, refer to [RES Hub](#), [eResearch](#), and [ServiceConnect](#) (knowledge base).

Does this project require any new software not already available at UTS

No

**Non-salary and Other Items**

Enter the estimated amounts for the non-salary items required for the project.

Select each non-salary item required for the project and enter the total amount for each line.

<b>Travel and accommodation costs</b>	
Travel - Domestic	GIPA 3.1(3)
<b>Facilities and Equipment costs</b>	
Computer Software > \$5k	\$ GIPA 3.1(3)

policy

0

policy

For instructions on how to use this tool, refer to the [Research Costing Overview](#).

**Compliance and Risk**

Some projects may require

- certain approvals (e.g. ethics or biosafety approvals to be in place prior to commencing the work).
- a risk assessment by the UTS Research Risk Manager to identify any with potential high-risks (e.g. where the research activity is with certain organisations, or involves dual use items).

## Ethics and biosafety

Ethics approval is required for:

- Research with or about [people](#), or their data/information or tissue
- Research or teaching involving [animals](#) (including observational studies)
- Research or teaching involving [GMOs, PC2 pathogens or ionising radiation](#)

## Risk

These questions are used to identify potentially high-risk projects that require a risk assessment by the UTS Research Risk Manager.

Does the project involve work with organisations from countries with a score of less than 50 on the [Transparency Index](#)?

No

Does the research activity involve organisations:

- within the defence industry (excluding Australian defence/government organisations)
- within the fossil fuel industry
- within the alcohol or gambling industry
- within the aerospace industry (excluding Australian government organisations)
- developing or applying surveillance technology (including facial, body and voice recognition)
- conducting animal testing

Yes

Does the research activity involve the export of defence or dual use items controlled under the Defence and Strategic Goods List ([DSGL](#))?

No

## External Parties Identifications

Name and address of the external parties involved in this proposal.

Nova Systems Australia, level 2/15 Lancaster Pl, Majura Park ACT 2609

What do the external parties do?

Defence Engineering and Service provider

Industry sectors that the external parties operate in

Defence

## External Parties Activities

Brief description of the research activities being proposed

development of a floating antenna array to cover a few frequency bands of interest

What is, or will be the purpose of the activities?

GIPA s.3.1 (4)

How will the proposed activities benefit UTS?

The UTS will get the opportunity to work on critical leading projects for Australian Defence as part of the ASCA mission - AUKUS EW Innovation challenge. Other than the research income, this will strengthen UTS research capabilities and grow network of collaborators while getting recognition in this discipline.

## Financial Contribution

Estimate the financial contribution summed by country of overseas external parties.

0

## Relationships with External Parties

Has UTS had any previous or current relationships with any proposed external party?

No

Is one or more of the external parties new to UTS?

Yes

Give details

Nova Systems is a reputed fully Australian owned defence engineering company. We never had an opportunity to partner with them before and this is an opportunity partner with them for impactful research contracts.

Are there any personal relationships or other interests between any of the UTS staff involved in the project and the external parties or its directors?

No

## Intellectual Property (IP)

Is IP expected to be created by this research project?

Yes

What is the nature of the IP created from the project?

Project IP related to the developmental work. UTS to own the IPs related to Antenna design, unless ASCA demands ownership to commonwealth.

Who will own the IP that is generated from the research activity?

To be discussed and negotiated based on the contract condition

Does the combination of the nature of IP and ownership represent any concerns?

No

## Influence

Are there any proposed conditions or outcomes being imposed by the external parties which:

- limit uts's freedom of enquiry or encroach on academic freedom
- lead to a conflict of interest with the ethics, objectives and principles of the university

No

## Health & Safety

Will the opportunity involve UTS having any staff or students overseas (outside of Australia)?

If yes, please ensure you contact UTS Insurance at [insurance@uts.edu.au](mailto:insurance@uts.edu.au)

No

policy

For more information, refer to the [UTS Risk Management Policy](#).

## Engagement and Impact

Engagement activities are a critical component of the research lifecycle, and contribute to the overall impact of the research. This page will help identify approaches to research engagement and the consideration of whether these activities have been costed, either through resources provided by the funder or UTS in-kind activities.

Have any research engagement or research translation activities been included in the costing of this proposal (either as funder resourced or in-kind)?

No

Funders will typically fund research engagement and translation processes, as these can maximise the impact and reach of the research being performed. To understand the costs involved in research engagement, these activities should be included in the research budget on the **Non-Salary and Other Items** page. There may not have been time to consider engagement and translation opportunities at the proposal stage with tight submission deadlines. Engagement and impact can be included in the **Project Establish** form.

faq

Learn more about planning impact with the [UTS Research Engagement and Impact resources](#) or send an email to [researchimpact@uts.edu.au](mailto:researchimpact@uts.edu.au)

## Confirmation

### Project Leader Confirmation and Submission

As the UTS Project Leader, I confirm:

- data entered for this project is complete and accurate to the best of my knowledge;
- I will comply with all relevant UTS policies and procedures;
- all required approvals including ethics, risk assessments and biosafety approvals (where required) will be obtained prior to the research commencing;
- the budget complies with the UTS Research Policy and procedures;
- the Project Type and Funder/Client Details page includes all approved internal fund sources and amounts such as Central, Faculty, School, etc;
- this project falls within the definition of "Research" according to the HERDC Specifications;
- any related interest that may create, or be perceived to create, a conflict of interest in relation to my role in the Project has been declared in accordance with the UTS Code of Conduct.

To sign off the project notification **click on "I Accept" to accept the declaration.** The sign off date will then be generated.

1	Full Name	Dr Dush Thalakatuna
	Position	0First Named UTS Chief Investigator
	Declaration Signed?	Yes
	Signoff Date	10/05/2024
		Not Answered

Click the '**Submit**' button in the Actions menu on the right to progress the review and approval process under UTS standard delegations. The Project Leader will receive a system email with useful next steps while the internal approvals are progressing and the funding outcome is decided.

### Research Risk Manager

Does the project involve work with organisations from countries with a score of less than 50 on the [Transparency Index](#)?

No

Is the research activity with organisations within the Defence (excluding Australian defence/government organisations), fossil fuels, alcohol, gambling, aerospace industry (excluding Australian government organisations), Surveillance technology (including facial, body and voice recognition) and animal testing industries? (Please note the risk assessment will be done based on the nature of the project).

Yes

Does the transaction involve the export of defence or dual use items controlled under the Defence and Strategic Goods list (DSGL)?

No

Does this proposal require a risk/benefit assessment?

No

Do you recommend this proposal to proceed?

No

Recommendation

This is a tender to DoD for antennas (critical tech & defence) - ASCA funded. UTS will be a subcontractor to partner Nova Systems Australia. The project money comes from ASCA. UTS to own the IP, unless ASCA demands ownership to commonwealth. If funded appropriate risk mitigations should be put in place - the Lead PI is well versed in working in Defence projects and understands the importance of this. (AJ).

policy

For more information, refer to the [UTS Risk Management Policy](#).

### Research Manager

Review the proposal form and ensure that it meets the criteria for Faculty approval.

Submission deadline?

07/05/2024

**Internal UTS fund sources**

*This question is not answered.*

Primary Fund Scheme

3340 - Advanced Strategic Capabilities Accelerator ASCA

Primary Fund Source Organisation

Department of Defence

**Indirect Cost Recovery**

Is this project primarily Laboratory/Field based or Non-Laboratory/Desk based?

Non-Laboratory/Desk based

**Indirect Cost Conditions** Fund sources excludes full/partial indirect costs**Research funding for:** None of the above**Reason for waiver (i.e., Funding Rules excludes indirect costs, overheads or administrative costs).**

ASCA allows GIPA 3.1(3) on personnel cost and GIPA 3.1(3) on non-personnel cost

**Costing and Pricing Summary**

Review the Costing and Pricing tool summary provided by the researchers for their proposal and ensure it confirms with the funding guidelines. If the "Amount to UTS" is less than the UTS cash + in kind, attach a document, e.g. email, to support the Faculty approval for this proposal to proceed to the next stage.

Costing Status

The status will change to "Valid" once the Costing and Pricing Tool has been completed.

In-Progress

## Risk assessment

Review the information provided by the researchers on the Compliance and Risk page. Amend appropriately if the proposal needs to be re-assessed by the UTS Research Risk Manager.

Does the project involve work with organisations from countries with a score of less than 50 on the [Transparency Index](#)?

No

Is the research activity with organisations within the Defence (excluding Australian defence/government organisations), fossil fuels, alcohol, gambling, aerospace industry (excluding Australian government organisations), Surveillance technology (including facial, body and voice recognition) and animal testing industries? (Please note the risk assessment will be done based on the nature of the project).

Yes

Does the transaction involve the export of defence or dual use items controlled under the Defence and Strategic Goods list (DSGL)?

No

**High Risk Research Project: This is a high-risk project and will be reviewed by the UTS Research Risk Manager.**

Research Risk Manager has not recommended this proposal to proceed

Risk Manager Recommendation

This is a tender to DoD for antennas (critical tech & defence) - ASCA funded. UTS will be a subcontractor to partner Nova Systems Australia. The project money comes from ASCA. UTS to own the IP, unless ASCA demands ownership to commonwealth. If funded appropriate risk mitigations should be put in place - the Lead PI is well versed in working in Defence projects and understands the importance of this. (AJ).

## Delegations questions

Is it a multi-faculty proposal? (e.g. UTS wide tenders or large governments grants involving multiple faculties. This does not apply to proposals where the research team can include staff from another faculty)

No

Does one or more of the following statements apply to this proposal?

- Funder requires central Research Office submission (e.g. ARC, NHMRC, DFAT, US Department of Defence, US NIH)
- Funder is not Australian
- 50% of the research will be conducted outside Australia
- Scheme requires UTS to control the number of applications

Yes

Requires Central Research Office submission

High Risk Proposal

## Content Manager

**Is there an existing record in Content Manager?**

Please note: the system automatically creates a Content Manager record if 'no' is selected. To avoid duplicates, please check if a Content Manager record has already been created before proceeding.

No

## Confirmation by Research Manager

Is there any conflict of interest for the ADR to approve this proposal (e.g. FNCI is the ADR, ADR is on the project team)? You can use the "Other to endorse" option and select another reviewer (e.g. Dean)

No

Was the proposal submitted to funder without Delegate approval?

Yes

Does the funder explicitly stipulate in their Funding Rules that they won't pay (or will only partially pay) university research infrastructure costs?"

Yes

Research manager comments/justifications for indirect cost waiver/reduction.

ASCA allows <sup>GIPA 3.1(3)</sup> on personnel cost and <sup>GIPA 3.1(3)</sup> on non-personnel cost

**Confirmed by:** type name or initial in textbox below

GIPA 3.1(2)

**Date of faculty confirmation:**

15/05/2024

This proposal needs to meet certain criteria in order to proceed:

- this project falls within the definition of "Research" in the [HERDC Specifications](#)
- the costing and pricing is appropriate for the project
- the Indirect Cost Recovery (e.g. infrastructure) position is clear and acceptable for the Faculty
- UTS cash and in-kind contributions are clear
- any relevant Faculty forms have been attached
- any staff or resources committed from other faculties/units (including Central Research Budget funding) have been agreed to by the appropriate delegates in those faculties/units

Have these criteria been met?

Yes

Comments on approval

This is an external led EOI application to be invited to attend the workshop organised by ASCA.

Comments

Comments may include explanations regarding this proposal, e.g. any instances where full Indirect Cost Recovery is not being applied, or where the amount of funding received by UTS is less than the UTS cash + in-kind contributions)

Not Answered

Click on the submit to delegate button in the Actions menu, the delegate will review the proposal.

If the proposal requires clarification from the FNCI, make page comments and click on the Return to CI button in the actions menu

policy

### Indirect costs

Fund sources excludes full/partial indirect costs.

**Reason for waiver (i.e., Funding Rules excludes indirect costs, overheads or administrative costs).**

ASCA allows GIPA 3.1(3) on personnel cost and GIPA 3.1(3) on non-personnel cost

Research manager comments/justifications for indirect cost waiver/reduction.

ASCA allows GIPA 3.1(3) on personnel cost and GIPA 3.1(3) on non-personnel cost

### Proposal submitted to funder without Delegate approval

Comments on approval

This is an external led EOI application to be invited to attend the workshop organised by ASCA.

### Risk assessment

Does the project involve work with organisations from countries with a score of less than 50 on the [Transparency Index](#)?

No

Is the research activity with organisations within the Defence (excluding Australian defence/government organisations), fossil fuels, alcohol, gambling, aerospace industry (excluding Australian government organisations), Surveillance technology (including facial, body and voice recognition) and animal testing industries? (Please note the risk assessment will be done based on the nature of the project).

Yes

Does the transaction involve the export of defence or dual use items controlled under the Defence and Strategic Goods list (DSGL)?

No

**High Risk Research Project: This is a high-risk project and will be reviewed by the UTS Research Risk Manager.**

Research Risk Manager has not recommended this proposal to proceed

Risk Manager Recommendation

This is a tender to DoD for antennas (critical tech & defence) - ASCA funded. UTS will be a subcontractor to partner Nova Systems Australia. The project money comes from ASCA. UTS to own the IP, unless ASCA demands ownership to commonwealth. If funded appropriate risk mitigations should be put in place - the Lead PI is well versed in working in Defence projects and understands the importance of this. (AJ).

## Review Risk Compliance

### Confirmation

#### 1. This proposal needs to meet certain criteria in order to proceed:

- the time allocation of named staff is reasonable in view of their workload
- the proposal is well written i.e. submitting the proposal will not cause reputational damage to UTS
- the proposal is feasible i.e. the risks involved in performing the work have been identified and mitigated
- the time allocation for equipment and facilities for this project is reasonable, bearing in mind the other uses of the equipment
- arrangements to buy or use (elsewhere) the necessary equipment and facilities are covered in the proposal
- this project falls within the definition of "Research" in the [HERDC Specifications](#)
- Any staff or resources committed from other faculties/units (including Central Research Budget funding) have been agreed to by the appropriate delegate in those faculties/units

Have these criteria been met?

Yes

## Research Office

### Research Project Type Verification

#### Review and confirm the project type

Do NOT leave it as "application", choose the relevant project type. Project types have a 'P' prefix.\*

P: Research Tender

Is the research project type correct?

Yes

Research project type comment

The RM entry has been checked against the RFQ Statement of Requirements, the budget is within required limits (\$GIPA 3.1(3) incl. GST).

Does incorrect research project type affect costing and pricing?

Yes

Comment on the research project type costing and pricing impact

Changing the project type would change how pricing is calculated.

Completed UTS Costing & Pricing tool

yes

### Project Funding Verification

Internal UTS Fund Scheme

*This question is not answered.*

Fund source is correct, or if new fund source is stated, create in Project module (do a search first to make sure you are not duplicating the fund scheme) then alter project record in Project module.

yes

In-kind contributions if applicable, are clearly represented.

yes

### Research Team Verification

Is the Research Team complete?

Yes

All researchers are listed as per application

yes

Does the funder explicitly stipulate in their Funding Rules that they won't pay (or will only partially pay) university research infrastructure costs?"

Yes

### Risk assessment

Does the project involve work with organisations from countries with a score of less than 50 on the [Transparency Index](#)?

No

Research activity is with organisations within the fossil fuels, alcohol, gambling and animal testing industries.

Please note the risk assessment will be done based on the nature of the project.

Yes

Does the transaction involve the export of defence or dual use items controlled under the Defence and Strategic Goods list (DSGL)?

No

**High Risk Research Project: This is a high-risk project and will be reviewed by the UTS Research Risk Manager.**

Research Risk Manager has not recommended this proposal to proceed

Risk Manager Recommendation

This is a tender to DoD for antennas (critical tech & defence) - ASCA funded. UTS will be a subcontractor to partner Nova Systems Australia. The project money comes from ASCA. UTS to own the IP, unless ASCA demands ownership to commonwealth. If funded appropriate risk mitigations should be put in place - the Lead PI is well versed in working in Defence projects and understands the importance of this. (AJ).

## Proposal Development

### Proposal Details

The Proposal Form is the first step to structuring and costing a research project prior to submission for funding.

### Project Details

Project ID

PRO24-19538

Project Title

AUKUS EW Innovation Challenge - Advanced Navigation lead

External Application ID (if relevant)

Not Answered

External Proposal submission deadline

07/05/2024

Project Description

In this project, we'll be assisting the Advanced Navigation Team with their solution by providing antenna and RF solution from UTS.

Proposed Start Date

05/07/2024

Proposed End Date

22/07/2024

Is this project confidential?

Yes

UTS Primary School and Faculty for this Research Project

FEIT.School of Electrical and Data Engineering

Faculty

Faculty of Engineering & Information Technology

### Project Type and Funder/Client Details

Enter the Project Type and the funder or client details for this Proposal.

Project Type

P: Research Tender

The Costing and Pricing Tool applies certain funding rules that are linked to the Project Type to correctly cost and price the research. For more information on each project type, refer to [Research Costing Toolkit](#).

Select type of research funding

Externally funded (grants, tender, contract research, scholarships)

**Is UTS leading the research project?**

No

Who is the leading organisation?

Advanced Navigation

## Fund Sources and Amounts

### Enter all external funding schemes (i.e. sources) for the project.

External funding schemes may include a single source or a combination of sources. One fund source must be designated as primary.

The applied amounts are auto-populated when using the Costing and Pricing Tool however, when the Costing and Pricing Tool is not in use (e.g. scholarships, ARC/NHMRC, travel grants) the amounts must be manually entered.

### Can't find funder in the list?

1	Code	3340						
	Organisation	Department of Defence						
	Fund Scheme Name	Advanced Strategic Capabilities Accelerator ASCA						
	Primary Funder/client	Yes

Enter all internal cash commitments for the project.

*This question is not answered.*

Primary Fund Source Organisation

Department of Defence

Total Project Amount

GIPA 3.1(3)

policy

For more information, refer to the [UTS Research Policy](#).

## Indirect Cost

### Indirect Costs

It is important for UTS to capture and fully understand the true cost of undertaking research. This includes all direct and indirect costs.

Indirect costs are those related to activities, tasks or resources that are necessary to support the research but are not directly attributable to the project. These are the costs of central and distributed services shared by other activities that are not project specific. They are a real cost borne by the university and therefore need to be recovered. Examples include infrastructure, the use of common library and other physical facilities by researchers (which do not incur per use charges), support and administration costs, etc.

faq

For more information, refer to [Research Finance Procedures](#).

Is this project primarily Laboratory/Field based or Non-Laboratory/Desk based?

Non-Laboratory/Desk based

### Indirect Cost Conditions

Fund sources excludes full/partial indirect costs

### Research funding for:

None of the above

**Reason for waiver (i.e., Funding Rules excludes Infrastructure/indirect costs, overheads or administrative costs).**

ASCA allows <small>GIPA 3.1(3)</small> on personnel cost and <small>GIPA 3.1(3)</small> on non-personnel cost
---

Make sure that you have included the full amount of indirect costs in your budget. Reductions and/or waivers of indirect costs should be based on the list of approved research activities mentioned in Appendix 4 of the Research Finance Procedures. If they have not been listed, seek an approval of indirect cost reduction via the Research Office/DVCR.

**Project Team**

Enter details of the Project Team delivering outcomes of the project.

### New Equipment and Digital Tools

UTS has access to some world class facilities and equipment - for the moment these are captured as indirect costs to your project. In future releases we will introduce ways to show these as direct costs to help sustain this critical infrastructure and to enable better usage scheduling.

This page helps you communicate to Laboratory Managers and eResearch staff that new equipment, significant storage or software is required. Identifying the facility, equipment and digital tool requirements for research undertaken at UTS helps to avoid unnecessary cost and effort to procure items that are already available at UTS, and determine the costs for resources that are not currently provided. These new resources should be included on the **Non-Salary and Other Items** page.

### eResearch

eResearch refers to the application of Information Technology to research. Indicate if any of the following eResearch resources will be used in this project;

eResearch Storage

No special storage

High-Performance Computing (HPC)

iHPC (Interactive High Performance Computing)

### Significant UTS Infrastructure

Will any of the following pieces of UTS infrastructure be used in this project?

None

### New Equipment and Software

#### Are you introducing new equipment to UTS as part of this project?

If Yes, add the name and description of what is required and contact the Faculty Research Office for assistance on steps to either locate or procure the facility or equipment required.

No

#### Additional software required for this research project

UTS already offers a range of tools and software available at no additional cost for research projects, including survey tools (Qualtrics, REDCap) and statistics software. For more information on existing tools and software available, refer to [RES Hub](#), [eResearch](#), and [ServiceConnect](#) (knowledge base).

Does this project require any new software not already available at UTS

No

## Non-salary and Other Items

Enter the estimated amounts for the non-salary items required for the project.

Select each non-salary item required for the project and enter the total amount for each line.

<b>Travel and accommodation costs</b>	
Travel - Domestic	\$GIPA 3.1(3)
<b>Facilities and Equipment costs</b>	
Computer Software > \$5k	\$GIPA 3.1(3)

policy

For more information, refer to [Project Team Guidelines](#).

## Costing and Pricing Summary

Use the Costing and Pricing Tool to complete the project costs and total price.

policy

For instructions on how to use this tool, refer to the [Research Costing Overview](#).

## Compliance and Risk

Some projects may require

- certain approvals (e.g. ethics or biosafety approvals to be in place prior to commencing the work).
- a risk assessment by the UTS Research Risk Manager to identify any with potential high-risks (e.g. where the research activity is with certain organisations, or involves dual use items).

## Ethics and biosafety

Ethics approval is required for:

- Research with or about [people](#), or their data/information or tissue
- Research or teaching involving [animals](#) (including observational studies)
- Research or teaching involving [GMOs, PC2 pathogens or ionising radiation](#)

## Risk

These questions are used to identify potentially high-risk projects that require a risk assessment by the UTS Research Risk Manager.

Does the project involve work with organisations from countries with a score of less than 50 on the [Transparency Index](#)?

No

Does the research activity involve organisations:

- within the defence industry (excluding Australian defence/government organisations)
- within the fossil fuel industry
- within the alcohol or gambling industry
- within the aerospace industry (excluding Australian government organisations)
- developing or applying surveillance technology (including facial, body and voice recognition)
- conducting animal testing

Yes

Does the research activity involve the export of defence or dual use items controlled under the Defence and Strategic Goods List ([DSGL](#))?

No

## External Parties Identifications

Name and address of the external parties involved in this proposal.

Advanced Navigations, Level 12/255 George St, Sydney NSW 2000

What do the external parties do?

Advanced Navigation provides industry-leading inertial navigation systems and robotics technologies for sea, land and air.

Industry sectors that the external parties operate in

Commercial and Defence

## External Parties Activities

Brief description of the research activities being proposed

UTS team is supporting the AdNav team with development of a wideband antenna array for the proposed solution.

What is, or will be the purpose of the activities?

UTS will be a subcontractor to Advanced Navigation. The project money comes from ASCA

How will the proposed activities benefit UTS?

The UTS will get the opportunity to work on critical leading projects for Australian Defence as part of the ASCA mission - AUKUS EW Innovation challenge. Other than the research income, this will strengthen UTS research capabilities and grow network of collaborators while getting recognition in this discipline.

How long have we known the proposed external parties?

for our team about 1 week, but for UTS it is longer.

## Financial Contribution

Estimate the financial contribution summed by country of overseas external parties.

0

## Relationships with External Parties

Has UTS had any previous or current relationships with any proposed external party?

Yes

Give details including how long UTS has been in a relationship with each known external party

Advanced Navigation has been involved with some projects at Tech Lab from other groups. Specifics are unknown to our team.

Is one or more of the external parties new to UTS?

No

Are there any personal relationships or other interests between any of the UTS staff involved in the project and the external parties or its directors?

No

## Intellectual Property (IP)

Is IP expected to be created by this research project?

Yes

What is the nature of the IP created from the project?

Project IP related to the developmental work. UTS to own the IPs related to Antenna design, unless ASCA demands ownership to commonwealth.

Who will own the IP that is generated from the research activity?

To be discussed and negotiated based on the contract condition

Does the combination of the nature of IP and ownership represent any concerns?

No

## Influence

Are there any proposed conditions or outcomes being imposed by the external parties which:

- limit uts's freedom of enquiry or encroach on academic freedom
- lead to a conflict of interest with the ethics, objectives and principles of the university

No

## Health & Safety

Will the opportunity involve UTS having any staff or students overseas (outside of Australia)?

If yes, please ensure you contact UTS Insurance at [insurance@uts.edu.au](mailto:insurance@uts.edu.au)

No

policy

For more information, refer to the [UTS Risk Management Policy](#).

## Engagement and Impact

Engagement activities are a critical component of the research lifecycle, and contribute to the overall impact of the research. This page will help identify approaches to research engagement and the consideration of whether these activities have been costed, either through resources provided by the funder or UTS in-kind activities.

Have any research engagement or research translation activities been included in the costing of this proposal (either as funder resourced or in-kind)?

No

Funders will typically fund research engagement and translation processes, as these can maximise the impact and reach of the research being performed. To understand the costs involved in research engagement, these activities should be included in the research budget on the **Non-Salary and Other Items** page. There may not have been time to consider engagement and translation opportunities at the proposal stage with tight submission deadlines. Engagement and impact can be included in the **Project Establish** form.

faq

Learn more about planning impact with the [UTS Research Engagement and Impact resources](#) or send an email to [researchimpact@uts.edu.au](mailto:researchimpact@uts.edu.au)

policy

For more information, refer to the [UTS Research Policy](#).

## Proposal Documents

Attach all documents relevant to this proposal.

### Document Naming Convention

Files should be uploaded with an appropriate naming convention that aligns with the UTS record management software – Content Manager. For example:

1. Proposal\_Draft DDMMYYYY
2. Proposal\_Final DDMMYYYY
3. Agreement\_Final DDMMYYYY
4. FundingGuidelines\_IndirectCostExemption DDMMYYYY
5. InternalCashCommitments DDMMYYYY

## Confirmation

### Project Leader Confirmation and Submission

As the UTS Project Leader, I confirm:

- data entered for this project is complete and accurate to the best of my knowledge;
- I will comply with all relevant UTS policies and procedures;
- all required approvals including ethics, risk assessments and biosafety approvals (where required) will be obtained prior to the research commencing;
- the budget complies with the UTS Research Policy and procedures;
- the Project Type and Funder/Client Details page includes all approved internal fund sources and amounts such as Central, Faculty, School, etc;
- this project falls within the definition of "Research" according to the HERDC Specifications;
- any related interest that may create, or be perceived to create, a conflict of interest in relation to my role in the Project has been declared in accordance with the UTS Code of Conduct.

To sign off the project notification **click on "I Accept" to accept the declaration.** The sign off date will then be generated.

1	Full Name	Distinguished Professor Karu Esselle
	Position	0First Named UTS Chief Investigator
	Declaration Signed?	Yes
	Signoff Date	10/05/2024
		Not Answered

Click the '**Submit**' button in the Actions menu on the right to progress the review and approval process under UTS standard delegations. The Project Leader will receive a system email with useful next steps while the internal approvals are progressing and the funding outcome is decided.

### Research Risk Manager

Does the project involve work with organisations from countries with a score of less than 50 on the [Transparency Index](#)?

No

Is the research activity with organisations within the Defence (excluding Australian defence/government organisations), fossil fuels, alcohol, gambling, aerospace industry (excluding Australian government organisations), Surveillance technology (including facial, body and voice recognition) and animal testing industries? (Please note the risk assessment will be done based on the nature of the project).

Yes

Does the transaction involve the export of defence or dual use items controlled under the Defence and Strategic Goods list (DSGL)?

No

Does this proposal require a risk/benefit assessment?

No

Do you recommend this proposal to proceed?

Yes

Recommendation

This is a tender to DoD for antennas (critical tech & defence) - ASCA funded. UTS will be a subcontractor to partner SME Advanced Navigation. The project money comes from ASCA. AN as been previously involved in other Tech Lab projects. UTS to own the IPs related to Antenna design, unless ASCA demands ownership to commonwealth. Arkeus is another partner - who has a lot of defence contracts. If funded appropriate risk mitigations should be put in place - the Lead PI is well versed in working in Defence projects and understands the importance of this. (AJ)

policy

For more information, refer to the [UTS Risk Management Policy](#).

### Research Manager

Review the proposal form and ensure that it meets the criteria for Faculty approval.

Submission deadline?

07/05/2024

## Internal UTS fund sources

*This question is not answered.*

## Primary Fund Scheme

3340 - Advanced Strategic Capabilities Accelerator ASCA

## Primary Fund Source Organisation

Department of Defence

## Indirect Cost Recovery

Is this project primarily Laboratory/Field based or Non-Laboratory/Desk based?

Non-Laboratory/Desk based

## Indirect Cost Conditions

Fund sources excludes full/partial indirect costs

## Research funding for:

None of the above

## Reason for waiver (i.e., Funding Rules excludes indirect costs, overheads or administrative costs).

ASCA allows GIPA 3.1(3) on personnel cost and GIPA 3.1(3) on non-personnel cost

## Costing and Pricing Summary

Review the Costing and Pricing tool summary provided by the researchers for their proposal and ensure it confirms with the funding guidelines. If the "Amount to UTS" is less than the UTS cash + in kind, attach a document, e.g. email, to support the Faculty approval for this proposal to proceed to the next stage.

## Costing Status

The status will change to "Valid" once the Costing and Pricing Tool has been completed.

In-Progress

## Total cost

GIPA 3.1(3)

## Total price to be charged to funder

GIPA 3.1(3)

## Total project amount: cash (excl. GST) and in-kind

GIPA 3.1(3)

## Amount retained at UTS

GIPA 3.1(3)

UTS cash contribution

UTS in-kind contribution

Total contribution by UTS

Override ICR percentages for cost items

 No

Refresh the Costing &amp; Pricing

[Costing and Pricing Tool](#)For instructions on how to use this tool, refer to the [Costing and Pricing training module](#)

## Risk assessment

Review the information provided by the researchers on the Compliance and Risk page. Amend appropriately if the proposal needs to be re-assessed by the UTS Research Risk Manager.

Does the project involve work with organisations from countries with a score of less than 50 on the [Transparency Index](#)?

 No

Is the research activity with organisations within the Defence (excluding Australian defence/government organisations), fossil fuels, alcohol, gambling, aerospace industry (excluding Australian government organisations), Surveillance technology (including facial, body and voice recognition) and animal testing industries? (Please note the risk assessment will be done based on the nature of the project).

 Yes

Does the transaction involve the export of defence or dual use items controlled under the Defence and Strategic Goods list (DSGL)?

 No

**High Risk Research Project: This is a high-risk project and will be reviewed by the UTS Research Risk Manager.**

Research Risk Manager has recommended this proposal to proceed

Risk Manager Recommendation

This is a tender to DoD for antennas (critical tech & defence) - ASCA funded. UTS will be a subcontractor to partner SME Advanced Navigation. The project money comes from ASCA. AN as been previously involved in other Tech Lab projects. UTS to own the IPs related to Antenna design, unless ASCA demands ownership to commonwealth. Arkeus is another partner - who has a lot of defence contracts. If funded appropriate risk mitigations should be put in place - the Lead PI is well versed in working in Defence projects and understands the importance of this. (AJ)

## Delegations questions

Is it a multi-faculty proposal? (e.g. UTS wide tenders or large governments grants involving multiple faculties. This does not apply to proposals where the research team can include staff from another faculty)

 No

Does one or more of the following statements apply to this proposal?

- Funder requires central Research Office submission (e.g. ARC, NHMRC, DFAT, US Department of Defence, US NIH)
- Funder is not Australian
- 50% of the research will be conducted outside Australia
- Scheme requires UTS to control the number of applications

 Yes

High Risk Proposal

**Content Manager****Is there an existing record in Content Manager?**

Please note: the system automatically creates a Content Manager record if 'no' is selected. To avoid duplicates, please check if a Content Manager record has already been created before proceeding.

 No
**Confirmation by Research Manager**

Is there any conflict of interest for the ADR to approve this proposal (e.g. FNCI is the ADR, ADR is on the project team)? You can use the "Other to endorse" option and select another reviewer (e.g. Dean)

 No

Was the proposal submitted to funder without Delegate approval?

 Yes

Does the funder explicitly stipulate in their Funding Rules that they won't pay (or will only partially pay) university research infrastructure costs?"

 Yes

Research manager comments/justifications for indirect cost waiver/reduction.

ASCA allows <sup>GIPA 3.1(3)</sup> on personnel cost and <sup>GIPA 3.1(2)</sup> on non-personnel cost

**Confirmed by:** type name or initial in textbox below

GIPA 3.1(2)

**Date of faculty confirmation:**

15/05/2024

This proposal needs to meet certain criteria in order to proceed:

- this project falls within the definition of "Research" in the [HERDC Specifications](#)
- the costing and pricing is appropriate for the project
- the Indirect Cost Recovery (e.g. infrastructure) position is clear and acceptable for the Faculty
- UTS cash and in-kind contributions are clear
- any relevant Faculty forms have been attached
- any staff or resources committed from other faculties/units (including Central Research Budget funding) have been agreed to by the appropriate delegates in those faculties/units

Have these criteria been met?

 Yes

Comments on approval

This is an external led EOI application to be invited to attend the workshop organised by ASCA.

Comments

Comments may include explanations regarding this proposal, e.g. any instances where full Indirect Cost Recovery is not being applied, or where the amount of funding received by UTS is less than the UTS cash + in-kind contributions)

Not Answered

Click on the submit to delegate button in the Actions menu, the delegate will review the proposal.

If the proposal requires clarification from the FNCI, make page comments and click on the Return to CI button in the actions menu

policy

**Indirect costs**

Fund sources excludes full/partial indirect costs.

**Reason for waiver (i.e., Funding Rules excludes indirect costs, overheads or administrative costs).**ASCA allows <sup>GIPA</sup><sub>3.1(3)</sub> on personnel cost and <sup>GIPA</sup><sub>3.1(3)</sub> on non-personnel cost

Research manager comments/justifications for indirect cost waiver/reduction.

ASCA allows <sup>GIPA</sup><sub>3.1(3)</sub> on personnel cost and <sup>GIPA</sup><sub>3.1(3)</sub> on non-personnel cost**Proposal submitted to funder without Delegate approval**

Comments on approval

This is an external led EOI application to be invited to attend the workshop organised by ASCA.

**Risk assessment**Does the project involve work with organisations from countries with a score of less than 50 on the [Transparency Index](#)? No

Is the research activity with organisations within the Defence (excluding Australian defence/government organisations), fossil fuels, alcohol, gambling, aerospace industry (excluding Australian government organisations), Surveillance technology (including facial, body and voice recognition) and animal testing industries? (Please note the risk assessment will be done based on the nature of the project).

 Yes

Does the transaction involve the export of defence or dual use items controlled under the Defence and Strategic Goods list (DSGL)?

 No**High Risk Research Project: This is a high-risk project and will be reviewed by the UTS Research Risk Manager.**

Research Risk Manager has recommended this proposal to proceed

## Risk Manager Recommendation

This is a tender to DoD for antennas (critical tech & defence) - ASCA funded. UTS will be a subcontractor to partner SME Advanced Navigation. The project money comes from ASCA. AN as been previously involved in other Tech Lab projects. UTS to own the IPs related to Antenna design, unless ASCA demands ownership to commonwealth. Arkeus is another partner - who has a lot of defence contracts. If funded appropriate risk mitigations should be put in place - the Lead PI is well versed in working in Defence projects and understands the importance of this. (AJ)

**Review Risk Compliance****Confirmation****1. This proposal needs to meet certain criteria in order to proceed:**

- the time allocation of named staff is reasonable in view of their workload
- the proposal is well written i.e. submitting the proposal will not cause reputational damage to UTS
- the proposal is feasible i.e. the risks involved in performing the work have been identified and mitigated
- the time allocation for equipment and facilities for this project is reasonable, bearing in mind the other uses of the equipment
- arrangements to buy or use (elsewhere) the necessary equipment and facilities are covered in the proposal
- this project falls within the definition of "Research" in the [HERDC Specifications](#)
- Any staff or resources committed from other faculties/units (including Central Research Budget funding) have been agreed to by the appropriate delegate in those faculties/units

Have these criteria been met?

Yes

Comments

All good

**Research Office****Research Project Type Verification****Review and confirm the project type**

Do NOT leave it as "application", choose the relevant project type. Project types have a 'P' prefix. \*

Internal UTS Fund Scheme

*This question is not answered.*

Fund source is correct, or if new fund source is stated, create in Project module (do a search first to make sure you are not duplicating the fund scheme) then alter project record in Project module.

 yes

In-kind contributions if applicable, are clearly represented.

 yes**Research Team Verification**

Is the Research Team complete?

Yes

All researchers are listed as per application

yes

Does the funder explicitly stipulate in their Funding Rules that they won't pay (or will only partially pay) university research infrastructure costs?"

Yes

### Risk assessment

Does the project involve work with organisations from countries with a score of less than 50 on the [Transparency Index](#)?

No

Research activity is with organisations within the fossil fuels, alcohol, gambling and animal testing industries.

Please note the risk assessment will be done based on the nature of the project.

Yes

Does the transaction involve the export of defence or dual use items controlled under the Defence and Strategic Goods list (DSGL)?

No

**High Risk Research Project: This is a high-risk project and will be reviewed by the UTS Research Risk Manager.**

Research Risk Manager has recommended this proposal to proceed

---

Hi Glenn

Following updates on this partnership development in our 1:1 meetings, the Strategic Partnership Agreement (SPA) between UTS and Thales is ready for execution by Andrew.

Please find the relevant documents attached to support the SPA execution:

- Request for Contract Signing – **requires your endorsement/signature before sharing with Andrew**
- Strategic Partnership Agreement
- Partnership Opportunity Brief
- Emails relating to agreement negotiation and UTS Legal review

As mentioned yesterday, the plan is to have the agreement executed by Andrew and Jeff offline and to have a signing event at the start of the planned first partnership committee meeting – date TBC.

Please let me know if you have any questions or require any more information to pass onto Andrew.

I'll also flag with Greg Welsh and Heather Nolan that we'll require their support for a media release.

Many thanks

John

**John Szabo**

**Director, Strategic Partnerships**

**Partnerships Unit**

**DVC Enterprise**

**University of Technology Sydney**

T. UTS Internal – please call via Teams. UTS External – please contact via mobile.

M. +61 

E. [John.Szabo@uts.edu.au](mailto:John.Szabo@uts.edu.au)

Due to my family/work life schedule crossover, you may receive emails from me outside of normal work hours.

Please do not feel any pressure to respond outside of your own work schedule.

I respectfully acknowledge the Traditional Owners of the land on which we work and live, the Gadigal people of the Eora nation, and pay respect to their elders, past, present and emerging.

## Request for Contract Signing

Guide note: "contracts" in this document include contracts, agreements, deeds, leases, licences and other legally binding documents as well as non-legally binding documents such as memorandums of understanding.

**[When to use this form:** use this document as a cover page when submitting a contract to a UTS staff member for signing. **Do not use this document for research funding agreements which are managed through the Research Office or a faculty research office.**

**Who signs the contract?** UTS contracts must be signed by a staff member with delegated authority to approve the contract under the [Delegations Schedule](#). See [Corporate Governance](#) if you have any questions in relation to the delegations.

**Completion:** once you have finished filling out the fields, delete all highlights and square brackets]

### Document details

<b>Matter or project name</b>	UTS   Thales Partnership	<b>File No.</b>	N/A	
<b>Contract</b>	UTS   Thales Strategic Partnership Agreement (MoU)			
<b>UTS faculty / unit</b>	Partnerships Unit, DVC Enterprise			
<b>Other party</b>	Thales Australia Limited			
<b>Description and purpose</b>	<p>Thales has an exceptional long-standing relationship with the UTS Faculty of Engineering &amp; IT that goes back more than 20 years. It provides a sustained and significant contribution to a broad range of programs and activities, such as internships, scholarship, mentoring, events, guest lectures, professional advisory boards, industry studios, curriculum development and research projects. In the last two decades, Thales has continued to increase and expand contributions to UTS. It has offered WIL experiences for undergraduate to PhD students, particularly Indigenous and female STEM students.</p> <p>Building on this deep relationship and the previous collaboration agreement with the Faculty of Engineering &amp; IT, both parties wish to enter into a whole of university strategic partnership agreement (SPA). The SPA will be a platform to increase the impact of this collaboration and enable Thales to work with relevant disciplines across the university around a shared commitment for innovation and the development of technology, skills and talent in driving to achieve strong outcomes in business results and realising collective goals for achieving broader social engagement and impact.</p> <p style="text-align: center;"><b>Strategic Partnership Agreement - attached</b></p>

<p>Thales Australia is a trusted partner of the Australian Defence Force and is also present in commercial sectors ranging from air traffic management and ground transport systems to security systems and services. Thales Australia employs around 3,800 people directly across 38 sites and supports over 2,000 jobs along its Australian supply chain. In 2020 Thales Australia spent \$657 million with 1,841 Australia suppliers, of which 82% are SMEs. Thales Australia has a history of patient investment to build advanced in-country capability across manufacturing, critical systems and services spending \$100 million on self-funded R&amp;D over the last 3 years. Close collaborative relationships with local customers, Australian SME suppliers and research institutions combined with technology transfer from our global business enables Thales to tailor high quality solutions for Australian and export markets, generating revenue of \$1.6 billion in exports over the past 10 years.</p> <p>Thales Australia has a unique diversity in expertise, talents, and cultures, and delivers extraordinary high technology solutions that make tomorrow possible today. As part of the commitment to creating a respectful, equitable, stimulating work environment where creativity is encouraged, Thales has partnered with UTS to build a more diverse and inclusive workplace culture to improve cultural awareness amongst its employees.</p> <p>Thales has an exceptional long-standing relationship with the UTS Faculty of Engineering &amp; IT that goes back more than 20 years. It provides a sustained and significant contribution to a broad range of programs and activities, such as internships, scholarship, mentoring, events, guest lectures, professional advisory boards, industry studios, curriculum development and research projects. In the last two decades, Thales has continued to increase and expand contributions to UTS.
